A NOTICE FOR ALL TO READ!

THE "MORNING GLORY!"

Is the Cheapest and the Best Base Burning Stove before the Public!

THE No. 9 M. G. sells at \$25, and is nearly 50 lbs. heavier than the No. 9 Oriental, and is larger than the No. 10 or No. 11, which sells at five to six dollars more than the No. 9 M. G. Again, the Morning Glory is the only stove that breaks up its ashes and passes them off with the ashes. This is done by means of its Mill Gate. This gate is not in any other stove, nor can any other stove use it. This mill gate is insured for five years, now, on the Oriental stove, when you must take out under your hand to open a door on top of the fire pot and with a peck rake turn up and pass them out through the door. Very few that provided some of the hot cinder falls on your nice carpet. "Oriental Book, page 3 says that you must take off your pipe during the season from the stove and remove the ashes &c., which have accumulated in the back flue." Another nice job in a nice room. Now, nothing of this kind have you to do in the Morning Glory.

W. A. TRITZLE is the only agent in Waynesboro' for the sale of the M. G. stove. He has sold since the 28th day of Sept. 50 of these stoves. The M. G. has taken since 1866 all first class Premiums over all other Base Burning stoves. Call and see the stove in operation and learn what the stove is for yourselves, then you can judge which is the best. Try one that in this exposure, I have done to injustice I leave it for the public to judge as to which of these stoves shall receive their patronage.

CELEBRATED BASE BURNING STOVE

THE MORNING GLORY!

The Morning Glory is a perpetual burner, having a magazine or reservoir for reserve coal, which is required to be filled but once a day, and if the proper sized coal is used it is not necessary to rekindle the fire during the entire winter. The entire outer surface of the Morning Glory is radiating surface. Add to this the surface of objects heated by rays of light through the mica windows, and you have the secret of the great heating properties of the Morning Glory with a small amount of fuel.

THERE'S NO ESCAPE OF GAS OR DUST ECONOMY OF FUEL!

The combustion of fuel being perfect and at a high temperature, the amount of heat produced from the same quantity of coal is much greater than at a low temperature, hence but a small quantity of fuel is necessary to be undergoing the process of combustion at one time. The entire outer surface of the Morning Glory is radiating surface. Add to this the surface of objects heated by rays of light through the mica windows, and you have the secret of the great heating properties of the Morning Glory with a small amount of fuel.

Also the best CUPPER PLUM in market, is a strong, simple durable and cheap, is insured not to freeze. Call and see it. All kinds of repairs done in Tin, Copper or Sheetiron. Don't fail to call as you will find a large stock of goods.
