

**FOR PURE DRUGS**

THE L. A. OELIG  
**DRY HOUSE,**  
PATENTED JANUARY 21ST, 1868.

This is the best Dry House ever offered to the public. It dries fruit in half the time required by the old method. It dries uniformly and perfectly. The Fruit dried by it retains more of the natural flavor.

It is easily managed:  
It saves fuel.  
It is durable and portable.  
It has 24 feet of drying surface.  
It will dry apples twice a day.  
Call and see them at the sign of the **BIG RED HORN** and leave your orders for them.

**DRUG STORE.**

**Waynesboro, May 24, 1867.**

**FACTS ARE STUBBORN THINGS.**

**SINGER SEWING MACHINE**

**Is the best for Family Use.**

WE desire to call the attention of the people of Waynesboro, and surrounding country to the following FACTS:—1. The

2. It has the best Hammer ever put on a Sewing Machine; commencing at the corner of the work and turning a very pretty hem that will not wash out. It will hem into a square corner and out; around an abrupt curve; into a scallop, and turn the work all in neatly. It will also hem the edge of unbleached muslin without trimming off the fringe.

3. It has the best attachments for Hemming, Felling, Tucking, Cording, Ruffling, Braiding, Binding, and Trimming, ever put on a Sewing Machine.

4. It is the fastest running Machine in the world and runs the easiest.

5. It does not take six months to learn to use it.

6. It will out-wear any two other machines you can name, and hence the most durable.

7. It does its work equally well, at fast or slow rates of speed.

8. It cannot be got out of order by sewing.

With these facts, we invite you to come and see for yourself, and can assure you that after ten years practice with Sewing Machines, we know by practical experience which Machine to sell and which to recommend; and can say that you will find it to your own interest to see these before making a purchase.

Parties will please leave their orders with the undersigned who will promptly fill them.

THOS. J. FILBERT, Agent.

June 19—tf.

**Improved Threshing Machine!**

Daniel Geiser.  
E. E. Price.

J. F. Oller.  
Josiah Fahrney.

Farmers will please look at the great advantage in Threshing Grain with

**GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.**

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake and seven rakes is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack in a separate place. The trunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstance, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; it is intended to apply to a common lever or railway power; weighs 1,300 pounds; has an iron thresher frame, and cylinder, 12 1/2 inches in diameter and 48 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean fifteen to twenty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use. The Machines will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and Thresherman wants, a Separator to go from farm to farm, to thresh grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating Blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed the cleaner and its rollers and combs in the cleaner which prevents it from clogging. Why does this machine run so light, and give so little trouble? Because there is less friction in the journals, and the rakes and fan are so arranged so that you have no trouble with the bearings and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach when necessary? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the filth back alternately into the cleaner which must eventually go into the goal wheat or in the chaff, and all know, that filth should be kept separate for feed, &c. we might as well keep shoveling the 'Tallings' from under our hand! We expect and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are so arranged to prevent the wind from blowing chaff and dirt from coming out and scattering over the floor, causing what an I giving much trouble with dirt and sore eyes, &c. Why do Threshermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Threshermen that have grain to thresh, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about, and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and at test its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868.

**Shop Prices of Machines range from \$215, to \$540.**

We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

**DANIEL GEISER, Proprietor.**  
**Geiser, Price & Co., Manufacturers,**  
WAYNESBORO, FRANKLIN CO., PA.

**Null's Pat. Post Boring Machine.**

**STATE AND COUNTY RIGHTS FOR SALE.**

A series of trials of this machine has convinced the inventor and all persons who have witnessed its operations that it is superior to any other in use in the following particulars:

**LABOR SAVING QUALITIES—**  
**EASE OF OPERATION—**  
**SIMPLICITY OF CONSTRUCTION.**

This machine is constructed so as to be operated either by hand, horse, water or steam power. By hand 25 to 30 posts can be bored per day; by one-horse power from 100 to 150 per day; by two-horse power 200 per day, and by water or steam power from 300 to 300 per day.

The subscriber is now prepared to dispose of State and County Rights for the above valuable invention.

Sale to commence at 1 o'clock on said day when the terms will be made known by

**DANIEL GARLINGER, Admr.**  
sep 18—12

**GOLD MEDAL SEWING MACHINE.**

PATENTED IN AMERICA AND EUROPE.

A. F. Johnson's Improved Gold Medal Double Thread Sewing Machine combines the **GREATEST SIMPLICITY IN CONSTRUCTION,** with the **GREATEST ECONOMY, CERTAINTY AND DURABILITY IN OPERATION.**

The original of this machine, which was placed on exhibition with some forty others, in the "Mechanics Fair" in Boston, 1856, was pronounced superior to all others, and received the highest prize. A Gold Medal, the only one conferred on any inventor of Sewing Machines was awarded to the inventor.

The Gold Medal makes less noise than any other two thread Machine while in operation.

The trouble often experienced in setting the needle in other machines is avoided in this, as the needle is set without difficulty. This is a feature of great value, as every operator will know.

This is the most simple and reliable two-thread Sewing Machine in the world.

The power of its driving machinery having been greatly increased, has increased its speed in operation, and better adapted it to the heavier classes of work.

Several other improvements have been made, such as the manner of holding the spool—regulating the tension—operating the treadle, &c.—each adding to the value of the machine.

**EVERY MACHINE IS WARRANTED FOR ONE YEAR.**

It is put up in every variety of style desired, from \$43 to \$100.

The Gold Medal Machine will do any of the following kinds of work:

**SEAMING, TUCKING, QUILTING, FELLING, EMBROIDERING, BRAIDING, STITCHING, BINDING, HEMMING, &c. &c.**

If you want a "Machine" that excels all the rest, secure the "GOLD MEDAL" for that is the best. Though many "Machines" in the market there are, with this for utility, none will compare. It does all the work with such ease—and so nice—whichever skill possess it, will save a great deal of trouble. It has points of merit in no other we ever seen.— Then purchase the best, **The "Gold Medal" Machine.**
