Improved Thrashing Machine!

Farmers will please look at the great advantae in Thrashing

## GEISERS' PATENT SBLP-REGULATING GRAIN SEPARATOR

CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt.

This Machine is conveniently arranged for hadling and threshing, being permanently fixed on two wheels: One man can easily move or shift it about, so that it is not half trouble in a barn floor as ac common thrasher and shaker. It is also easily put in operation. It is simple, easily managed, climble, durable, compact and cleanly to work by when in operation, not making near the dust as the common-

Farmers can rest assured that this machine is no humburg, and judging from the high recommendation of farmers that are using them, I must come to the conclusion that it is the very Machine that far-mers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perferin,

which I nope they will give me an opportunity, as I am willing to be responsible if it does not perferin, as represented in this Circular.

No. I is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty-three inches long. Trunk has ten inch rake crank and seven rakes, it thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack lifteen to eighteen feet high, and can be easily managed to corry the chaft with the atoms of delivers. tops, and deliver it in the stacker, which will deliver noon thirty-live test beyond the stack, on a stack in the end of the chart with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chall, remedies all difficulties in cleaning grain against windy weather. It begs the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to lorly bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstance, it will thresh from forty to titly bushels per hour, and with more ease and agreeableness

ot hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; is intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron thresher frame, and cylinder, 124 inches in diameter and 28 inches long; delivers the clean grain in bags, orali desired, in a half bushel. It delivers the straw lifteen feet from the recder, or if desired, can deliver the straw and chaif together; will thresh and clean, in good grain, ready tor market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good g. an, &c., will thresh and cleaf considerably more. The Machine will threah and clean all kinds of gram generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power

Shop Prices of Machines range from \$210, to \$525. 13 I warrant the machines to be as above represented; also against any reasonable defects of materi

am prepared to furnish a variety of other agricultural implements, the latest and best improved, and such as are best adapted to the wants of the farmers of this part of the country: Such as the Hagers town (Miller's) Clover Stemmer, Huller and Cleaner, which is proving by its own merits to be one of the best machines of the kind now in use. The latest improved BUCKEYE REAPER AND MOWER Combined, with Dropper, and the Mower alone. The American Hay Fork and Knife combined, May Kakes, Fodder Cutters, Cider Mills, &c. &c. &c., which I will furnish on short notice and warrant them to answer the purposes for which they are intended.

\*\*Dropper\*\* Contents of the Walles of the Mills of the Particulars, &c. address of the Mills of the Mill

PRADLEY'S late style Hoop Ski its at Paice & Horricei's

HE quantity of butter made in this country is too small. It can be increased 10.000 pounds by the use of Nixon's Horse and Cattle Powders.

Read these certificates, hundreds of which

Four or five years age, J.S. NIXON compound ed a Horse and Cattle Powder, and asked me to try it. I was the first farmer to whom it was given

MR. J. S. Nixon.—To the multitude in this portion of our State, who have used your Cattle Powder, no commendation is necessary. Its beneficial effects have been fainly tested, and hence its unbounded popularity. I have used it for my horses and cows for several years past, and cannot afford to do without it. It keeps all kind of cattle in good condition, loosens the skin, smoothes the hair, and sharpens their appetites. As a preventive from disease, I regard it as invaluable. Yours, &c., REV. B. S. SCHNECK. Chambersburg, April, 1866.

Mr. J. S. Nixon - Dear Sir :- I gave your Horse and Cuttle Powder a fair trial with all my stocke Horses and cattle, and it improved them wonderfully. It speedly increased the richness of the milk of my cows, and improved the condition of my stock

stock, and it should be kept in every stable.
