PUBLIC SALE.

THE subscriber, administrator of Obed Mentzer, dec'd, will sell at Public Sale, on the premises, on SATURDAY THE 24TH DAY OF OCTOBER, 1868, the following described Real Estate, to wit: A One Acre Lot of Ground, with a

TWO STORY LOG HOUSE,

roughed and newly fitted up, a large new Stable, Cooper Shop, Hog Pen, &c. thereon. There are also on the lot the choicest fruit and a never-failing spring of good water. This property is situated one mile South of Scotland, on the Fayetteville road, and joins lands with Henry Gans, Daniel Leaser and others. Sale to commence at 1 o'clock on said day when the terms will be made known by **DANIEL GARLINGER, Adm'r.**

sep 18-18

LAND FOR SALE.

THE subscriber offers at Private sale a tract of first quality Limestone Land containing 5 ACRES, more or less, situated about 1 1/2 miles West of Waynesboro', on the turnpike leading to Green-castle. This tract adjoins lands of David Snively and John Scott. It is well adapted for Building Lots and will be sold separately or together to suit purchasers. If not sold privately before **SATURDAY THE 17TH DAY OF OCTOBER, 1868,** it will be offered at Public Sale, on that day at 1 o'clock, P. M. in front of Bowden's Hotel, in Waynesboro'. Persons can see the land in the meantime by calling on the subscriber.

Improved Thrashing Machine!

Daniel Geiser. B. E. Price. **J. F. Oller. Josiah Fahrney.**

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron threshing frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten-inch rake crank and seven rakes, thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; it is intended to apply to any common lever or railway power, weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter and 28 inches long; delivers the clean grain in bags, or, if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or, if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and Thrasherman wants, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed the cleaner and combs in the cleaner which prevents it from clogging. Why does this machine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes and fan are geared so that you have no trouble with belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach when necessary? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the fifth back alternately into the cleaner, which must eventually go into the good wheat or in the chaff, and all know, that fifth should be kept separate for feed, &c. we might as well keep shoveling the Tailings under our hand fan into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are closed up to prevent the dirt from coming out and scattering over the floor, causing waist and giving much trouble with dirt and sore eyes, &c. Why do Thrashermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thrash, and in most cases farmers must suit themselves to the machine, because the machine will not suit itself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about, and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868.

Shop Prices of Machines range from \$215. to \$540.

We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

DANIEL GEISER, Proprietor.

Geiser, Price & Co., Manufacturers.

WAYNESBORO', FRANKLIN CO., PA.

Null's Pat. Post Boring Machine.

PATENTED MARCH 24, 1868.

STATE AND COUNTY RIGHTS FOR SALE.

A series of trials of this machine has convinced the inventor and all persons who have witnessed its operations that it is superior to any other in use in the following particulars:

- LABOR SAVING QUALITIES—
- EASE OF OPERATION—
- SIMPLICITY OF CONSTRUCTION.

This machine is constructed so as to be operated either by hand, horse, water or steam power. By hand 25 to 30 posts can be bored per day; by one-horse power from 100 to 150 per day; by two-horse power 200 per day, and by water or steam power from 200 to 300 per day.

The subscriber is now prepared to dispose of State and County Rights for the above valuable invention.

THE MORNING GLORY FOR 1868.

This Stove has been in use in this part of the country for three years and has given more satisfaction than any other Base Burning Stove offered. I can refer to One Hundred and Fifty persons to whom I sold these stoves and every one says it is the best stove they ever saw or used. I sold One Hundred and Seventeen of these stoves last season, and from the orders now received for them I have no doubt but that I will sell more than last season. Come and see my stock of Stoves. You will find a large stock of the best Coal Stoves ever offered for sale. I have now in store three other new Base Burning Stoves, "The Junia", "The Revolving Light" and the "Empire", all first class stoves.

PERFECTION AT LAST.

The public have long desired a perfect cook stove for coal. I now have found that stove.

THE CALORIFIC

Is without doubt the best Cook Stove in market for either Anthracite or Bituminous Coal. Call and see it.

W. A. TRITLE,

Manufacturer of Copper, Tin and Sheet Iron Ware, and dealer in all kinds of Stoves for Coal or Wood.

He has now on hand a large stock of the best Cook Stoves in market, and is selling 40 gal. Copper Kettles at \$20 30 " " " " 15 18 " " " " 10

The above kettles are stronger than you can get elsewhere and much cheaper. I am now putting up a

NEW DRY HOUSE

on the Hot Air Principle which comes much lower in price than any offered before, and is gotten up in good style, is strong and durable, takes but little wood, and does its work splendidly. It is also a good Hot Air Stove for clothes lines cheap.

Professional.

DR. J. BURNS AMBERSON having permanently located in this place, offers his professional services to the community. Calls promptly attended to at all hours. Office in A. B. Bonebrake's Drug Store, one door west of the Waynesboro' Hotel. April 17-17.

M. J. LEESE & CO. ENGINEERS, Foundry, Machinists and Blacksmiths.
