**RING'S**  
**Vegetable Ambrosia**  
FOR  
**GRAY HAIR.**

This is the Ambrosia that Ring made.

This is the Cure that lay in the Ambrosia that Ring made.

This is the Man who was bald and gray. Who now has raven locks, they say. He used the Cure that lay in the Ambrosia that Ring made.

This is the Maiden, handsome and gay. Who married the man once bald and gray. Who now has raven locks, they say. He used the Ambrosia that Ring made.

This is the Parson, who, by the way, married the maiden, handsome and gay. To the man once bald and gray, who now has raven locks, they say. Because he used the Cure that lay in the Ambrosia that Ring made.

This is the Bell that rings away to arouse the people and aid gray. Into this fact, which here does lay—If you would not be bald or gray, Use the Ambrosia that Ring made.

**TO THE LADIES!**  
M. C. RESSER would respectfully announce to the citizens of Waynesboro and vicinity that she still intends to carry on the Millinery business in all its branches and don't intend quitting her as has been reported, but expects to carry on more extensively than ever. She also intends carrying on MANTUA MAKING in connection with her other business; having had considerable experience in both she flatters herself that she will be able to give satisfaction to all. Returning thanks for liberal patronage given her heretofore, she hopes for a continuance of the same in the future.  
March 20—1f.

**LIVERY! LIVERY!**  
THE subscribers announce to the public that they still continue the Livery business. Having recently added both horses and vehicles to their stock they are now better prepared than ever to accommodate persons wanting fine riding and driving horses, and comfortable conveyances. An attention is also always in attendance and parties conveyed to any point desired, night or day. Passengers conveyed daily to and from Greensville. Their Buses leave at 6 1/2 A. M. and return at 7 P. M.  
**WOLFFENBERGER & STONER.**  
Aug. 30—1f.

**Improved Thrashing Machine!**

**Daniel Geiser.**  
**B. E. Price.**  
**J. F. Oiler.**  
**Jonah Fahrney.**

Farmers will please look at the great advantage in Thrashing Grain with

**GEISERS' PATENT**  
**SELF-REGULATING GRAIN SEPARATOR,**  
**CLEANER AND BAGGER.**

With the latest Improved Triple-Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron threshing frame and wrought-iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten-inch rake crank and seven rakes is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. To save the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter and 28 inches long; delivers the clean grain in bags, or if desired, in a bin. It delivers the straw fifteen feet from the feeder, if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and thrasherman wants, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating Blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevent it from choking. Why does this machine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes and fan are geared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hot, and why is it so convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the fifth back alternately into the cleaner which must eventually go into the good wheat or in the chaff, and all know, that fifth shut; be kept separate for feed, &c., we might as well keep shoveling the Tailings from under our hand into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work at than coming out and scattering over the floor, causing weight and giving much trouble with dust, and sore eyes, &c. Why do Thrashermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thresh, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit itself to the farmer. In short, this is the cheapest, most durable, reliable, simple and most agreeable to work about; and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868.  
**Shop Prices of Machines range from \$215. to \$540.**  
We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.
