

EMPIRE SHUTTLE MACHINE
PATENTED FEBRUARY 14, 1860
SALER ROOM, NO. 922 SCHENCK ST.
PHILADELPHIA.

This Machine is constructed on a new principle of mechanism, possessing many rare and valuable improvements, having been examined by the most prominent experts, and pronounced to be SIMPLY and PERFECTLY COMBINED.

The following are the principal objections urged against Sewing Machines:

- Excessive fatigue to the operator.
- Inability to get out of order.
- Time and loss of time in repairing.
- Difficulty to use in the case of material of any thickness or when in operation.

The Empire Sewing Machine is exempt from all these Objections.

It has a straight needle, perpendicular action, making a LOCK or SHUTTLE STITCH, which will not unravel, and is alike on both sides; it has a perfect and every description of machine, suitable for all kinds of Sewing, from the coarsest to the finest, and in the most intricate work.

It has BUNDS, FRAMES, TUCKS, GATHERING, and all other kinds of Sewing, and will Sew on CURVED, and WHEEL, and any possible fabric, it runs as smooth as glass, and is ENTIRELY SELF-REGULATING MACHINE, and is a perfect and every description of Sewing Machine, from \$60 up to \$100.

Particular attention is called to our new and improved Sewing Machine, for Tailoring and Dressmaking, which runs as smoothly and as fast as the common Sewing Machine, and is especially adapted for Sewing on the most intricate and difficult work.

The Empire Sewing Machine is guaranteed.

A NEW AND IMPORTANT DISCOVERY FOR STRONGENING THE WEAK, AND PRESERVING THE PERFECT SIGHT.

The Concave-convex Crystal SPECTACLES (introduced a short time since, have proved superior to any other Glasses in use. Hundreds of persons who have used them, will testify to their superiority over the old ones in use.

The Concave-convex Glasses are ground from pure crystal in such a manner that the focus is distributed over the entire surface. They therefore do not create any undue strain on the eye, in whatever direction it may be turned, whereas the old double convex Glasses require a direct sight through their centres.

THE CONCAVE-CONVEX GLASSES are patterned after the shape of the cornea of the human eye; they give a clear and healthy light to the eye, and prevent it from becoming tired or dim.

Whether used by daylight or night, they never leave that unpleasant feeling in the eyes, which is so common from the use of the old style Glasses. Persons who are reading or sewing feel their eyes growing dim and smarting, are advised to try these new and improved

CONCAVE-CONVEX GLASSES.

They can be used a long time before changing to a higher power.

Also constantly on hand SPECTACLES to suit all the various degrees of the sight, such as near-sight, farsight, weakens, inflammation, &c. &c. Every pair of Spectacles being adjusted by an Optician which gives the exact power of the eye, its warranty is to suit.

NEW GLASSES SET IN OLD FRAMES AT SHORT NOTICE.

Improved Threshing Machine!

Farmers will please look at the great advantage in Threshing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt.

This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floor as a common thrasher and shaker. It is also easily put in operation. It is simple, easily managed, durable, compact and cleanly to work by wind in operation, not making near the dust as the common machine or other Separators.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendations of farmers that are using them, I must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perform as represented in this Circular.

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten chaff rake and seven rakes, is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it to the chaff, which will deliver about thirty-five feet beyond the feeder, or deliver it fifteen to eighteen feet high, and can be easily managed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain in reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to handle than any other machine now in common use.

No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; it is intended to apply to any common level or railway power; weighs 1,300 pounds; has an iron thresher frame, and cylinder, 12 1/2 inches in diameter and 48 inches long; delivers the clean grain in bags, or chaff desired, in a ball basket. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 125 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Shop Prices of Machines range from \$210, to \$525.

I warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

Having now taken a room to keep Repair Castings on hand, I have also selected and am prepared to furnish a variety of other agricultural implements; the latest and best improved, and such as are best adapted to the wants of the farmers of this part of the country: Such as the Hagerstown (Miller) Clover Stemmer, Hauler and Cleaner, which is proving by its own merits to be one of the best machines of the kind now in use. The latest improved BUCKEYE REAPER AND MOWER, with the Hammer, Hay Fork and Knife combined, Hay Rakes, Fodder Cutters, and at prices that cannot fail to please all. I will furnish on short notice and warrant them to answer the purposes for which they are intended.

10,000 POUNDS OF BUTTE R!

THE quantity of butter made in this country is too small. It can be increased 10,000 pounds by the use of **NIXON'S Horse and Cattle Powders** Good for all diseases of Horses, Cattle, Sheep and Hogs. Sold by

J. F. KURTZ,
Waynesboro',

Read these certificates, hundreds of which could be published:

Four or five years ago, J. S. NIXON compounded a Horse and Cattle Powder, and asked me to try it. I was the first farmer to whom it was given and the first one to use it for stock. I found it fully equal to what Mr. Nixon said of it; and I have used it extensively since, and heartily recommend it to farmers as a sure thing in fattening stock of a kind and a capital Powder for Horses.

MICHAEL EBERSOLE,
Chambersburg, December, 1866.

Mr. J. S. Nixon.—To this multitude in this portion of our State, who have used your Cattle Powders no commendation is necessary. Its beneficial effects have been fairly tested, and hence its unbounded popularity. I have used it for my horses and cows for several years past, and cannot afford to do without it. It keeps all kind of cattle in good condition, loosens the skin, smoothes the hair, and sharpens their appetites. As a preventive of disease, I regard it as invaluable. Yours, &c.,

REV. B. S. SCHNECK,
Chambersburg, April, 1866.

Mr. J. S. Nixon.—Dear Sir—I gave your Horse and Cattle Powder a fair trial with all my stock Horses and cattle, and it improved them wonderfully. It speedily increased the richness of the milk of my cows, and improved the condition of my stock greatly.

I can cordially recommend it as the best thing of the kind I have ever known or tried, for all kinds of stock, and it should be kept in every stable.

Yours truly,

A. K. McCLURE, Ed. Repository.
