

EMPIRE SEWING MACHINE

PATENTED FEBRUARY 14, 1860

W. WALKER, T. J. HILL, GEO. W. WALKER, WALKER, NILL & CO., SUCCESSORS TO A. H. HAGER, WHOLESALE AND RETAIL DEALERS IN STAPLE & FANCY GROCERIES, WINES AND LIQUORS, Glass, Queens, Wood and Willow Ware, LIME, CEMENT AND FERTILIZERS, HAGERSTOWN MD.

This Machine is constructed on a new principle of mechanism, possessing many rare and valuable improvements, having been examined by the most prominent experts, and pronounced to be SIMPLICITY and PERFECTION COMBINED.

- The following are the principal objections urged against Sewing Machines: 1. Excessive fatigue to the operator. 2. Inability to get out of order. 3. Expense, trouble, and loss of time in repairing. 4. Inability to sew every description of material. 5. Durable, and will run in operation.

The Empire Sewing Machine is Exempt from all these Objections:

- 1. It has a straight needle, perpendicular action, making LOCK or SHUTTLE STITCH, which will neither RIP nor RAVEL, and is alike on both sides; performs perfect sewing on every description of material, from leather to the finest Namok Muslin, with linen cotton or silk thread, from the coarsest to the finest number.

THESE FEELS, BINDS, BRANDS, TUCKS, GUILTS, PL. ITS, GATHERS, HAVING NOTER CAM FOR COG WHEEL, ESPECIALLY A NOISELESS MACHINE. All varieties of Sewing Machines from \$60 upwards.

Particular attention is called to the NEW and Improved Manufacturing Machine, for Tailoring, Shoe Making, Coach Trimming, &c. Its advantages are simplicity, durability, rapidity, and adaptation to all classes of manufacturing, producing perfect work on all material. It is especially desirable in sewing Patent Leather, and is very stiff. In short, it is the most perfect manufacturing machine in the market.

Every machine guaranteed. EMPIRE S. M. CO., 621 Chestnut Street, Philadelphia, Pa. Agents wanted for every State and Territory. Mar. 1. 1865.

VALUABLE IMPROVEMENT!

THE subscribers would inform the public that they have purchased the right of the Key-stone Portable Field and Road Fence, patented April 30, 1867, from the inventor of the same, and are prepared to sell at reasonable rates. This fence is recommended for strength and durability. It can be broken down and put under shelter and again taken out and put up with remarkable facility. It is cheap, to be the cheapest and most serviceable of all the portable fences yet offered to the public.

ADAMS & HAWKER, Aug. 9-11.

ALEX. HAMILTON, Sep. 20-1867

THE BEST IN AMERICA!

THE BRINKERHOFF

CORN SHELLER,

SEPARATOR AND CLEANER!

Patented April 12, 1864 and February 28, 1865.

Farmers can rest assured that this Machine is no humbug, and judging from the many high recom-

mendations of many farmers who are using them, we have come to the conclusion that it is the very

Machine that every farmer wants and will have as soon as they have an opportunity to test its merits.

One man without any assistance can feed, turn and shell Seventy five Bushels per day.

TESTIMONIALS.

The following is the report of the Judges on this Machine, at the great trial of Agricultural Imple-

ments, held at Auburn, N. Y., in July, 1866, under the auspices of the New York Agricultural Society:

"Among the Machines on Exhibition, was a Hand Corn Sheller, Separator and Cleaner, exhibited by

Jacob Brinkerhoff, Auburn, N. Y. We have carefully examined and thoroughly tested this Machine,

and have no hesitation in pronouncing it the best Corn Sheller we ever saw. It readily adapts itself to

corns of any size and shape, shells clean, and with great rapidity and ease, and at the same operation sepa-

rates the corn from the cob, and the chaff from the corn, and delivers the corn ready for market; and

it requires but the labor of one person to operate it. The whole affair is simple in construction, and durable.

JOHN STANTON GOLD, Pres. N. Y. State Ag'l Society.

BENJAMIN P. JOHNSON, Socy N. Y. State Ag'l Society.

SOLOMON ROBINSON, Ag'l New York Tribune.

EDWARD TODD, Ag'l Editor New York Times.

