

H. SIERER
MANUFACTURER AND DEALER IN
FURNITURE
CHAMBERSBURG, PENN'A.

H. SIERER, would call the attention of all who are in need of Furniture, Mattresses, Looking Glasses, &c., to the fact that he has a larger stock on hand, at his rooms on West Queen Street, than all similar establishments in the county combined; and that he can and does offer inducements to Housekeepers and others, in want of Goods in his line, such as no other Furniture Dealers can do.

Having a large Factory filled with the latest improved Machinery, driven by water power—which is much cheaper than steam—he is enabled to make his furniture at less cost than parties not having the same advantages.

He has on hand upwards of 140 BED STEADS of over 30 different Styles, ranging in price from \$5, \$7.50.

More than 60 BUREAUS, of 25 diff. styles from \$7.50 to \$100.00 each.

Upwards of 800 CHAIRS, of all styles from \$1.25 to \$35 each.

ROCKING CHAIRS from \$1.50 to \$30.

FULL CHAMBER SUITS, solid Walnut, from \$60 to \$275 each.

COTTAGE SUITS, from \$30 to \$75 each.

TELE-A-TETES and Sofas, from \$25 to \$60 each.

Spring-seat PARLOR CHAIRS, from \$28 to \$50 per half dozen.

LOUNGES, from \$7 to \$40 each.

Marble-top PARLOR TABLES, solid walnut, from \$10 to \$40 each.

Wood Top PARLOR TABLES, from \$2 to \$15 each.

Among which are more than thirty different styles. Also, EXTENSION, BREAKFAST, DINING and HALL TABLES, in endless variety.

CHILDREN'S CARRIAGES, 15 different styles ranging in price from \$5 to \$25 and all other articles kept in first class Furniture establishments.

He also sells Wholesale to the trade, all of whom he requests to call and learn prices before purchasing elsewhere. H. SIERER, West Queen Street, June 5-3m. Chambersburg, Pa.

FACTS ARE STUBBORN THINGS.

Who desire to call the attention of the people of Wayne County, and surrounding country to the following FACTS:—

SINGER SEWING MACHINE
Is the best for Family Use.

1. It has the best Hemmer ever put on a Sewing Machine; commencing at the corner of the work, and turning a very pretty hem that will not wash out. It will hem into a square corner and out; around an abrupt curve; into a scallop; and turn the work all in neatly. It will also hem the edge of unbleached muslin without trimming off the fringe.
 2. It has the best attachments for Hemming, Felling, Tucking, Cording, Ruffling, Braiding, Binding, and Trimming, ever put on a Sewing Machine.
 3. It is the fastest running Machine in the world and runs the easiest.
 4. It does not take six months to learn to use it. It is so simple that a child can use it.
 5. It will out-wear any two other machines you can name, and hence the most durable.
 6. It does its work equally well, at fast or slow rates of speed.
 7. It cannot be got out of order by sewing.
 8. With these facts, we invite you to come and see for yourself, and can assure you that after ten years practice with Sewing Machines, we know by practical experience which Machine to sell and which to recommend; and can say that you will find it to your own interest to see these before making a purchase.
- Parties will please leave their orders with the undersigned who will promptly fill them.
- THOS. J. TILBERT, Agent.

Improved Thrashing Machine!

Daniel Geiser. B. E. Price. J. F. Oiler. Josiah Fahrney.

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; it is intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron thresher's frame, and cylinder, 12 1/2 inches in diameter and 48 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together will thresh and clean, in good grain, ready for market, from 100 to 175 bushels per hour, using four or six horses, and the same number of hands; but to force the work under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and thrasher wants, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self regulating Blast, which prevents grain from blowing into the chaff, and also has a self regulating feeder to feed the cleaner and it has rollers and combs in the cleaner, which prevents it from clogging. Why does this machine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes and fan are geared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach when necessary? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the chaff back alternately into the cleaner which must continually go into the good wheat or in the chaff, and all know, that this should be kept separate for feed, &c., we might as well keep shoveling the Tailings from under our hand into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are closed up to prevent the wheat chaff and dust from coming out and scattering over the floor, causing waist and giving much trouble with dirt and sore eyes, &c. Why do Farmers get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashers who have grain to thrash, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit itself to the farmer. In short, this is the cheapest, most durable, reliable, simple and most agreeable to work about, and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Farmers can rest assured that, this machine is no humbug, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and test its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as a representation in this Circular.

A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868.

Shop Prices of Machines range from \$215. to \$540.

We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

DANIEL GEISER, Proprietor. Geiser, Price & Co., Manufacturers. WAYNESBORO, FRANKLIN CO., PA.

Null's Pat. Post Boring Machine.

PATENTED MARCH 24, 1868.

STATE AND COUNTY RIGHTS FOR SALE.

A series of trials of this machine has convinced the inventor and all persons who have witnessed its operations that it is superior to any other in use in the following particulars:

- LABOR SAVING QUALITIES—EASE OF OPERATION—SIMPLICITY OF CONSTRUCTION.

This machine is constructed so as to be operated either by hand, horse, water or steam power. By hand 25 to 30 posts can be bored per day; by one-horse power from 100 to 150 per day; by two-horse power 200 per day, and by water or steam power from 200 to 300 per day.

The subscriber is now prepared to dispose of State and County Rights for the above valuable invention.

Address JONATHAN NULL, Quincy, Franklin County, Pa.

DR. JOHN A. HATTON, NOTICE.

[From the Philadelphia Dental College.]

LETTERS Testamentary on the Estate of Henry Smith, late of Waynesboro' Pa., dec'd. Having been granted to the subscriber, all persons indebted to said estate will make payment and those having claims present them to D. SNIVELY SMITH, Ex'r.
