Improved Thrashing Machine!

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

At a time like the present, when labor is very scarce, it is important that farmers who are interested should give attention to the above improvement, which will considerably reduce the expense of thrashing grain over the common way. This machine has been before the public for a number of years, but not very widely circulated, although it has competed with all the best of the different patented Grain Separators, and proved a decided advantage, and now has the reputation of being the best Separator ever before the public. In order to prove this in new neighborhoods where it is not known, I am willing to forward a machine for a test to any person desiring a trial, and have its merits tested, and I wish to have it understood that I put the machine upon its own merits, and want farmers to judge for themselves. If it does not fully meet their wants and they do not wish to purchase, I am perfectly willing to bear all expenses of shipping. The machine is particularly adapted to farmers for their own use, and will apply to lever or railway power, will thresh and clean, in good grain, from 100 to 150 bushels per day, using four to six horses and the same number hands, but under very favorable circumstances will thresh more per day. It cleans the grain thoroughly clean by one operation, which is not generally done by other Separators. Grain cleaned on this machine, with much light flint matter, is worth one or two cents more per bushel than if cleaned in the common way. There is also a great saving of grain, in straw and chaff over the common way of thrashing and cleaning, and also over other Separators and Cleaners. One man can easily move or shift it about, so that it is not half the trouble in a barn floor as the common thrasher and cleaner. It is also easily put in operation, being simple, easily managed, reliable, durable, compact and skilful to work by while in operation, not making near the dust as the common machine or other Separators. Farmers rest assured that this machine is no dummy, and judging from the high recommendation from farmers that are using them, I must come to the conclusion that it is the very machine that farmers want and will have, as soon as they have an opportunity to appreciate and attest its merits, which I hope they will give me an opportunity, as I am willing to be responsible, as already stated. Price of Machine at Shop, (all complete, ready to attach to belt Lever or Railway Power,) \$1,75 cash, \$180 in three months, with interest from date. As material for manufacturing advances, there may be a corresponding advance in the price of machines. The machine is fully represented in the above cut, and is not a duplicate. Orders solicited and promptly attended to. I warrant the machine to do as above represented. The machine is manufactured in Pennsylvania and Maryland, at different shops. For further information and description of machine, address: **DANIEL GEISER, Proprietor, Waynesboro', Franklin County, Penna.** Sep. 23—4t.]

I, the undersigned, desire to call the attention of Farmers and Threshermen of Franklin and adjoining counties to this machine. It has been before the public for a number of years, during which time it has given general satisfaction, and the patience has made some very important improvements which render it still more complete, both for clean separating and cleaning, and also for the ease of draught and fast thrashing. I take pleasure in recommending it to the public knowing that it will give the best satisfaction. I am manufacturing two sizes, viz: The largest is eight-horse power and will thresh and clean from 700 to 800 bushels per day. The small size. See the above which fully represents the machine, also full description, price, &c., of machine. Persons wishing machines should send in their orders in reasonable time to insure their being filled.

The Great Invention of the Age in **HOOP SKIRTS.** **J. W. BRADLEY'S** New Patent **DUPLEX ELIPTIC** (or Double) **SPRING SKIRT!** THIS INVENTION consists of Duplex (or two) Elliptic Pairs Rarized Steel Springs, ingeniously braided together and placed together, edge to edge, making the roughest, most elastic, and durable Springs ever used. They seldom bend or break, like the Single Springs, and consequently preserve their perfect and beautiful shape more than twice as long as any Single Spring Skirt that ever has been made.

The wonderful flexibility and great comfort and pleasure to any Lady wearing the Duplex Elliptic Skirt will be experienced particularly in all crowded Assemblies: Operas, Carriages, Railroad Cars, Church Pews, Arm Chairs, for Promenades and House Dress, as the Skirt can be folded when in use to occupy a small space in a trunk, and conveniently as a Silk or Muslin Dress.

A Lady having enjoyed the Pleasure, Comfort and Great Convenience of wearing the Duplex Elliptic Steel Spring Skirt for a single day will never afterwards willingly dispense with their use. For Children, Misses and Young Ladies they are superior to all others.

The HOOPS are covered with 2-ply double twisted thread and will wear twice as long as the Single yarn covering which is used on all Single Steel Hoop Skirts. The three bottom ends of hoop skirt are also double twisted, and a piece of double covered to prevent the covering from wearing off the rods when dragging down stairs stone steps, etc., etc., which they are constantly subject to when in use.

All are made of the new and elegant Corded Tapes, and are the best quality of every part, giving to the wearer the most graceful and perfect shape possible, and are unquestionably the lightest, most desirable, comfortable and economical skirt ever made.