Dated Auburn, N. Y., July, 1866.

[Copy of Letter from U.S. Agent for the Paris Universal Exposition.]

"Mr. J. BRINKERHOFF - Dear Sir: My Advisory Committee, appointed to select implements for exhibi-

tion at the Universal Exposition in Paris, in 1867, have selected and recommended to me your Corn

Sheller, as the best in America. I have accepted their report, and will forward your Sheller, I delivered

you, ready for shipment on or before January 1, 1867. Yours truly,

J. D. DERRY, U.S. Agent, &c.

The undersigned having secured the right for Franklin County, Pa., and Maryland, a portion of

the Territory will be sold on liberal terms. Good and responsible agents wanted to sell the above Ma-

chine who will be supplied on application. Retail price of Machine \$25.00. For further information

address

LIDY, LECRON & GILBERT.

N. B. - We are also manufacturing GRAIN DRILLS, Corn Shellers, Washing Machines, Straw

Cutters, &c., and are prepared to do all kinds of REPAIRING at short notice and in a workmanlike

manner. Nov 29, 1867.

LIDY & LECRON.

Improved Thrashing Machine!

Farmers will please look at the great advantage in Thrashing

with

GEISERS' PATENT

SELF-REGULATING GRAIN SEPARATOR,

CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power,

driven either by Gear or Belt

This Machine is conveniently arranged for hauling and treading, being permanently fixed on two

wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floor as are

common thrashers and shakers. It is also easily put in operation. It is simple, easily managed, reliable

durable, compact and cleanly to work by when in operation, not making near the dust as the common

thrasher or other Separators.

Farmers can rest assured that this machine is no humbug, and judging from the high recom-

mendations of many farmers who are using them, I must come to the conclusion that it is the very

Machine that every farmer wants and will have an opportunity to appreciate and at last its merits, for

which I hope they will give me an opportunity, as I am willing to be responsible if it does not perform,

as is presented in this Circular.

No. 1 is a eight-horse power, with cast iron thrasher frame and wrought iron and wood cylinder, six

teeth, ten inches in diameter and thirty-three inches long. Trunk has ten-inch rake crank and seven rake-

teeth, thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their

own wheels, and deliver it to the chaff, which will deliver about thirty-five feet beyond the thrasher, on a stack

of fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it

in a separate place. The tank and fan sides being closed, to confine the straw and chaff, remedies all

difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, suf-

ficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels

per hour, using eight horses and the same number of hands; but to force the work under favorable

circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness

to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in

intended to apply to any common layer or railway power; weight 1,300 pounds; has an iron thrasher

frame and cylinder, 12 1/2 inches in diameter and 4 1/2 inches long; delivers the clean grain in bags, or in

desired, in a self-busher. It delivers the straw fifteen feet from the thrasher, or if desired, can deliver the

straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels

nowheat, or from 300 to 600 bushels of oats per day, using four or six horses, and the same number of

hands; but to force the work, under most favorable circumstances, good g. m. &c., will thresh and clean

considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the

common machine, and requires no more horse power, but in many cases does not run so hard. It will

apply very well to a two-horse railway power.

Shop Prices of Machines range from \$210, to \$525.

I warrant the machines to be as above represented; also against any reasonable defects of materi-

workmanship, &c.

Having now taken a room to keep Repair Castings on hand, I have also selected and

am prepared to furnish a variety of other agricultural implements, the latest and best improved, and

as well as the wants of the farmers of the part of the country: Such as the Hager-

stown Miller's Upper Stomper, Hauler and Cleaner, which is proving by its own merits to be one of

the best machines of the kind now in use. The latest improved BUCKEYE REAPER AND MOW-

ER combined, with Dropper, and the Mower alone. The American Jay Fork and Knife combined,

Hay Rakes, Foulder Cutters, Cider Mills, &c. &c. &c., which I will furnish on short notice and warrant

them to answer the purposes for which they are intended.

Orders solicited and promptly attended to. For further particulars, circulars, &c. address

DANIEL GEISER, Waynesboro, Franklin Co. Penn'a.

May 4, 1866.]

NEW LEATHER

FINDING STORE!
