

PURIFY YOUR BLOOD!
LONDON BLOOD PANACEA.

The Great Alternative and Blood Purifier.

It is the most perfect vegetable compound of alternative, tonic, diuretic and diaphoretic, making it the most effective, invigorating, restorative and blood-purifying remedy known to the world.

For the cure of Scrophulous or Rigid's Ery, Cutaneous Diseases, Eruptions, Boils, Pimples and Blotches on the Face, Sore Eyes, Scald Head, Tetter Affections, Old and Stubborn Ulcers, Rheumatic Disorders, Yellow Jaundice, Salt Rheum, White Swellings, Mercurial Diseases, General Debility, Faintness and Fluttering of the Heart, Consumption, Asthma, Spasms and Nervous Affections, Inflammation of the Bladder and Kidneys, Pains in the Back, Breast, Femur, Hip, Ankle, &c. To the broken-down female it gives life and energy by restoring the lost powers of nature, when health again succeeds the feeble form and pallid cheek of the sufferer.

Nothing can be more surprising than its invigorating effects on the human system. Persons all weak and feeble, by using the PANACEA, at once become robust and full of energy under its influence.

Ladies who have pale complexions and blotches about the eyes, blotches and pimples on the face, dark skin or freckles, and are "out of spirits," should use a bottle or two of LONDON BLOOD PANACEA, it will cleanse your blood, remove the freckles and blotches, and give you animation, sparkling eyes, fine spirits and a beautiful complexion. Try it.

The genuine has LONDON BLOOD PANACEA, S. A. FORTZ, BALTIMORE, Md., blown in the bottle, and my signature on the wrapper.

S. A. FORTZ,

Improved Thrashing Machine!

Daniel Geiser, B. E. Price. **J. F. Oller, Josiah Fahrney.**

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt.

No. 1 is a eight-horse power, with cast iron threshing frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The crank and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in intended to apply to any common level or railway power; weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter and 28 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and thrasher in winter, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to deliver the cleaner and it has rollers and combs in the cleaner which prevents it from choking. Why does this machine run so light and give so little trouble? Because there is less friction in the journals, and the rakes on the fan are geared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach when necessary? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the dirt back alternately into the cleaner which must eventually go into the good wheat or in the chaff, and all know, that dirt should be kept separate for feed, &c. we might as well keep shoveling the Tailings from under our hand into the hopper and expect to get the grain clean. Why is the separator more satisfactory to work in about than others? Because the Fan and Trunk Sides are closed up to prevent the wheat chaff and dust from coming out and scattering over the floor, causing waist and giving much trouble with dirt and sore eyes, &c. Why do Thrashermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thrash, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit itself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances. Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

A reduction of 2 per cent, on all orders handled in on or before the first of April, 1868.
Shop Prices of Machines range from \$215, to \$540.
We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

DANIEL GEISER, Proprietor.
WAYNESBORO', FRANKLIN CO., PA.

Null's Pat. Post Boring Machine.

PATENTED MARCH 24, 1868.
STATE AND COUNTY RIGHTS FOR SALE.

A series of trials of this machine has convinced the inventor and all persons who have witnessed its operations that it is superior to any other in use in the following particulars:

LABOR SAVING QUALITIES—FASE OF OPERATION—SIMPLICITY OF CONSTRUCTION.
This machine is constructed so as to be operated either by hand, horse, water or steam power. By hand 25 to 30 posts can be bored per day; by one-horse power from 100 to 150 per day; by two-horse power 200 per day, and by water or steam power from 200 to 300 per day. It is also a self-feeder.
The subscriber is now prepared to dispose of State and County Rights for the above valuable invention.
