

Farmers will please look at the great advantage in Thrashing

GEISERS' PATENT SBLF-REGULATING GRAIN SEPARATOR. CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt.

This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floor as a common thrasher and shaker. It is also easily put-in-operation. It is simple, easily managed; eliable, durable, compact and cleanly to work by when in operation, not making near the dust as the common making near the dust as the common

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, I must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perform as represented in this Circular.

No. I is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes, is thirty five inches wide, and delivers the straw on the second ruke, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be casily managed to carry the chass with the straw, or deliver it in a separate-place.—The trunk and fan sides being closed, to confine the straw and chass, remedies all difficulties in cleaning grain against wirely weather. It bags the grain by reasonable management, sufliciently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstance, it will thresh from forty to lifty bushels per hour, and with more case and agreeableness o hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; is intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron thresher frame, and cylinder, 123 inches in diameter and 28 inches long; delivers the clean grain in bags, or if frame, and cylinder, 124 inches in diameter and 28 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the needer, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean nands; but to lorce the work, unter most hards and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will pply very well to a two-horse railway power

Shop Prices of Machines range from \$210, to \$525. warrant the machines to be as above represented; also against any reasonable defects of material

Having now taken a room to keep Repair Castings on hand, I have also selected and am prepared to furnish a variety of other sgricultural implements, the intest and best improved, and such as are best adapted to the wants of the farmers of this part of the country: Such as the Hagerstown (Miller's) Clover Stemmer. Huller and Cleaner, which is proving by its own merits to be one of the best machines of the kind now in use. The latest improved BUCKEYE REAPER AND MOW-ER combined, with Dropper, and the Mower alone. They American Hay Fork and Knife combined; Hay Rakes, Fodder Cutters, Cider Mills, &c. &c. &c., which I will furnish on short notice and warrant

them to answer the purposes for which they are intended. Orders solicited and promptly attended to. For further particulars, circulars, &c. address

May 4, 1866.]

-Daniki Griskr, Waynesboro', Franklin Co. Penn'a.

Waynesboro' Foundry MACHINE SHO

GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER, AND THE LATEST IMPROVED THRESHER AND TRIPPLE-GEARED HORSE POWERS, DRIVING EITHER BY GEAR OR BELT, ALL FURNISHED COMPLETE, READY TO PUT ON WAGONS.

I, the undersigned, desire to call the attention of Farmers and Threshermen of Franklin and adjoining counties to this machine. It has been before the public for a number of years, during which time ihas given general satisfaction, and the patentee has made some very important improvements which rent der it still more complete, both for clean separating and cleaning, and also for the case of draught and fast threshing. I take pleasure in recommending it to the public knowing that it will give the best satisfaction. I am manufacturing two sizes, viz:

The largest is eight-horse power and wilt thresh and clean from 200 to 500 bushels per day.

The small size. See the above which fully represents the machine, also full description, price, &c., of machine. Persons wishing machines should send in their orders in reasonable time to insure their being

elewold errolled of travelying AND MANUFACTURERS OF SYRUP!

I am manufacturing different sizes of Sugarcane Mills (to be driven either by water, steam or horsepower) and Evoporators and fixtures for making Syrup; also Portable and Stationary Steam Engines for driving Mills, Threshing Machines, Sawing Wood, &c.

driving Mills, Threshing Machines, Sawing Wood, &c.

1 am fully prepared to make the above to order and on short notice; also
GRIST AND SAW MILL GEARING, SHAFFING AND PULLEYS, IRON BRIDGES, CAST
IRON WATER-WHEELS. IRON KETTLES, &c. Stoves and Plow castings, also cast iron and wrought iron pipe for steam orwater, and Brass castings of every description; in a word, I am prepared to do everything usually done in a foundry and machine shop. Having supplied myself with the latest improved machinery, such as Lathes, Boring, Planing shop. Having supplied myself with the latest improved machinery, such as January, and Drilling Machines, persons can rely on having their work done in the most satisfactory manner. I am also prepared to manufacture to order machinery for wood, such as Tonging and Gro ing ma-

chines for flooring, Surface, Tenout and Moulding machines, &c. I also offer to the public a new and valuable improvement in my steam engines, made within the last year, viz: for the economizing of fuel, and the regulation of speed, which renders my new engines far superior to the old engines. All my machines are sold under warrantee. My hancs are all experienced workmen in this line of business, and I use all good material, so that I am perfectly safe in war-

ranting all my work. I am also prepared to do repairing in workman like manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in for repairing must be accompanied with the cash.

For particulars and circulars descriptive of machine, address

GEORGE FRICK,

Or DANIEL GLISER, Proprietor of Territory and solicitor of orders, Waynesburo, Franklin Co. Pa.

THE HARVESTER OF 1866. Fashionable Millinery RUSSEL'S COMPLEED REAPER & MOWER

E call the attention of farmers to this justly celebrated Harvester. As a combined Machine, we can safely say is has no equal. It is a perfect Reaper as a Reaper, and Mower as a Mow-

The "Russel" is a double wheeled machine with folding cutter bar. The Reaper is so constructed that by removing a single bolt the platform, reel. &c., swings to the rear, thus making it as convenient to pass through a gate or over a bridge as a wacon. It also has the Dropper attachment, which for several reasons is much preferred to a self-rake. The "Russel" claims to be superior in the following essential points, viz: Lightness of draft, in the regulation of the speed of the reel, application of power, durability and general finish.

These Machines are menufactured at Massilon, Ohio, by superior workmen. Those wishing a good Machine, and all lovers of complete mechanism are invited to give it an examination and judge for themselves. We hope to have it on exhibition in Waynesboro' in a few days.
