**CELEBRATED BASE BURNING STOVE THE MORNING GLORY!**

The Morning Glory is a perpetual burner, having a magazine or reservoir for reserve coal, which is required to be filled but once a day, and if the proper sized coal is used it is not necessary to rekindle the fire during the entire winter.

(No clinker will remain in these stoves, nor will there be any trouble from sinter, or other impurities in the coal, the fire being always at the base of the coal, the impurities are left in the ashes and ground out by the "Mill-grate.")

**THERE'S NO ESCAPE OF GAS OR DUST ECONOMY OF FUEL!**

The combustion of fuel being perfect and at a high temperature, the amount of heat produced from the same quantity of coal is much greater than at a low temperature, hence but a small quantity of fuel is necessary to be undergoing the process of combustion at one time. The entire outer surface of the Morning Glory is radiating surface. Add to this the surface of objects heated by rays of light from the mica window, and you have the secret of the great heating properties of the Morning Glory with a small amount of fuel.

**THE GREAT ZINGARI BITTERS.**

**A Sure Preventive OF CHOLERA!**

**THIS WONDERFUL REMEDY** was discovered and introduced about twenty years ago by **Dr. S. Cheopus**, an eminent Egyptian physician.

He had long seen and felt the want of some remedy which would strike at the root of the disease, and so prevent much of the suffering which the human family was then compelled to endure.

This great question was presented to his mind every day in vivid colors as he moved among the sick and dying, and observed the inefficiency of nearly all the remedies then in use. Thus he was lead to think and experiment; and after ten years of study and labor, he presented to his fellow-man the wonderful Zingari Bitters.

The effect of this preparation is the prevention and cure of disease, was so marvellous and astonishing, that the most flattering marks of royal favor were bestowed upon him who discovered it. His name was placed upon the Roll of Nobles, and a gold medal with the following inscription—**Dr. S. Cheopus, the Public Benefactor**—was presented to him by the Viceroy.

The preparation has been used in several epidemics of cholera, both as a preventive and curative measure, and with great success, that it has been introduced into nearly all the general hospitals of the old world. The old saying, that a course of prevention is worth a pound of cure, applies with marvellous force to cholera, and therefore any remedy that will protect us against this terrible disease should be freely and persistently used.

All pathologists now agree that the cholera poison acts on the system through the blood, and that any combination which acts on the excretory organs, and keeps them in working order, must prevent a sufficient excretion of the poison to exert its terrible effects on the organism. This is true not only of cholera, but of nearly all other maladies, especially the different forms of fever.

The Zingari Bitters is just such a remedy as the above conditions require. It acts on the organs of excretion and secretion, keeping up a perfect balance between them. This Bitters is composed entirely of roots and herbs, so nicely concocted that every organ is acted upon and put in tone. Its taste is pleasant and its effects prompt and lasting.

Numerous cases of the following diseases have been cured by it: Cholera, Diarrhoea, Dysentery, Typhoid and Typhus Fever, Fever, Ague, Nervous Debility, Anaemia, Dyspepsia, Flatulency, Colic, Scrofula, &c. Price \$1 per quart bottle.

I was the first farmer to whom it was given and the first one to use it for stock. I found it fully equal to what Mr. Nixon said of it, and I have used it extensively since, and heartily recommend it to farmers as a sure thing in fattening stock of all kinds and a capital Powder for Horses.

**MICHAEL EBERSOLE, Chambersburg, December, 1865.**

**Mn. J. S. NIXON.**—To the multitude in this portion of our State, who have used your Cattle Powder, no commendation is necessary. Its beneficial effects have been fairly tested, and hence its unbounded popularity. I have used it for my horses and cows for several years past, and cannot afford to do without it. It keeps all kind of cattle in good condition, loosens the skin, smooths the hair, and sharpens their appetites. As a preventive from disease, I regard it as invaluable. Yours, &c. **REV. D. S.
