DR. JOHN A. HATTON, [From the Philadelphia Dental College. DENTIST. GREENCASTLE, PA. Nitrous Oxide Gas used to EXTRACT TEETH WITHOUT PAIN.

EXTRACT TEETH WITHOUT PAIN. Of whom patients desire to be well and use the EARLY EXTRACTOR or ease of Freezing the Gums.

EMPIRE SEWING MACHINE. PATENTED FEBRUARY 14, 1865. SALEROOM, NO. 921 CHESTNUT ST., PHILADELPHIA.

This Machine is constructed on a new principle of mechanism, possessing many rare and valuable improvements, having been examined by the most prominent experts, and pronounced to be the SIMPLEST, BEST and PERFECTLY COMBINED.

The following are the principal objections urged against Sewing Machines: 1. Excessive friction to the operator. 2. Indolence, get-out-of-order. 3. Expense of time and loss of time in repairing. 4. Inability to sew over nap or upon material. 5. Inability to sew white or other fine material.

The Empire Sewing Machine is exempt from all these objections. It is a simple, durable, and easy to use machine, with many improvements over other models.

EMPIRE S. M. CO., 921 Chestnut Street, Philadelphia. Agents wanted in every State and Territory. Mar. 1-21mo.

VALUABLE IMPROVEMENT! THE subscribers would inform the public that they have purchased the right of the Key-stone Portable Field and Flood Fence, patented April 30, 1867, from whom individuals or Townships might be obtained at reasonable rates.

ALEX. HAMILTON. Sep. 20-1f

THE BEST IN AMERICA!

THE BRINKERHOFF CORN SHELLER, SEPARATOR AND CLEANER!

Farmers can rest assured that this Machine is no humbug, and judging from the many high recommendations of many farmers who are using them, we have come to the conclusion that it is the very machine that every farmer wants and will have as soon as they have an opportunity to test its merits. One man, without any assistance, can feed, turn and shell seventy-five Bushels per day.

Patented April 12, 1864 and February 28, 1865.

TESTIMONIALS. The following is the report of the Judges on this Machine, at the great trial of Agricultural Implements, held at Auburn, N. Y., in July, 1866, under the auspices of the New York Agricultural Society.

"Among the Machines on Exhibition was a Hand Corn Sheller, Separator and Cleaner, exhibited by Jacob Brinkerhoff, Auburn, N. Y. We have carefully examined and thoroughly tested this Machine, and have no hesitation in pronouncing it the best Corn Sheller we ever saw. It readily adapts itself to any size and shape, shells clean, and with great rapidity and ease, and at the same operation separates the corn from the cob, and delivers the corn ready for market; and requires but the labor of one person to operate it. The whole affair is simple in construction, and durable."

JOHN STANTON GOLD, Pres N. Y. State Ag'l Society. BENJAMIN P. JOHNSON, Sec'y N. Y. State Ag'l Society. SOLON ROBINSON, Ag'l New York Tribune. EDWARDS TODD, Ag'l Editor New York Times.

Dated Auburn, N. Y., July, 1866. [Copy of Letter from U. S. Agent for the Paris Universal Exposition.] "Mr. J. Brinkerhoff—Dear Sir: My Advisory Committee, appointed to select implements for exhibition at the Universal Exposition, in Paris, in 1867, have selected and recommended to me your Corn Sheller, as the best in America. I have accepted their report, and will forward your letter, if delivered, ready for shipment on or before January 1, 1867. Yours truly, J. C. DERBY, U. S. Agent, &c."

"The undersigned having secured the right for Franklin County, Pa., and Maryland, a portion of the Territory will be sold on liberal terms. Good and responsible agents wanted to sell the above Machine who will be supplied on application. Retail price of Machine \$25 00. For further information address LIDY, LECRON & GILBERT, Grain Shellers, Washing Machines, Straw Cutters, &c., and are prepared to do all kinds of REPAIRING at short notice and in a workmanlike manner. Nov. 29, 1867. LIDY & LECRON."

Improved Threshing Machine! Farmers will please look at the great advantage in Threshing Grain with GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt. This Machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble to a barn floor as a common thrasher and shaker. It is also easily put in operation. It is simple, easily managed, reliable, durable, compact and cleanly to work by when in operation, not making near the dust as the common durable or other separators.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendations of farmers that are using them, I must come to the conclusion that it is the very machine that every farmer wants and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perform, as I presented in this Circular.

