## THE GREAT ZINGARI BITTERS.

## **ASure Preventive** OF CHOLERA!

FTHIS WONDERFUL REMEDY was discovered and introduced about twenty years ago by S. Cheol sus, an emment Egyptian physician. He had lorg seen and felt the want of some remedy which vould strike at the root of the disease as il so prevent much of the suffering which the human family was then compelled to endure.

This great question was presented to his mind-

every day in vivid colors as I e moved among the suck and dying, and observed the inefficiency of nearly all the remedies then in use. Thus he was lead to think and experiment; and after ten years of study and labor, he presented to his fellow-man the wonderful Zingari Buters. The effect of this prep-arition in the prevention and cure of disease, was so marvellous and astonishing, that the most flattering marks of royal invor were bestowed upon him who discovered it. His name was placed upon the Roll of Nobles, and a gold medal with the following inscription—Pr. S. Cheopsus, the Public Benefactor-was presented to him by the Viceroy.

The preparation has been used in several epidem ics of cholers, both us a preventive and curative measure, and with great success, that it has been introduced into nearly all the general hospitals of the old world. The old saying that an ounce of revention is worth a pound of cure, applies with marveth us force to cholera; and therefore any remony that will protect us against this terrible dirense

thou'd be feely and persistently used.
All pathologists now agree that the cholera pois in acts on one system through the blood, and that any confination which acts on the excretory organs, and keeps them in working order, must prevent a sufficient accumulation of the poison to exert its trible effects on the organism. This is true not only of cholers, but of nearly all other maladies, espartilly the different forms of fever.

The Z ngsri flitters is just such a remedy as the above conditions require. It acts on the organs of ex retion and secretion, keeping up a perfect bal-ance between them. This bitters is composed en-turely of roots and herbs, so nicely concocted that every org n is acted upon and put in tone. Its taste

is pienent; and its effects prompt and lasting.
Annurous cases of the following diseases have leen cured by it: Goolers, Diarrhoss, Dysentery, I yphod and Typhus Fever, Fever Ague, Nervous Les hiry. Anaemia. Dysyepsia, Flatulency, Colic, ten fula, &c. Price \$1 per quart bottle. From total Depot at the Walnut street wharf, Hartiling I'm. Sold by Pruggists, Hotelkoepers and
Croccis. F RANTER; Sole i reprietor.
For sale at the "Waynesboro' Hotel," by V. B.

## GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR.

CLEANER AND BAGGER. With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt.

This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floor as a common thrasher and shaker. It is also easily put in operation. It is simple, easily managed, reliable, durable, compact and cleanly to work by when in operation, not making near the dust as the common

Farmers can rest assured that this machine is no humbur, and judging from the high recommendaion of farmers that are using them, I must come to the conclusion that it is the very Machine that far mers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perform

No. I is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes, is thirty five inches wide; and delivers the straw on the second rake, these carry the straw out on their is thirty-five inches wide; and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder; on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against will average weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to toty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstance, it will thresh from forty to fifty bushels per hour, and with more case and agreeableness to hands than any other machine now in common use.

to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; is intended to apply to any common lever or railway power; weight 1,300 pounds; has an iron thresher frame, and cylinder, 12½ inches in diameter and 28 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the recder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels. of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean cuasiderably more. The Machine will threah and clean all kinds of grain generally threshed with the common muchine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power

Shop Prices of Machines range from \$210, to \$525. warrant the machines to be as above represented; also against any reasonable defects of material

Having now taken a room to keep Repair Castings on hand, I have also selected and am prepared to furnish a variety of other agricultural implements, the latest and best improved and such as are best adapted to the wants of the tarmers of this part of the country: Such as the Hagerstown (Miller's) Clover Stemmer, Huller and Cleaner, which is proving by its own merits to be one of the best-machines-of the kind-now in use. The latest improved BUCKEYE RE-1PER AND MOW. ER combined, with Dropper, and the Mower alone. The American May Fork and Knife combined, Hay Rakes, Fodder Cutters, Cider Mills, &c. &c. &c., which I will furnish on short notice and warrant them to account the numbers for which I would be sufficiently and warrant them to account the numbers for which I would be sufficiently and warrant them.

Hay Rakes, Fodder Cutters, Cider Mills, &c. &c. &c., The state of them to answer the purposes for which they are intended.

For further particulars, circulars, &c. address

BANIEL GEISER,

Cana Waynesboro', Franklin Co. Penn'a.

GER, AND THE LATEST IMPROVED THRESHER AND TRIPPLE GEARED HORSE POWERS, DRIVING EITHER BY GEAR OR BELT, ALL FURNISHED COMPLETE, READY TO PUT ON WAGONS.

I, the undersigned, desire to call the attention of Farmers and Threshermen of Franklin and adjoin ing counties to this machine. It has been before the public for a number of years, during which time ihas given general satisfaction, and the patentee kas made some very important improvements which rent der it still more complete, both for clean separating and cleaning, and also for the ease of draught and fast threshing. I take pleasure in recommending it to the public knowing that it will give the best satis-

faction. I am wanufacturing two sizes, viz : The largest is eight-horse power and will thresh and clean from 200 to 500 bushels per day.

The small size. See the above which fully represents the machine, also full description, price, &c., of machine. Persons wishing inachines should send in their orders in reasonable time to insure their being.
