

EMPIRE SHUTTLE MACHINE.

PATENTED FEBRUARY 14, 1860. ASLE-ROOM, NO. 921 SCHEUTRUT ST., PHILADELPHIA.

This Machine is constructed on a new principle of mechanism, possessing many rare and valuable improvements...

The following are the principal objections urged against Sewing Machines: 1. Excessive fatigue to the operator. 2. Liability to get out of order.

The Empire Sewing Machine is exempt from all these objections. It has a straight needle, perpendicular action, makes the LOCK or SHUTTLE STITCH, which will neither RIP nor HAVEL, and is alike on both sides.

THEM, PELLIS, HANDS, BRAIDS, TUCKS, QUILTS, PLUMS, GATHERERS. Having neither CAM nor COG WHEEL EMPHATICALLY A NOISELESS MACHINE.

Particular attention is called to NEW and IMPROVED Manufacturing Machine, for Tailoring, Shoe Fitting, Coach Trimming, &c.

EMPIRE S. M. CO., 921 Chestnut Street, Philadelphia. Agents named FRANK GRANLIS, Agent. Mar. 1-3-4m.

VALUABLE IMPROVEMENT!

THE subscribers would inform the public that they have purchased the Right of the Key-stone Portable Field and Flood Fence, patented April 30 1867, from whom Individual or Township Rights may be obtained at reasonable rates.

ADAMS & HAWKER. Aug. 9-11.

THE BEST IN AMERICA! THE BRINKERHOFF CORN SHELLER, SEPARATOR AND CLEANER!

Patented April 12, 1864 and February 28, 1865.

Patented April 12, 1864 and February 28, 1865.

Farmers can rest assured that this Machine is no humbug, and judging from the many high recommendations of many farmers who are using them, we have come to the conclusion that it is the very Machine that every farmer wants and will have as soon as they have an opportunity to test its merits. One man, without any assistance, can feed, turn and shell seventy five Bushels per day.

TESTIMONIALS.

The following is the report of the Judges on this Machine, at the great trial of Agricultural Implements, held at Auburn, N. Y., in July, 1866, under the auspices of the New York Agricultural Society: "Among the Machines on Exhibition was a Hand Corn Sheller, Separator and Cleaner, exhibited by Jacob Brinkerhoff, Auburn, N. Y. We have carefully examined and thoroughly tested this Machine, and have no hesitation in pronouncing it the best Corn Sheller we ever saw. It readily adapts itself to ears of any size and shape, shells clean, and with great rapidity and ease, and at the same operation separates the corn from the cob, and the chaff from the corn, and delivers the corn ready for market; and it requires but the labor of one person to operate it. The whole affair is simple in construction, and durable."

JOHN STANTON GOLD, Pres. N. Y. State Ag'l Society. BENJAMIN P. JOHNSON, Sec'y N. Y. State Ag'l Society. BOLTON E. BIRNSON, Ag'l New York Tribune. S. EDWARDS TODD, Ag'l Editor New York Times. Dated AUBURN, N. Y., July, 1866.

[Copy of Letter from U. S. Agent for the Paris Universal Exposition.] "M. J. BRINKERHOFF - Dear Sir: My Advisory Committee, appointed to select implements for exhibition at the Universal Exposition, in Paris, in 1867, have selected and recommended to me your Corn Sheller, as the best in America. I have accepted their report, and will forward your Sheller, if delivered here, ready for shipment on or before January 1, 1867. Yours truly, J. C. DERBY, U. S. Agent, &c."

The undersigned having secured the right for Franklin County, Pa., and Maryland, a portion of the Territory will be sold on liberal terms. Good and responsible agents wanted to sell the above Machine, who will be supplied on application. Retail price of Machine - \$25 00. For further information address LIDY, LECRON & GILBERT. N. B. We are also manufacturing GRAIN DRILLS, Corn Shellers, Washing Machines, Straw Cutters, &c., and are prepared to do all kinds of REPAIRING at short notice and in a workmanlike manner. Nov. 28, 1867.

Improved Thrashing Machine!

Farmers will please look at the great advantage in Thrashing Grain with GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt

This Machine is conveniently arranged for hauling and thrashing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half trouble in a barn floor as a common thrasher and shaker. It is also easily put in operation. It is simple, easily managed, reliable, durable, compact and cleanly to work by when in operation, not making near the dust as the common machine or other Separators.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, I must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which I hope they will give me an opportunity, as I am willing to be responsible if it does not perform as represented in this Circular.

No. 1 is a eight-horse power, with cast iron threshing frame and wrought iron and wood cylinder, six, ten inches in diameter and thirty-three inches long. Trunk has ten-inch rake crank and seven rakes in thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter and 28 inches long; delivers the clean grain in bags, or in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels northwest, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Shop Prices of Machines range from \$210, to \$525. I warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

Having now taken a room to keep Repair Castings on hand, I have also selected and am prepared to furnish a variety of other agricultural implements, the latest and best improved, and such as are best adapted to the wants of the farmers of this part of the country: Such as the Hagerstown (Miller's) Clover Stemmer, Huller and Cleaner, which is proving by its own merits to be one of the best machines of the kind now in use. The latest improved BUCKEYE REAPER AND MOWER, HER Rakes, Fodder Cutters, Cider Mills, &c. &c., which I will furnish on short notice and warrant them to answer the purposes for which they are intended. Orders solicited and promptly attended to. For further particulars, circulars, &c. address DANIEL GEISER, Waynesboro', Franklin Co. Penn'a. May 4, 1866.]

NEW LEATHER AND FINDING STORE!

10,000 POUNDS OF BUTTER!

THE quantity of butter made in this country is too small to be increased 10,000 pounds by the use of NIXON'S Horse and Cattle Powders. Good for all diseases of Horses, Cattle, Sheep and Hogs. Sold by J. F. KURTZ, Waynesboro, Chambersburg, December 1865.

Read these certificates, hundreds of which could be published: Four or five years ago, J. S. NIXON commended a Horse and Cattle Powder, and asked me to try it. I was the first farmer to whom it was given and the first one to use it for stock. I found it fall in equal to what Mr. Nixon said of it, and I have used it extensively since, and heartily recommend it to farmers as a sure thing in fattening stock of all kinds and a capital Powder for Horses. MICHAEL EBSOLE, Chambersburg, Decmber 1865.

Ma. J. S. Nixon - To the multitude in this position of our State, who have used your Cattle Powder no commendation is necessary. Its beneficial effects have been fairly tested, and hence its unbounded popularity. I have used it for my horses a few for several years past, and cannot afford to do without it. It keeps a kind of cattle in good condition, loosens the skin, smoothes the hair, and sharpens their appetites. As a preventive from disease, I regard it as invaluable. Yours, &c. REV. B. S. SCHNECK, Chambersburg, April, 1866.

Ma. J. S. Nixon - Dear Sir - I gave your Horse and Cattle Powder a fair trial with all my stock of Horses and cattle, and it improved them wonderfully. It speedily increased the richness of the milk of my cows, and improved the condition of my stock greatly. I can cordially recommend it as the best thing of the kind I have ever known or tried, for all kinds of stock, and it should be kept in every stable. Yours truly, A. K. McCLURE, Ed. Repository. Chambersburg, April, 1866.
