PATENTED FEBRUARY 14, 1860.

SALESHOON, NO. 921 CHESTNUT ST., PHILADELPHIA.

This Machine is constructed on a new principle of mechanism, possessing many rare and valuable improvements, having been examined by the most prominent experts, and pronounced to be SIMPLICITY and PERFECTION COMBINED.

The following are the principal objections urged against Sewing Machines:

1. Excessive fatigue to the operator.

5. Disagreeable noise while in operation.

The Empire Sewing Machine is exempt from all these objections.

It has a straight needle, perpendicular action, makes the LOCK or SHUTTLE STITCH, which will neither RIP nor RAYLE, and is alike on both sides; performs perfect sewing on every description of material, from Leather to the finest Nanook Muslin, with linen, cotton or silk thread, from the coarsest to the finest number.

THE MACHINES, BELLS, BIKDS, BRAIDS, TUCKS, QUELTS, PLAYS, GATHERERS, Having neither CAM nor COG WHEEL EMPHATICALLY A NOISELESS MACHINE. All varieties of CAMBET MACHINES from \$60 upwards.

Particular attention is called to the new and improved Manufacturing Machine, for Tailoring, Shoe-Fitting, Coach Trimming, &c. Its advantages are simplicity, durability, rapidity, equal adaptation to all branches of manufacturing. It makes perfect work on all material. It is especially desirable in sewing Patent Leather, and is very silent. In short, it is the most perfect manufacturing machine in the market.

NOTICE FOR ALL TO READ.

THE "MORNING GLORY!"

Is the Cheapest and the Best Base Burning Stove before the Public!

THE No. 9 M. G. sells at \$25, and is nearly 50 times more efficient than the No. 9 Oriental, and is larger than the No. 10 or No. 11, which sells at five to six dollars more than the No. 9 M. G. Again, the Morning Glory is the only stove that breaks up its cinder and passes them off with the ashes. This is done by means of the *Roll Grate*. This grate is not in any other stove, nor can any other stove use it. This roll grate is insured for five years, now, in the Oriental stove, when you must take out the cinder and pass them up on top of the fire, and through a poker rake, then up and pass them out through a door very nice that, provided some one of the hot cinder falls on your nice carpet. "Oriental Book," page 3 says that you must take it off your pipe during the season, if the stove will not burn, the pipes, &c., which have accumulated in the back fire. After this nice job in a nice room. Now, nothing of this kind have you to do in the Morning Glory.

W. A. TRITTLE is the only agent in Waynesboro for the sale of the M. G. stove. He has sold since the 28th day of Sept., 50 of these stoves. The M. G. has taken since 1866 all first class Premiums over all other Base Burning stoves. Call and see the stove in operation and learn what the stove is, for yourselves, then you can judge which is the best stove. Trying that in his exposure I have done no injustice to the public to which I have done in justice to the M. G. stove. He has sold since the 28th day of Sept., 50 of these stoves. The M. G. has taken since 1866 all first class Premiums over all other Base Burning stoves. Call and see the stove in operation and learn what the stove is, for yourselves, then you can judge which is the best stove. Trying that in his exposure I have done no injustice to the public to which I have done in justice to the M. G. stove.

CELEBRATED BASE BURNING STOVE THE MORNING GLORY!

The Morning Glory is a perpetual burner, having a zinc or reservoir for reserve coal, which is required to be filled but once a day, and if the proper sized coal is used it is not necessary to rekindle the fire during the entire winter.

(No cinder will remain in these stoves, nor will there be any trouble from slate, or other impurities in the coal, the fire being always at the base of the coal, the impurities are left in the ashes and ground out by the "Roll-grate.")

THERE'S NO ESCAPE OF GAS OR DUST ECONOMY OF FUEL!

The combustion of fuel being perfect, and at a high temperature, the amount of heat produced from the same quantity of coal is much greater than at a low temperature, hence but a small quantity of fuel is necessary to be undergoing the process of combustion at one time. The entire outer surface of the Morning Glory is radiating surface. Add to this the surface of objects heated by rays of light through the mica windows, and you have the secret of the great heating properties of the Morning Glory with a small amount of fuel.
