**CELEBRATED BASE BURNING STOVE
THE MORNING GLORY!**

The Morning Glory is a perpetual burner, having
a magazine or reservoir for reserve coal, which is re-
quired to be filled but once a day, and if the proper
size coal is used it is not necessary to rekindle
the fire during the entire winter.
(No chinker will remain in these stoves, nor will
there be any trouble from state, or other impurities
in the coal, the fire being always at the base of the
coal, the impurities are left in the ashes and ground
out by the "Mill-grate.")
**THERE'S NO ESCAPE OF GAS OR DUST
ECONOMY OF FUEL!**
The combustion of fuel being perfect and at a
high temperature, the amount of heat produced
from the same quantity of coal is much greater
than at a low temperature, hence but a small quan-
tity of fuel is necessary to be undergoing the pro-
cess of combustion at one time. The entire outer
surface of the Morning Glory is radiating surface.
Add to this the surface of objects heated by rays
of light through the mica windows, and you have
the secret of the great heating properties of the
Morning Glory with a small amount of fuel.

**A NEW AND IMPORTANT DISCOV-
ERY FOR**
Restoring the Sight of the Aged,
STRENGTHENING THE WEAK, AND PRE-
SERVING THE PERFECT SIGHT.

The Concave-convex, Crystal SPECTACLES
inroduced through me a short time since, have pro-
ved superior to any other Glasses in use. Hundreds
of persons who have tried them, will testify to their
superiority over the old ones in use.
The Concave convex Glasses are ground from
pure crystal in such a manner that the focus is dis-
tributed over the entire surface! They therefore af-
ford a clear and distinct vision to the eye, in what-
ever direction it may be turned, whereas the old
double convex glasses require a direct sight through
their centres.

THE CONCAVE-CONVEX GLASSES
are patterned after the shape of the cornea of the
human eye; they give a clear and healthy light to
the eye, and prevent it from becoming tired or dim.
Whether used by daylight or lamplight, they never
leave that unpleasant feeling in the eyes, which is
so common from the use of the old style glasses.
Persons who after reading or sewing feel their eyes
growing dim and smarting, are advised to try these
new and improved

CONCAVE-CONVEX GLASSES.
They can be used a long time before changing to a
higher power.
Also constantly on hand SPECTACLES to suit
all other deficiencies of the sight, such as near-sight-
edness, weakness, inflammation, cataract, &c. Ev-
ery pair of Spectacles being adjusted by an Op-
tometer which gives the exact power of the eye, is
warranted to suit.
