

EMPIRE SHUTTLE MACHINE.

PATENTED FEBRUARY 14, 1880

33 ALDERMAN, NO. 021 SCHENK ST., PHILADELPHIA.

This Machine is constructed on a new principle of mechanism, possessing many rare and valuable improvements, having been examined by the most prominent experts, and pronounced to be SIMPLIFIED and PERFECTION COMBINED.

The following are the principal objections urged against Sewing Machines:

1. Excessive fatigue to the operator.
2. Liability to get out of order.
3. Expense, trouble, and loss of time in repairing.
4. Inconspicuity to every description of material.
5. Disagreeable noise while in operation.

The Empire Sewing Machine is exempt from all these objections.

It has a straight needle, perpendicular action, makes the LOCK or SHUTTLE STITCH, which will perform the RIP or RAVEL, and is alike on both sides, performs perfect sewing on every description of material, from the finest Nainsook Muslin, to the thickest cotton or silk thread, from the coarsest to the finest number.

IT SEWS BELLS, BINDS, BRAIDS, TUCKS, QUILTS, PILLOW CASES, GATHERERS.

Having neither CAM nor COG WHEEL, and the least possible friction, it runs as smooth as glass and is

EMPHATICALLY A NOISELESS MACHINE.

It is superior to all other machines from \$60 up to \$150.

Particular attention is called to our new and improved Manufacturing Machine, for Tailoring, Shoe-Fitting, Coach Trimming, &c. Its advantages are simplicity, durability, rapidity, easy adaptation to all varieties of work, and its perfect work on all material. It is especially desirable in sewing Patent Leather, and is very stiff. In short, it is the most perfect manufacturing machine in the market.

N. B. Every machine guaranteed.

NEW AND IMPORTANT DISCOVERY FOR STRENGTHENING THE WEAK, AND PRESERVING THE PERFECT SIGHT.

The Concave-convex, Crystal SPECTACLES introduced through me a short time since, have proved superior to any other Glasses in use. Hundreds of persons who have tried them, will testify to their superiority over the old ones in use.

The Concave-convex Glasses are ground from pure crystal in such a manner that the focus is distributed over the entire surface. They therefore afford a clear and distinct vision to the eye, in whatever direction it may be turned, whereas the old double-convex glasses require a direct sight through their centers.

THE CONCAVE-CONVEX GLASSES

are patterned after the shape of the corner of the human eye; they give a clear and healthy light to the eye, and prevent it from becoming tired or dim. Whether used by daylight or lamplight, they never leave that unpleasant feeling, the eyes, which is so common from the use of the old style Glasses.

Persons who after reading or sewing feel their eyes growing dim and smarting, are advised to try these new and improved CONCAVE-CONVEX GLASSES.

They can be used a long time before changing to a larger power.

Also constantly on hand SPECTACLES to suit all other deficiencies of the sight, such as near-sightedness, weakness, inflammation, cataract, &c. Every pair of Spectacles being adjusted by an Optician which gives the exact power of the eye, is warranted to suit.

NEW GLASSES SET IN OLD FRAMES AT SHORT NOTICE.

Improved Threshing Machine!

Farmers will please look at the great advantage in Threshing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple-Gear Horse Power, driven either by Gear or Belt.

This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily shove or shift it about, so that it is not half trouble in a barn floor as the common thrasher and shaker. It is also easily put in operation. It is simple, easily managed, reliable, durable, compact and cleanly to work by when in operation, not making near the dust as the common machine or other Separators.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, I must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perform, as represented in this Circular.

No. 1 is a eight-horse power, with cast iron threshing frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty-three inches long. Trunk has ten rake crank and seven rakes, is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it in the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen or eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to the horses than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; is intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter and 28 inches long; delivers the clean grain in bags, or directly into a cart or wagon. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats, per day, using four or six horses, and the same number of hands; but to force the work under favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Shop Prices of Machines range from \$210, to \$525.

Shop Prices of Machines range from \$210, to \$525.

Still the Latest, AND Most Important to Mankind,

Is that I have removed my Merchant Tailoring and Furnishing Store from my old stand, one door west of the extensive Hat and Fur Store of Upland & Son, to the new building in the Washington House, one door east of Mr. Oailey's Store, where I have now installed one of the best selected stocks of

English, French, German and Domestic CLOTHS, CASSIMERES, &c., that can be found in the city of Hagerstown or County. These goods have all been selected with great care, especially adapted to the Fashionable as well as the Plain Dress, and at prices that cannot fail to please all. All thoroughly shrank before made up and satisfaction guaranteed. I have also a stock of

HEAVY COTTON GOOD FOR MEN AND BOYS' WEAR, OF THE BEST MAKE.

Linen Ducks and Plain Linens, and a full stock Plain and Mixed Cassimeres or Boys' Wear, and as cheap as can be sold in the town or county, will be made to order or sold by the yard or pattern to suit buyers.

All work guaranteed to fit or no sale. My stock of Genl's Furnishing Goods is large and complete of everything in that line, and at prices to suit the times.

I have also the Agency for the sale of the celebrated improved

Singer Family Sewing Machine, and am prepared to compete with every other Machine sold in the town or county, and for sample of Machines please call at my store.

I return my thanks to my customers and the public generally for their patronage extended me and hope a continuance of the same.

Don't forget—The place is the Washington House Merchant Tailoring Establishment, West Washington Street, Hagerstown, Md. J. A. FISHER, May 3, 1867.

10,000 POUNDS OF BUTTER!

THE quantity of butter made in this country is too small. It can be increased 10,000 pounds by the use of Nixon's Horse and Cattle Powder and for all diseases of Horses, Cattle, Sheep and Hogs. Sold by J. F. KURTZ, Waynesboro'.
Read these certificates, hundreds of which could be published.
Four or five years ago, J. S. NIXON compounded a Horse and Cattle Powder, and asked me to try it. I was the first farmer to whom it was given and the first one to use it for stock. I found it full weight equal to what Mr. Nixon said of it, and I have used it extensively since, and heartily recommend it to farmers as a sure thing in fattening stock of various kinds and a capital Powder for Horses.

CHAMBERSBURG, DECEMBER, 1865.
MICHAEL EBERSOLE.

Mr. J. S. Nixon.—To the multitude in this portion of our State, who have used your Cattle Powder, no commendation is necessary. Its beneficial effects have been fairly tested, and hence its unbounded popularity. I have used it for my horses and cows for several years past, and cannot afford to do without it. It keeps all kind of cattle in good condition, loosens the skin, smoothes the hair, and sharpens their appetites. As a preventive from disease, I regard it as invaluable. Yours, &c.,
