Improved Thrashing Machine!

Farmers will please look at the great advantae in Thrashing

GEISERS' PATENT SHLF-REGULATING GRAIN SEPARATOR

CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt.

This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floor as an common thrasher, and shaker. It is also easily put in operation. It is simple, easily managed, reliable, durable, compact and cleanly to work by when in operation, not making near the dust as the commonmachine or other Separators.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, I must come to the conclusion that it is the very Machine that far-

mers want and will have as soon as they have an opportunity to appreciate and attest its merits, forwhich I hope they will give me an opportunity, as I am willing to be responsible if it does not perferm, as represented in this Circular.

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty-three inches long. Trunk has ten-inch rake crank and seven rakes, is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their

is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out of their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack filteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in creaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstance, it will thresh from forty to fitty bushels per hour, and with more ease and agreeableness ot hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; is intended to apply to any common lever or railway power; weighe 1,300 pounds; has an iron threshen frame, and cylinder, 12½ inches in diameter and 28 inches long; delivers the clean grain in bags, orafr desired, in a half bushel. It delivers the straw fifteen feet from the needer, or if desired, can deliver the straw and chalf together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or s... horses, and the same number of hands; but to force the work, under most favorable circumstances, good g. am, &c., will thresh and cleal considerably more. The Machine will threah and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two horse railway power

Shop Prices of Machines range from \$210, to \$525. warrant the machines to be as above represented; also against any reasonable defects of materi

Having now taken a room to keep Repair Castings on hand, I have also selected and am-prepared to furnish a variety of other egricultural implements, the latest and best improved, and such as are best adapted to the wants of the farmers of this part of the country: Such as the Hagerstown (Miller's) Clover Stemmer, Huller and Cleaner, which is proving by its own merits to be one of the best machines of the kind now in use. The latest improved BUCKEYE REAPER AND MOW-ER combined, with Dropper, and the Mower alone. The American Hay Fork and Knife combined, Hay Rakes, Fodder Cutters, Cider Mills, &c. &c. &c., which I will furnish on short notice and warrant Hay Rakes, Fodder Cutters, Cider Mins, &c. &c. &c.,
them to answer the purposes for which they are intended.

To Orders solicited and promptly attended to. For further particulars, circulars, &c. address

IDANIELL GEORGES,
