Restoring the Sight of the Aged, Days materns and rates given and pamphlets fur. STRENGTHENING THE WEAK, AND PRE-SERVING THE PERFECT SIGHT.

The Concave-convex, Crystal SPECTACLES introduced trough me a short time since, have pro ved superior to any other Glasses in use Hundreds of persons who have tried them, will testify to their appriority over the old ones in use The Concave convex Glasses are ground from

oure crystal in such a manner that the focus is disributed over the entire surface! They therefore atrath week during the season, at the celler adjoin- lord a clear and distinct vision to the eye, in what ever direction it may be turned, whereas the old double convex g asses require a direct sight through then centres

THE CONCAVE-CONVEX GLASSES are patterned after the shape of the cornea of the human eye; they give a clear and healthy light to theeve, and prevent it from becoming fired or dini. Whether used by daylight or tamplight, they never leave that unpleasant feeling in the eyes, which is so common from the use of the old style Glasses .-Persons who after reading or sewing feel their eyes

growing dim and smarting, are advised to try these new and improved CONCAVE-CONVEX GLASSES.

They can be used a long time before changing to a higher power.
Also constantly on hand SPECTACLES to suit all other deficiencies of the sight, such as near-sight-edness, weakness, inflamation, cataract, &c Every pair of Spectaces being adjusted by an Optometer which gives the exact power of the eye, is warranted to suit. NEW GLASSES SET IN OLD FRAMES

THE BEST IN AMERICA!

# SEPARATOR AND CLEANER!

Patented April 12, 1864 and February 28, 1865.

Farmers can rest assured that this Machine is no humbug, and judging from the many high recom mendations of many farmers who are using them, we have come to the conclusion that it is the very Machine that every farmer wants and will have as soon as they have an opportunity to test its meris. One man, without any assistance, can feed, turn and shell Seventy five Bushels per day.

#### TELEPTEREDINA AND SE

The following is the report of the Judges on this Machine, at the great trial of Agricultural Implements, held at Auburn, N. Y., in July, 1866, under the auspices of the New York Agricultural Society:

"Among the Machines on Exhibition, was a Hand Corn Sheller, Separator and Cleaner, exhibited by Jacob Blinkerhoff, Auburn, N. Y. We have carefully examined and thoroughly tested this Machine, and have no hesitation in pronouncing it the best Corn Sheller we ever saw.—It-readily—adapts—itself to ears of any size and shape, shells clean, and with great rapidity and ease, and at the same operation separates the corn from the coh, and the chaff from the corn, and delivers the corn ready for market; and it requires but the labor of one person to operate it. The whole affair is simple in construction, and durable."

JOHN STANTON GOLD, Pres. N. Y State Ag'l Society. BENJAMIN P. JOHNSON, Soc'ry N. Y. State Ag'l Society. SOLON R DBINSON Ag'l New York Tribune. S EDWARDS TODD, Ag'l Editor New York Times.

Dated Auburn, N. Y., July, 1866.

[Copy of Letter from U. S. Agent for the Paris Universal Exposition.]

MR. J. Brinke norf— Dear Sir: My Advisory Committee, appointed to select implements for exhibition-at-the-Universal-Exposition, in-Paris, in-1867, have selected and recommended to me your Corn Sheller, as the bost in America—I have accepted their report, and will forward your Sheller, is delivered by a sharper of the parish for the parish for sharper of the parish for the p here, ready for shipment, on or before January 1, 1867. Yours truly."

J. C. DERBY, U. S. Agent, &c.

The undersigned having secured the right for Franklin County, Pa., and Miryland, a portion of the Territory will be sold on libert terms. Good and responsible agents wanted to sell the above Machine who will be supplied on application. Retail price of Machine \$25 00. For further information LIDY, LECRON & GILBERT.

Improved Thrashing Machine!

Farmers will please look at the great advantage in Thrashlug

## GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR.

CLEANER AND BAGGER. With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt

This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floores as common thrasher and shaker. It is also easily put in operation. It is simple, easily managed, ediable,

durable, compact and cleanly to work by when in operation, not making near the dust as the common Farmers can rest assured that this machine is no humbur, and judging from the high recommendaion of farmers that are using them, I must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perferm,

is represented in this Circular. No. I is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, six con inches in diameter and thirty-three inches long. Trunk has ten-inch rake crank and seven rakes s thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies a lidifficulties in occaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushe els per hour, using eight horses and the same number of hands; but to force the work under favorabl-

circumstance, it will thresh from forty to fifty bushels per hour, and with more case and agreeableness to hands than any other machine now in common use. The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshes frame, and cylinder, 12½ inches in diameter and 48 inches long; delivers the clean grain in bags, orafr lesired, mahalf bushel. It delivers the straw fifteen feet from the moder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels nofwheat, or from 300 to 500 busnels of oats per day, using four or s... horses, and the same number of dhas; but to force the work, under most favorable circumstances, good gain, &c., will thresh and clea n considerably more. The Machine will threah and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will

apply very well to a two-horse railway power Shop Prices of Machines range from \$210, to \$525. Wil warrant the machines to be as above represented; also against any reasonable defects of materi

Illaving now taken a room to keep Repair Castings on hand, I have also selected and am prepared to furnish a variety of other agricultural implements, the latest and best improved, and such as are best adapted to the wants of the larmers of this part of the country: Such as the Hagerstown (Miller's) Clover Stemmer, Huller and Cleaner, which is proving by its own merits to be one of the best machines of the kind now in use. The latest improved BUCKEYE RE PER AND MOW-ER combined, with Dropper, and the Mower alone. The American May Fork and Knife combined, Hoy Rakes, Fodder Cutters, Cider Mins, etc. 45. 50, them to answer the purposes for which they are intended.

For further particulars, circulars, &c. address

DANIEL GEISER, Hay Rakes, Fodder Cutters, Cider Mills, &c. &c. &c., which I will furnish on short notice and warrant

### 10.000 POUNDS OF BUTTER! W. W. WALESE. T. J. MILL. SEC. W. WALEER

THE quantity of butter made in this country is too small. It can be increased 10.000 pounds by the use of Nixon's Horse and Cattle Powders Good for all diseases of Herses Cattle, Sheep and Hogs. Fold by Waynesboro Waynesboro

Read these certificates, hundreds of whice could be published: Four or five years ago, J. S. NIXON compounded a Horse and Cattle Powder, and asked me to try it. I was the first farmer to whom it was given and the first one to use it for stock. I found it full ly equal to what Mr. Nixon said of it, and I has used itextensively since, and heartily recommendait to farmers as a sure thing in fattening stock of vikinds and a capital Powder for Horses.

MICHAEL EBERSOLE: Chambersburg, Deember 1865,

Mr. J. S. Nixon.—To the multitude in this pos-tion of our State, who have used your Cattle Powders no commendation is necessary. Its beneficial erifects have been fairly tested, and hence its unboune ded popularity. I have used it for my horses au cows for several years past, and cannot afford to do without it. It keeps all kind of cattle in good condition, loosens the skin, smoothes the hair, and sharpens their appetites. As a prefentive from disease, I regard it as invaluable. Yours, &c.,

YEV. B. S. SCHNECK. Chambersburg, April, 1866.

Mr. J. S. Nixon — Dear Sir :—I gave your Hors and Cattle Powder a fair trial with all my stock Horses and cattle, and it improved them wonderfuly. It speedily increased the richness of the milk of my cows, and improved the condition of my stock

I can cordially recommend it as the hest thing of the kind I have ever known or tried, for all kinds of stock, and it should be kept in every stable.

Yours truly, A. K. McCLURE, Ed. Repository.
