THE CROP PROSPECTS.—Reports from the of his conscience. Department of Agriculture state that the wheat prospect in the New England States is excellent. Throughout New Jersey, Pennsylvania and Delawaro there is a general expression of satisfaction with the condition of wheat, and a confident expectation of a fruitful harvest if no casualty intervenes. In the Ohio Valley and in the Northwest the wheat generally looks well. A few exceptions are noted; as in Miami, Ohio. In West Virginia, Putnam and Wood counties report inferior condition from winter killing. Other counties claim a better stand than for eral disarming of all the Great Powers of Eu- Flour many years. While a train, bearing a large number of delegates to the convention at Chicago, was in writing at York, Pa, on the 19th igst., a cowardly attempt was made to assassinate Gen. Logan who was a passenger on the train. Having occasion to step from the cars, he was recognized by a crowd of men of the engine blow for starting several large and Misses. stones were hurled through the windows of however doing no further damage than come, first served. This is in perfect keeping with the nots of the assassinators of Abraham Lincoin, and shows that they entertain a long embittered hate against the defenders of the Union. Not courageous enough to meet them on the field as open enemics they seek to murder, where their cowardly bodies are less endangered.

Gen. McClellan has addressed a letter to the New York Common Council respectfully declining the public reception which they intended to give him on his return home. The General, it is more than proba ble, will be in New York about the 20th of June-or about a fortnight prior to the mecting of the Democratic National Convention -a circumstance which some think not without peculiar significanco.

na A very subtle and terribly fatal dis ease is now raging among the cattle in some portions of Illinois. Over one hundred head have fallen victims to it within the last few days. It usually kills in a few hours. No premonitory warnings are given, and although al the skill in possession of ordinary practitioners has been brought to bear upon it, it yields to no remedy or treatment, and is upon the Union banners, was sometime since fatal in every instance. Its name and nature have not yet been determined.

a helping hand.

In Washington and Quincy townships there are fiteen flouring mills, in operation, one of these mills last year shipping nine thousand, five hundred barrels flour. It is estimated that the fifteen mills sent to market over sixty thousand barrels of flour during the year of 1867. This alone would give six thousand tons of freight.

Your correspondent has taken some pains o secure authentic notes upon which to base the following table showing the amount of freight estimated in tons, that has to be carpoints of the county through which it is pro- by the Western-Maryland Railroad Compaposed to run this road. There is but one ny. item in the table which is estimated upon the prospective demand, when the roud is made-and that is iron ore-any one who is the ore found on this route wi'l say that sev-

6,500 | Other iron and 10,000 1.300 castings 70,000 Iron oro 1,500 1,250 Lime Merchandise Manufactures Other atticles Coal-anthracite 20,000 Coal— bitumen's 177,750

If we add one-third increase of freight when the road is made, then we have an amount of tonnage as large as several roads of about the same length that are paying six per cent. on over three hundred thousand dollars capital stock. I believe there is not a doubt that this road, as a paying invest. ment, will be good stock, and that it will be made within two years, I am equally sure.
