CELEBRATED BASE BURNING STOVE THE MORNING GLORY!

The Morning Glory is a perpetual burner, having a magazine or reservoir for reserve coal, which is re-filled but once a day, and if the proper sized coal is used it is not necessary to re-ignite the fire during the entire winter. (No clinker will remain in these stoves, nor will there be any trouble from slate, or other impurities in the coal, the fire being always at the base of the stove, the impurities are left in the ashes and ground out by the "Mill-grate.")

THERE'S NO ESCAPE OF GAS OR DUST ECONOMY OF FUEL!

The combustion of fuel being perfect and at a high temperature, the amount of heat produced from the same quantity of coal is much greater than at a low temperature, hence but a small quantity of fuel is necessary to be undergoing the process of combustion at one time. The entire outer surface of the Morning Glory is radiating surface. Add to this the surface of objects heated by rays of light through the mica windows, and you have the secret of the great heating properties of the Morning Glory with a small amount of fuel.

FAMILY GROCERY!

RESTORING THE SIGHT OF THE AGED, STRENGTHENING THE WEAK AND PRESERVING THE PERFECT SIGHT.

The Concave-convex, Crystal SPECTACLES introduced through me a short time since, have proved superior to any other Glasses in use. Hundreds of persons who have tried them, will testify to their superiority over the old ones in use.

The Concave-convex Glasses are ground from pure crystal in such a manner that the focus is distributed over the entire surface. They therefore afford a clear and distinct vision to the eye, in whatever direction it may be turned, whereas the old double convex Glasses require a direct sight through their centers.

THE CONCAVE-CONVEX GLASSES are patterned after the shape of the cornea of the human eye; they give a clear and healthy light to the eye, and prevent it from becoming tired or dim. Whether used by daylight or lamplight, they never leave that unpleasant feeling in the eyes, which is so common from the use of the old style Glasses.—Persons who suffer from reading or sewing and find their eyes growing dim and smarting, are advised to try these new and improved

CONCAVE-CONVEX GLASSES. They can be used a long time before changing to a higher power.

Also constantly on hand SPECTACLES to suit all other deficiencies of the sight, such as near-sightedness, weakness, inflammation, cataract, &c. Every pair of Spectacles being adjusted by an Optician which gives the exact power of the eye, is warranted to suit.

NEW GLASSES SET IN OLD FRAMES AT SHORT NOTICE.
