MISCELLANY.

CIRCUMSTANTIAL EVIDENCE

There was a trial and execution in Dublin, more than a century since, which excited great interest. It was that of a surgeon, well woman found the street door ajar, and not being answered when she-knocked at it, she made her way to the kitchen She had no sooner entered it, than uttering a piercing scream, she called loudly for help The passers-by and persons from the neighboring houses were soon on the spot, and the kitchen was crowded in a short time; a sad spectacle presented itself. She deposed that she had not taken her eyes off of his house all that day on which the murder was perpetrated; that no one left or entered the house that day but himself; that he went home about four o'clock, his usual hour for returning; and that, on knocking at the door, it was opened by the servant, who, to the best of her belief. shut it fast when her master went in; and not positively swear.

The only reparation in his power was to clear his char acter from the dreadful reputation; but though he felt a relief in this act of Justice, yet he could not undo the injury inflicted.

The Mysterious Bed.

He tried to inform them of his inability to find the bedstead, but they only laughed at him, telling him he must be crazy. Bidding him good night, and advising him to go to bed at once and sleep off his delirium, they left him. As soon as they had shut the door he made a dive for the bed, and landed on the floor. He then began to hallow and yell louder than ever, and darted for the door. HUNTING OTHER QUARTERS. So far as hunting houses is concerned the

past week has been a regular 1st of April with us. Those living in buildings near the water front, were anxious to find buildings resting on firmer foundations, and the hills were sought by numbers of people Frame houses were in good demand persons residing in brick buildings conceived the im--pression-that-they-were-a-great-deal-moredangerous than those built of wood The danger from fire was not considered. The large buildings and hotels on our principal streets that were filled before the shock were suddenly emptied. Small houses easy of access were the favorites. The largest hotel in the city the night following the shock had only three occupants. Some people became so sensitive that the beating of the heart would sometimes startle them. Incidents related of the panic stricken people are in some cases intensely ludicrous. Although persons were pardonable for exhibiting fear, under the circumstances, the fact that their actions were laughable is not changed. LAUGHABLE INCIDENTS.

A gentleman was in his bath tub, when he experienced the first shock, and without waiting to consider what was to be done and rushed for the door, pulling the garment over his head while he ran. He gained the street where his appearance caused considerable laughter. Becoming quiet he realized the rituation and left unceremoniously.

In front of the hotels dishabille was the rule and full dress the exception. A boardwhen the shock commenced, and forgetting his condition rushed frantically into the hall. A frightened lady in her night dress rushed up to him, and grabbing his wet arms, im-ploringly inquired "Oh what shall I do sir? what shall I do?" It is stated shat he was ungentlemanly enough to refuse to listen to her appeals.

A young man rooming in a house on Kearney St., was lying in bed when the shock took place, and imagining the day of judgement was at hand jumped from his bed and rushed toward the stairs, to reach which he had to pass his landlady's door. He had nothing on but a red flannel shirt, and that was remarkable for its shortness. His landlady saw him and being as much excited as he seized him by the tail of his garment at the moment he reached the head of the stairs. With a wild bound he sprang on, and both he and the landlady tumbled to the bottom. He believing the house was falling, rushed into the street, while the lady went back into the house, where she gathered up his clothes and sent them to him.

THE PANIC STRICKEN PEOPLE. There are many easily frightened people who are preparing to leave, being unwilling most to the ceiling, and commenced shouting sat in the front pew and upon whom all eyes ken so badly as to make tearing down and reto live in a country where carthquakes are

Factories, foundries, gas felt. They are determined to return immeworks, churches and other large buildings diately to the Atlantic States. They are bear evidence in unmistakable signs of the | willing to face lightning, hurricane, sunstroke, frost and fire. The loss of a steamer at sea with a thousand lives and a million of treasure is nothing compared to an earthquake. By a little reflection, any one can see with all our earthquakes human life is ten per cent more safe in San Francisco, than in any other portion of the United States. In the last ten years hundreds of persons have died in the eastern cities by lightning, sunstroke and cold. In New York city alone last summer there were three hundred deaths by sunstrokes. Tornadoes rage over parts of the west, sometimes destroying large amounts of property. These are never witnessed here and not more than half a dozen has died by injuries received by earthquakes. Which is the safest? If the purpose is to escape death by natural convulsions, then California should be full of people fleeing from eastern lightning, which kills a hundred times more persons every year than earthquakes do .-San Francisco has neither torrid heat, nor freezing cold and the whole year is serviceable for business and pleasure.

Habit has become an important element with us. An evil to which we have become accustomed loses its terrors. Old soldiers considered it fun to dodge cannon balls .--When the first boiler explosion occurred on they would do all their travelling by stage. Now nobody hesitates to go by rail or Steamboat. But there are those against whose folly it is useless so reason.
