# GEISERS' PATENT

CLEANER AND BAGGER.

With the latest Improved Triple Geared H orse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it in the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fitteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies a li in a separate place. The trunk and ian sides being closed, to comme the straw and chair, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to torty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable to hands that any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the larmer's use; in intended to apply to any common tever or railway power; weighs 1,300 pounds; has an iron threshers frame, and cylinder, 123 inches in diameter and 48 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the desired, in a first dustact. It will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of nands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean names but to force the work, and the mast involved the considerably more. The Machine will thresh and clean all kinds or grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will

apply very well to a two-horse railway power Now here is what the Farmer and thrasherman wants, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating Blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevents it from choak ng. Why does this machine run so light, and give so little trouble? Because there is less fric tion in the Journals, and the rakes and fan are geared so that you have no trouble with Be its breaking and shipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage sepdrive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach when necessary? Because it is more convenient in the barn without the front carriage. riage. You can turn the machine or run at from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the fifth back alternately into the cleaner which must eventually go into the good wheat or in the cuaff, and all know, that fifth should be kept separate for feed, &c , we might as well keep shoveling the Tailings from under our hand fan into the bopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work a-bout-than-others?—Because the Fan and Trunk Sides are closed up to prevent the wheat chaff and dust from coming out and scattering over the floor, causing waist and giving much trouble with dirt and sore eyes, &c. Why do Thrushermen get more work with these separators than they do with others? Be cause this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thrash, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit restit to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about; and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

reduction of 2 per cent. on all orders handed in on or before the first of April, 1868. Shop Prices of Machines range from \$215, to \$540. We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

DANIEL GEISER, Proprietor. Geiser, Price & Co., Manufactures. WAYNESBORO', FRANKLIN CO, PA.

FACTS ARE STUBBORN THINGS.

W E desire to call the attention of the people of Waynes oro', and surrounding country to the following FACTS:-1. The

## SINGER SEWING MACHINE Is the best for Family Use.

2. It has the lest Hemmer ever put on a Sewing for truth is mighty and will prevail. We have the and turning a very pretty hem that will not wash unbleached muslin without trimming off the fringe. 3. It has the best attachments for Hemming, Felling, Tucking, Cording, Ruffling, Brailing, Binding, and Trimming, ever put on a Sewing Ma-

> 4. It is the fastest running Machine in the world and runs the easiest.

5. It does not take six months to learn to use it It is so simple that a child can use it. 6. It will out-wear any two other machines you can name, and hence the most durable.
7. It does its work equally well, at fast or slow

rates of speed. 8. It cannot be got out of order by sowing.
With these FACTS, we invite you to come and see for yourself, and can assure you that after ten years practice with Sewing Machines, we know by practical experience which Machine to sell and which to recommend; and can say that you will

find it to your own interest to see these before making a purchase.

Parties will please leave their orders with the undersigned who will promptly fill them.
THOS., I. FILBERT, Agent.
