This Miss and is constructed on a new principle of mechani-in, possessing many rare and valuable imto sevente, having been examined by the most pr but despends, and pronounced to be SIMPLICI-PY and PERFECTION COMBINED. The following are the principal objections urged

against Sewin; Machines:
1. Excessive fatigue to the operator.

2. Liability to get out of order.
3. Expense, trouble, and loss of time in repairing.
4. Incapacity to sew every description of material.

5. Disagreeable noise while in operation.

The Empire Sewing Machine is Exempt from all

these Objections. It has a straight needle, perpendicular action, mak-the LOCK or SHUTTLE STITCH, which will neither RIP nor RAVEL, and is glike on both sides; performs perfect sewing on every description of material, from Leether to the finest Nansook Muslin, with linen, cotton or silk thread, from the coarsest the finest number.

IT HEMS, FELLS, BINDS, BRAIDS, TUCKS, QUILTS, PLAITS, GATHERS.

Having neither CAM nor COG WHEEL, and the least possible friction, it runs as smooth as glass

A NEW AND IMPORTANT DISCOV-

Restoring the Sight of the Aged, STRENGTHENING THE WEAK, AND PRE-

SERVING THE PERFECT SIGHT. The Concave-convex, Crystal SPECTACLES introduced trough me a short time since, have pro-

ved superior to any other Glasses in use. Hundreds of persons who have tried them, will testify to their Superiority over the old ones in use.

The Concave convex Glasses are ground from pure crystal in such a manner that the focus is distributed over the entire surface! They therefore afford a clear and distinct vision to the eye, in whatever direction it may be turned, whereas the old

double convex glasses require a direct sight through their centres. THE CONCAVE-CONVEX GLASSES

are patterned after the shape of the cornea of the human eye; they give a clear and healthy light to the eye, and prevent it from becoming tired or dim. Whether used by daylight or lamplight, they never leave that unpleasant feeling in the eyes, which is so common from the use of the old style Glasses.— Persons who ofter reading or sewing feel their eyes growing dim and smarting, are advised to try these

CONCAVE-CONVEX GLASSES. They can be used a long time before changing to

Also Insurance on Horses, Mules, Cattle, and Steep, against, Theft, Death, or Accident, rapidly coming into general use by farmers and stock rais- all other deficiencies of the sight, such as near-sight Also constantly on hand SPECTACLES to suit Explanations and rates given and pamphle is furmeter which gives the exact power of the eye, is warranted to suit. P. WIESNER.

Improved Thrashing Machine!

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SBLF-RBGULATING GRAIN SBPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt.

This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floor as ac common thrasher and sheker. It is also easily put in operation. It is simple, easily managed, reliable, durable, compact and cleanly to work by when in operation, not making near the dust as the commonmachine or other Separators.

Farmers can rest assured that this machine is no humbug, and judging from the high recommenda-tion of farmers that are using them, I must come to the conclusion that it is the very Machine that far-mers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perferm,

which I hope they will give me an opportunity, as I am whing to be responsible if I does not personal as represented in this Circular.

No. I is a eight-horse power, with cast iron threster frame and wrought iron and wood cylinder, except teen inches in diameter and thirty-three inches long. Trunk has ten inch rake crank and seven rakes, is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw ove on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stackfifteen to eighteen feet high, and can be easily managed to carry the chaff with the scraw, or deliver it
in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against wirdy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to torty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstance, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the tarmer's use; in The No. 2 Machine, fully represented in the above cut, is particularly acapted to the lattice and the lattice intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshes frame, and cylinder, 12½ inches in diameter and 28 inches long; delivers the clean grain in bags, oraff desired, in a half bushel. It delivers the straw fifteen feet from the recder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels nofwheat, or from 300 to 500 bushels of oats per day, using four or s. horses, and the same number of dhas; but to force the work, under most favorable circumstances, good g. sin, &c., will thresh and clean considerably more. The Machine will threah and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will sold to

Shop Prices of Machines range from \$210, to \$525. I warrant the machines to be as above represented; also against any reasonable defects of materi workmanship, &c.

Having now taken a room to keep Repair Castings on hand, I have also selected and am prepared to furnish a variety of other agricultural implements, the latest and best improved, and such as are-best adapted to the wants of the farmers of this part of the country: Such as the Hagerstown (Miller's) Clover Stemmer, Huller and Cleaner, which is proving by its own merits to be one of the best machines of the kind now in use. The latest improved BUCKEYE REAPER AND MOW-ER combined, with Dropper, and the Mower alone. The American Hay Fork and Knife combined, Hay Rakes, Fodder Cutters, Cider Mills, &c. &c. &c., which I will furnish on short notice and warrant than the opening the propages for which they are intended.

them to answer the purposes for which they are intended.

Orders solicited and promptly attended to. For further particulars, circulars, &c. address DANIEL GEISER, Waynesboro', Franklin Co. Penn'a. May 4, 1866.]

THE undersigned would respectfully call the at tention of the Public to their stock of FURNITURE, embracing all articles of Furniture usually manufactured by cabinet makers. . We will also give our

COFFIN MAKING,

and hope by strict attention to business to merit a liberal share of public patronage. All orders for Furniture or Coffins attended to with dispatch.— Our Furniture Rooms can be found on Main Street, up stairs, in Willaims Flanegan's Drill Shop.
