Improved Thrashing Machine!

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

At a time like the present, when labor is very scarce, it is important that farmers who are interested should give attention to the above improvement, which will considerably reduce the expense of thrashing grain over the common way.

This machine has been before the public for a number of years, but not very widely circulated, although it has competed with all the best of the different patented Grain Separators, and proved a decided advantage, and now has the reputation of being the best Separator ever before the public. In order to prove this in new neighborhoods where it is not known, I am willing to forward a machine for a test to any person desiring a trial, and have its merits tested; and I wish to have it understood that I put the machine upon its own merits, and want farmers to judge for themselves. If it does not fully meet their wants and they do not wish to purchase, I am perfectly willing to bear all expenses of shipping.

The machine is particularly adapted to farmers for their own use, and will apply to level or railway power, will thresh and clean in good grain, from 100 to 150 bushels per day, using four to six horses and the same number hands, but under very favorable circumstances will thresh more per day. It cleans the grain thoroughly clean by one operation, which is not generally done by other Separators. Grain cleaned on this machine, with much light filthy matter, is worth one or two cents more per bushel than if cleaned in the common way. There is also a great saving of grain, in straw and chaff over the common way of thrashing and cleaning, and also over other Separators and Cleaners.

The machine is conveniently arranged for hauling and thrashing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half the trouble in a barn or house as the common thrasher and shaker. It is also easily put in operation, being simple, easily managed, reliable, durable, compact, and cleanly to work by while in operation, not making near the dust as the common machine or other Separators.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation from farmers that are using them, I must come to the conclusion that it is the very machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, which I hope they will give me an opportunity, as I am willing to be responsible, as already stated, Price of Machine at Shop, (all complete, ready to attach to belt Lever or Railway Power,) \$175 cash, \$180 in three months, with interest from date. As material for manufacturing advances, there may be a corresponding advance in the price of machines. The machine is fully represented in the above cut. I warrant the machine to do as above represented. Orders solicited and promptly attended to. The machine is manufactured in Pennsylvania and Maryland, at different shops. For further information and description of machine, address DANIEL GEISER, Proprietor, Waynesboro', Franklin County, Penna. Sep. 23—1f.]

Waynesboro' Foundry AND MACHINE SHOP.

GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER, AND THE LATEST IMPROVED THRESHER AND TRIPPLE-GEARED HORSE POWERS, DRIVING EITHER BY GEAR OR BELT, ALL FURNISHED COMPLETE, READY TO PUT ON WAGONS.

I, the undersigned, desire to call the attention of Farmers and Threshermen of Franklin and adjoining counties to this machine. It has been before the public for a number of years, during which time it has given general satisfaction, and the patentee has made some very important improvements which render it still more complete, both for clean separating and cleaning, and also for the ease of draught and der it still more complete. I take pleasure in recommending it to the public knowing that it will give the best satisfaction. I am manufacturing two sizes, viz: The small size, which will thresh and clean from 200 to 500 bushels per day. The large size, which will thresh and clean from 500 to 1000 bushels per day. The small size, which fully represents the machine, also full description, price, &c., of machine. Persons wishing machines should send in their orders in reasonable time to insure their being filled.

I am manufacturing different sizes of Sugarcane Mills (to be driven either by water, steam or horse-power) and Evaporators and fixtures for making Syrup; also Portable and Stationary Steam Engines for driving Mills, Thrashing Machines, Sawing Wood, &c. I am fully prepared to make the above to order and on short notice; also GRIST AND SAW MILL GEARING, SHAPING AND PULLEYS, IRON BRIDGES, CAST IRON WATER-WHEELS, IRON KETTLES, &c. Stoves and Flow castings, also cast iron and wrought iron pipes for steam or water, and Brass castings of every description; in a word, I am prepared to do everything usually done in a foundry and machine shop. All my machines are sold under warranties. My hands are all experienced workmen in this line of business, and I use all good material, so that I am perfectly satisfied in warranting all my work. I am also prepared to do repairing in workman like manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in for repairing must be accompanied with the cash. THIS INVENTION consists of DUPLEX (or two) Elastic Pure Refined Steel Springs, ingeniously BRAIDED TOGETHER and FIRMLY TOGETHER, under the name of the "TONGUES," most FLEXIBLE, ELASTIC and DURABLE Springs ever used. They seldom need to BEAK, like the Single Springs, and consequently preserve their perfect and beautiful shape more than twice as long as any Single Spring Skirt that ever Has or Can be made.

THE wonderful flexibility and great comfort and pleasure to any Lady wearing the Duplex Elastic Skirt will be experienced particularly in all crowded Assemblies, Opera, Carriages, Railroad Cars, Church Pews, Ann Chaises, for Promenade and House Dress, as the Skirt can be folded when used to occupy a small place as easily and conveniently as a Silk or Muslin Dress.

A Lady having Enjoyed the Pleasure, Comfort and Great Convenience of wearing the Duplex Elastic Skirt for a single day will never afterwards willingly dispense with the use. For Children, Misses and Young Ladies they are superior to all others.

THE HOOPS are covered with 2 ply double twisted thread and will wear twice as long as the Single yarn covering which is used on all Single Steel Hoop Skirts. The three bottom rods on every skirt are also double steel, and twice or double covered to prevent the covering from wearing off the rods when dragging down stairs stone steps, etc., which they are constantly subject to when in use.

All are made of the new and elegant Corded Twines, and are the best quality in every part, giving to the wearer the most graceful and perfect shape possible, and are unquestionably the lightest, most desirable, comfortable and economical skirt ever made.