No. 1 is a eight-horse power, with cast iron threshing frame and wrought iron and wood cylinder, six feet inches in diameter and thirty three inches long. It delivers the clean grain in bags, or in a half bushel. It delivers the straw fifteen feet from the feeder, or it can be delivered in a separate place. The trunk and fan sides being close, it confines the straw and chaff, remedies all difficulties in cleaning grain against any weather. It bags the grain in reasonable management, and is clean for market, and its capacity, under ordinary circumstances, is from twenty to thirty bushels per hour, using eight horses or, in the same number of hours; but to force the work under favorable circumstances, it will thresh from thirty to fifty bushels per hour, and with more ease and agreeableness than any other machine now in common use.

No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; it is intended to apply to any common sort of railway power, weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter, a 3/4 inch long; delivers the clean grain in bags, or in a half bushel. It delivers the straw fifteen feet from the feeder, or it can be delivered in a separate place. The trunk and fan sides being close, it confines the straw and chaff, remedies all difficulties in cleaning grain against any weather. It bags the grain in reasonable management, and is clean for market, and its capacity, under ordinary circumstances, is from twenty to thirty bushels per hour, using eight horses or, in the same number of hours; but to force the work under favorable circumstances, it will thresh from thirty to fifty bushels per hour, and with more ease and agreeableness than any other machine now in common use.

No. 3 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; it is intended to apply to any common sort of railway power, weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter, a 3/4 inch long; delivers the clean grain in bags, or in a half bushel. It delivers the straw fifteen feet from the feeder, or it can be delivered in a separate place. The trunk and fan sides being close, it confines the straw and chaff, remedies all difficulties in cleaning grain against any weather. It bags the grain in reasonable management, and is clean for market, and its capacity, under ordinary circumstances, is from twenty to thirty bushels per hour, using eight horses or, in the same number of hours; but to force the work under favorable circumstances, it will thresh from thirty to fifty bushels per hour, and with more ease and agreeableness than any other machine now in common use.

Shop Prices of Machines range from \$210, to \$525. I warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

Having now taken a room to keep Repair Castings on hand, I have also selected and prepared to furnish a variety of other agricultural implements, the most improved and adapted to the wants of the farmers of this part of the country. Such as the Hagerstown, Miller's Clover Steamer, Hatter and Cleaner, which is proving by its own merits to be one of the best machines of the kind now in use. The latest improved HUCKLEBERRY AND MOWER, with Dropper, and the Mower alone. The American Fork and Rake combined, Hay Rakes, Forder Cutters, Cider Mills, &c. &c., which I will furnish on short notice and warrant them to answer the purposes for which they are intended.

For further particulars, circulars, &c., address DANIEL GEISER, Waynesboro, Franklin Co. Penn'a. May 4, 1866.]

10,000 POUNDS OF BUTTER!

THE quantity of butter made in this country is too small. It can be increased 10,000 pounds by the use of Nixon's Horse and Cattle Feeders.

Four or five years ago, J. S. NIXON commenced a Horse and Cattle Powder, and asked me to try it. I was the first farmer to whom it was given and the first one to use it for stock. I found it fully equal to what Mr. Nixon said of it, and I have used it extensively since, and heartily recommend it to farmers as a sure thing in fattening stock of all kinds and a capital powder for Horses. MICHAEL EBERSOLE, Chambersburg, Decmber 1865.

Mr. J. S. Nixon—To the multitude in this portion of our State, who have used your Cattle Powder no commendation is necessary. Its beneficial effects have been fairly tested, and hence its unbounded popularity. I have used it for my horses and cows for several years past, and cannot afford to do without it. It keeps all kind of cattle in good condition, loosens the skin, smooths the hair, and sharpens their appetites. As a preventive from disease, I regard it as invaluable. Yours, &c., REV. H. S. SCHNECK, Chambersburg, Aprils, 1866.

Mr. J. S. Nixon—Dear Sir—I gave your Horse and Cattle Powder a fair trial with all my stock Horses and cattle, and it improved them wonderfully. It speedily increased the richness of the milk of my cows, and improved the condition of my stock generally. I can cordially recommend it as the best thing of the kind I have ever known or tried, for all kinds of stock, and it should be kept in every stable. Yours truly, A. K. McCLURE, Ed. Repository.

THE SURE CURE. ARMY ITCH, CAMP ITCH, BRIBER'S ITCH, RING WORM, TETTER, and a Skin diseases, certainly cured by NIXON'S Glycerine Ointment. Sold by J. K. KURTZ, Waynesboro.

Nixon's East India Tincture. The best medicine for Internal and External Pain. Perfectly safe under all circumstances. Every family should have it. If you have pains, use NIXON'S East India Tincture. If you have Skin diseases, use NIXON'S Glycerine Ointment. If you have horses or cattle that don't thrive, use NIXON'S Horse and Cattle Powder. Chambersburg, Feb. 8-1y
