FEBRUARY 14, 1869

UNILADELPHIA.

This Machina's constructed on a new principle of may become possessing many rare and valuable improvements, having been examined by the most proother Sports, and prondunced to be SIMPLICI-

The Osoveris are the principal objections arged agency bearing the Machines:

1. Excessive fatigue to the operator.

2. Liability to get out of order.
3. Expense, trouble, and loss of time in repairing.

4. Incapacity to sew every description of material. 5. Disagreeable noise while in operation.

The Empire Sewing Machine is Exempt from all

these Objections.

It has a straight accede, perpendicular action, makes the BOCK or SHFTTLE STITCH, which will heister RIP nor RAVEL, and is alike on both sides; performs perfect sewing on every description of ma-terial, from Leather to the first Nansook Muslin, with linen cotton or silk thread, from the coarsest o the finest number.

IT REMS, FELLS, BINDS, BRAIDS, TUCKS, QUILTS, PLATTS, GATHERS.
Having nepher CAM nor COG WHEEL, and the least possible metion, it runs as smooth as glass,

EMPHATICALLY A NOISELESS MACHINE-All varieties of Cainber Machines from \$60 up-

Particular attention is called to or New and Mathematical Machine, for Tailoring, Shoe-Fitting, Coach I imming, &c., I advantages are simplicity durability, repictly, easy adaptation to all franches of manufacturing. It makes perfect work on all material. It is especially desirable macking Patent Leather, and is very still. In public generally with all kinds of goods in our line with the most perfect manufacturing machine.

N. B. Every machine guaranteed.

NEW AND IMPORTANT DISCOV ERY FOR

Restoring the Sight of the Aged, STRENGTHENING THE WEAK, AND PRE- Furniture or Coffins attended to with dispatch .-

SERVING THE PERFECT SIGHT. The Concave-convex, Cristal SPECTACLES introluced trough me a short time since, have proved superior to any other Glasses in use. Hundreds of persons who have tried them, will testify to their

superiority over the old ones in use.

The Concave convex Glasses are ground from pure crystal in such a manner that the focus is disributed over the entire surface! They therefore af ford a clear and distinct vision to the eye, in whatever direction it may be turned, whereas the old double convex g'asses require a direct sight through

their centres. THE CONCAVE-CONVEX GLASSES are patterned after the shape of the cornea of the numan eye; they give a clear and healthy light to and the Laterprise of thi adelphia, Home of New York and the Cumberland Valley Multial of Cumberland which is the eye, and prevent it from becoming tired or dim. Whether used by daylight or lamplight, they never have that nonleasant feeling in the eyes, which is

leave that unpleasant feeling in the eves, which is so common from the use of the old style Glasses .-Persons who after reading or sewing feel their eyes growing dun and smurting, are advised to try these CONCAVE-CONVEX GLASSES.

They can be used a long time before changing to a

higher power.
Also constantly on hand SPECTACLES to suit all other deficiencies of the sight, such as near-sight edness, weakness, inflamation, cataract, &c Every pair of Spectacks being adjusted by an Optonctor which gives the exact power of the eye, is warranted to suit.

NEW GLASSES SET IN OLD FRAMES AT SHORT NOTICE.

Improved Thrashing Machine!

Farmers will please look at the great advantage in Thrashlug

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR

CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt.

This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floor as at common thrasher and shaker. It is also easily put in operation. It is simple, easily managed, cliable, durable, compact and cleanly to work by when in operation, not making near the dust as the common-

machine or other Separators Farmers can rest assured that this machine is no humbug, and judging from the high recommendaion of farmors that are using them, I must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perferin

as represented in this Circular.

No. I is a eight horse power, with east from thresher frame and wrought from and wood cylinder, sixteen inches in diameter and thirty-three inches long. Trank has ten inch rake crank and seven rakes, is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack filten to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in creating grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its carreity, under achiever these, is from twenty to forty bushficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable reamstance, it will thresh from forty to titly bushels per hour, and with more case and agreeablenes to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; is intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshen frame, and cylinder, 123 inches in diameter and 28 inches long; delivers the clean grain in bags, orafr desired, in a half bushel. It delivers the straw fifteen feet from the reeder, or if desired, can deliver the straw and chalf together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels nofwheat, or from 300 to 500 bushels of oats per day, using four or sin horses, and the same number of the plant to force the market that the first the market is a first the market and all the same number of the same for the same number of the same for the same number of the same for the same number of the sa dhas; but to force the work, under most favorable circumstances, good gain, &c., will thresh and clean considerably more. The Machine will threah and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will

apply very well to a two-horse railway power Shop Prices of Machines range from \$210, to \$525. warrant the machines to be as above represented; also against any reasonable defects of materi

Maring now taken a room to keep Repair Castings on hand, I have also selected and am prepared to furnish a variety of other agricultural implements, the latest and best improved and such as are best adapted to the wants of the namers of this part of the country: Such as the Hagerstown Miller's) Clover Stemmer. Read these certificates, hundreds of whic

could be published:

Four or five years ago, J. S. NIXON comnounded a Horse and Cattle Powder, and asked me to
try it. I was the first former to whom it was a six-

try it I was the first farmer to whom it was given and the first one to use it torstock. I found it full y equal to what Mr Nixon said of it, and I has used itextensively since, and heartily recommendit to farmers as a sure thing in fattening stock of valueds and a capital Powder for Horses.

MICHAEL EBERSOLE.

Chambersburg, Deember

MR. J. S. Nixon.—To the multitude in this postion of our State, who have used your Cattle Powders no commendation is necessary. Its beneficial erl fects have been fairly tested, and hence its unboune ded popularity. I have used it for my horses au cows for several years past, and cannot afford to do without it. It keeps all kind of cattle in good condition, loosens the skin, smoothes the hair, and sharpens their appointes. As a preventive from discase, I regard it as invaluable. Yours, &c.,

REV. B. S. SCHNECK. Chambersburg, April, 1866.

MR. J. S. Nixon — Dear Sir :—I gave your Hors and Cattle Powder a fair trial with all my stock Horses and cattle, and it improved them wonderful ly. It speedily increased the richness of the milk of my cows, and improved the condition of my stock

I can cordially recommend it as the best thing of the kind I have ever known or tried, for all kinds of stock and it should be kept in every stable. Yours muly
