

# Improved Thrashing Machine

Daniel Geiser, B. E. Price, J. F. Otter, Josiah Fahrney.

Farmers will please look at the great advantage in Thrashing Grain with

## GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron threshing frame and wood cylinder, sixteen inches in diameter and thirty-three inches long. Trunk has ten-inch rake crank and seven rakes in thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; is intended to apply to any common lever or railway power, weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter and 28 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together, will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed, with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and thrasher wants, a Separator that goes from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevents it from chafing. Why does this machine run so light, and give so little trouble? Because there is less friction in the journals, and the rakes and fan are geared so that you have no trouble with belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to sit down when necessary? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got elevators like some other machines? Because the Elevators carry the fifth back alternately into the cleaner which must eventually go into the good wheat or in the chaff, and all know, that fifth should be kept separate for feed, &c., we might as well keep shoveling the Tailings from under our hand fan into the hopper and expect to get the grain clean. Why is this separator more clearly and satisfactory to work about than others? Because the Fan and Trunk Sides are closed up to prevent the wheat chaff and dust from coming out and scattering over the floor, causing waist and giving much trouble with dirt and sore eyes, &c. Why do Thrashermen get more work with these separators than they do with others? Because this separator has all the advantages and many more, which makes it a separator suitable and a paying one for all farmers and thrashermen that have grain to thrash, will do it most cheaply and best themselves to the machine, because the machine will not suit itself to the farmer. In short, this is the cheapest, most durable, reliable, simple and most agreeable to work about, and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that Farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

Shop Prices of Machines range from \$215, to \$540. We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

DANIEL GEISER, Proprietor. Geiser, Price & Co., Manufacturers. WAYNESBORO, FRANKLIN CO., PA.

### RING'S Vegetable Ambrosia FOR GRAY HAIR.

This is the Ambrosia that King made.

This is the Cure that lay in the Ambrosia that King made.

This is the Man who was bald and gray. Who now has raven locks, they say. He used the Cure that lay in the Ambrosia that King made.

This is the Maiden, handsome and gay. Who married the man once bald and gray. Who now has raven locks, they say. He used the Ambrosia that King made.

This is the Person, who, by the way. Married the maiden, handsome and gay. To the man once bald and gray. But who now has raven locks, they say. Because he used the Cure that lay in the Ambrosia that King made.

This is the Bell that rings away. To awaken the people all day long. (Into this fact, which here does lay. You would not be told or gray. Use the Ambrosia that King made.

E. M. TUBBS & CO., PROPRIETORS, PETERBORO, N.H. Sold by J. F. KURTZ and F. FOURTHMAN, Waynesboro, and by Druggists generally. Feb. 14-1y.

### Post-Boring Machine.

The subscriber having applied for a patent on his Post-Boring Machine, informs the public that he is now prepared to put up Machines to order. This machine is recommended to Farmers and others as the greatest labor saving machine of the kind now in use. It can be worked by hand-power one man turning out ready for fencing 25 to 30 Posts per day, by horse-power from 100 to 200 per day, and by water-power 45 to 50 per hour. The machine has been thoroughly tested, and is recommended to operate as above stated. Price \$100. Address JONATHAN NULL, Quincy, Pa. Feb. 28-2y.

### Mason & Hamlin's CABINET ORGANS

FOR GREENCASTLE, PA.

THESE celebrated instruments are unequalled for musical capacity, and richness, and volume of tone, and beauty of mechanism. They vary in price—dependent on their size and material of their cases—from \$75 to \$1000. Mr. Clippinger will sell them at the manufacturer's prices and will deliver them at the house of the purchaser. He gives the manufacturer's warrant for five years. By buying through him, freight and other charges will be saved. Office No. 114 North, Carlisle st., Greencastle, Pa. Feb. 21-3m.

### REWARD!

WAS stolen from the Stable of the subscriber on Monday night the 17th inst., on the road leading from Ringgold to Smithburg, one white horse, formerly named, 1 complete set, new harness, 1 set new Breachbands, 1 set of horse lines, 1 Riding Bridle, &c. A Reward of \$20 will be paid for the horse and \$10 for the goods and things. J. L. CROSBY. Feb. 28-2y.

### \$200,000 DOLLARS

TO BE divided and \$100 certificates paying a dividend of eight per cent on the amount in hand, all the shares for Stock in the Chambersburg Woolen Mill.

The great success of the Company and demand for their goods has encouraged them to enlarge the capacity of their Mill and increase their capital stock. They now offer \$50,000 additional stock for sale at 12 1/2 per cent premium on the par value, and ten per cent per annum on the special dividend on the Common, and can be made to pay 12 to 15 per cent per annum. The Company owns all that splendid water power of the Falling Spring in the heart of the Borough of Chambersburg, including the Flouting Mills. Their Woolen Mill uses 60 horse power and leaves enough to run the Flouting Mills of a pair of Burrs. These Mills rent for one half the interest of the whole cost of their real estate except the Woolen Mill building and Machinery. Any who have \$100 or more and especially Farmers wishing to make a safe and profitable investment are requested to examine the merits of this stock before investing in land or Government securities, as it pays at least 8 per cent and a premium, making the interest and most profitable investment now offered, and besides encourages industry and advances the interest of the community at large. You are referred for fuller particulars to our printed circulars, and a personal examination of the Mill and Machinery. We invite a careful examination being convinced that the better working of the Mill is understood, the more certain we are to gain confidence and that a correct knowledge of all our affairs is all that is wanting to secure a speedy sale of this stock.

Subscriptions received at the office of the Company at the Woolen Mills, or at the 1st National Bank of Waynesboro, 1st Nat. Bank of Greencastle, by M. Fallon, Esq., Mercersburg, Judge Bay, Shippenburg, and Judge Ferguson, Path Valley or Geo. Baisley Esq., who will visit in person different localities.

J. C. AUSTIN, Pres't. F. DYSON, Sec'y. Feb. 14, 1868.

### NORMAL INSTITUTE.

THE next session of this Institution will commence on Monday, the 23d of March.

Those wishing to send pupils, should make it known to the Principal, as soon as possible, as but a limited number can be received.

The government will be mild and parental, appealing to the pupils' reason and sense of propriety and right; and obedience and good behavior will be strictly required.

The object of this school will be to give ladies a complete education, and to prepare gentlemen for business or for any class in college.

Pupils will be taught to study understandingly, and not merely to commit rules to memory or go through text books.

The branches that will be taught are, Orthography, Reading, Penmanship, Geography, Arithmetic, Grammar, Algebra, Geometry, Physiology, Composition, Rhetoric, History, Botany, Trigonometry, Natural Philosophy, Geology, Analytical Geometry, Mental Philosophy, Zoology, Elocution, Logic, Moral Philosophy, Astronomy, Calculus, Latin, Greek, French, German, Italian, Music, Drawing and Painting.

N. B.—Primary pupils, if sufficiently advanced to be classified, will be received at somewhat reduced rates.

W. NOETLING, A. M., C. E., Prin. Rev. C. V. WILSON, Assistants. J. F. WILSON, Sec'y. Waynesboro, Pa., Feb. 7, 1868.—2m.
