THE HARVESTER OF 1866.

WE call the attention of farmers to this justly celebrated Harvester. As a combined Machine, we can safely say it has no equal. It is a perfect Reaper as a Reaper, and Mower as a Mower.

The "Russell" is a double wheeled machine with folding cutter bar. The Reaper is so constructed that by removing a single bolt the platform, reel, &c., swings to the rear, thus making it as convenient to pass through a gate or over a bridge as a wagon. It also has the Dropper attachment, which for several reasons is much preferred to a self-riking. The "Russell" claims to be superior in the following essential points, viz: Lightness of draft, in the regulation of the speed of the reel, application of power, durability and general finish.

These Machines are manufactured at Massillon, Ohio, by superior workmen. Those wishing a good machine, and a lot of complete machinery, are invited to give it an examination and judge for themselves. We hope to have it on exhibition in Waynesboro' in a few days. C. V. WILSON, Agent, Greencastle, Pa. May 4—1f]
