Dec. 13, 1867. CHECK and plain Matting at the store of Amberson, Benedict & Co A NOTICE FOR ALL TO READ ! THE "MORNING GLORY!"

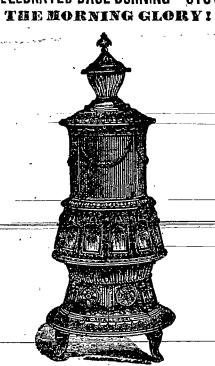

Is the Cheapest andthe Best Base Burning Stove beforethe Public! .

THE No. 9 M. G. sells at \$25, and is nearly \$60 lbs. heavier than the No. 9 Oriental, and is larger than the No. 10 or No. 11, which sells at five to six dollars more than the No. 9 M. G. Again, the morning Glory is the only stove that breaks up its cinderand passes them off with the ashes. This is done by means of the Mill Grate. This grate is not in any other stove, nor can any other stove use it-This mill grate is insured for five years, now, in the Oriental stove, when you must take out cinder you have to open a door on top of the fire-pot and with a poker rake them up and pass them out through this door Very nice that, provided some of the hot cinder falls on your nice carpet. "Oriental Book, page 3 says that you must take off your pipe during the season from the stove and remove the ashes &c. which have accumulated in the back flue." other nice job in a nice room. Now nothing of this

wind have you to do in the Morning Glory.

W. A. TRIT'LE is the only agent in Waynesboro' for the sale of the M. G. stove. He has sold since the 28th day of Sept., 50 of these stoves. The M. G. has taken since 1866 all first class l'remiums over all other Base Burning stoyes. Call and see the at ove in operation and learn what the stove is, for yourselves, then you can judge which is the best stove. Trusting that in this exposure I have done no injustice I leave it for the public to judge as to which of these stoves shall receive their patronage.

CELEBRATED BASE BURNING STOVE

The Morning Glory is a perpetual burner, having a magazine or reservoir for reserve coal, which is re quired to be filed but once a day, and if the prope sized coal is used it is not necessary to rekindle the fire during the entire winter.

(No clinker will remain in these stoves, nor will there be any trouble from slate, or other impurities in the cost, the fire being always at the base of the cost, the impurities are left in the ashes and ground

out by the "Mill-grate.")
THERE'S NO ESCAPE OF GAS-OR DUST ECONOMY OF FUEL!

The combustion of fuel being perfect and at a high temperature, the amount of heat produced from the same quantity of coal is much greater than at a low temperature, hence but a small quan-tity of fuel is neccessary to be undegoing the process of combustion at one time. The citire outer surface of the Morning Glory is radiating surface. Add to this the surface of objects heated by rays of light through the mica windows, and you have the secret of the great heating properties of the Morning Glory with a small amount of fuel-
