M. J. LEESE & CO.
ENGINEERS,
Foundry, Machinists and Blacksmiths.
ESTABLISHED 1861.
PARKERSBURG, WEST VA.

Your attention is respectfully called to our extensive FOUNDRY and MACHINE WORKS situated on Kanawha street, near the B. and O. R. R. Depot.

The entire establishment, in all its departments is supplied with the most approved Machinery tools and appliances necessary to the manufacture of MACHINERY AND LIGHT AND HEAVY-CASTINGS OF EVERY DESCRIPTION.

Our Work is of the best quality both as to material and Workmanship.

We are extensively engaged in the manufacture of Portable and Stationary Steam Engines, Steam Boilers, Circular Saw Mills, Gang Saw Mills, Flouring Mill Machinery, Sorghum Sugar Mills, Shafting Pulleys and Hangers.

We are prepared to do COPPER, BRASS, Sheet Iron Work, And Pipe FITTING.

and to manufacture salt pans and all the apparatus and machinery for making salt. We also manufacture OFFICE AND OTHER STOVES. Our office stoves are of the best quality.

We have also on hand PORTABLE ENGINES, adapted to the running of all kinds of THRESHING MACHINES, ALSO, JACK SCREWS AND STAVE MACHINES.

As to our Stave Machines we respectfully refer the public to Messrs. Kimble & Shaffer, Pennsylvania, West Va. It excels all others. They cannot be surpassed.

Iron Railings, Verandahs, Garden Vases, Brass and Iron Castings of every description.

We would also call the attention of School Officers and others interested to our IMPROVED SCHOOL DESKS, which for neatness, cheapness, and durability, fare not surpassed. They are recommended by Prof. W. R. White, State Superintendent of Free Schools of West Va., and by the Parkersburg School Board. "I have examined M. J. Leese & Co's, Folding Seats for schools, and find them for primary departments, manufactured at Parkersburg, West Va., I most cheerfully recommend our Boards of Education and others interested, to supply our Public School Houses with them.

W. R. WHITE, Gen'l Sup't Free Schools, Wheeling, W. Va., PARKERSBURG, Nov. 7, 1867.

"M. J. Leese & Co., Dear Sir:- In answer as to how we are pleased with your Improved Iron School Desks, we would state that we have used several kinds, but for cheapness, neatness and durability, we give yours the preference to all others.

S. F. SHAW, K. S. HOREMAN, E. T. DRAHOSH, Board of Education.

I fully concur in the above.

STEPHEN BOARDMAN, Sup't Free Schools, Wood Co., W. Va. New and second-hand Engines, of all sizes on hand and for sale at low rates.

GOOD MACHINERY. We will reply to enquiries by mail and promise our best efforts to please purchasers, both as to quality and price.

Call on, or address M. J. LEESE & CO., Parkersburg, West Va. sept. 4, 1868.

Improved Thrashing Machine!

Daniel Geiser.
B. E. Price.

J. F. Oiler.
Josiah Fahrney.

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron thrasher frame and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-five inches wide, and delivers the straw on the floor, those carry the straw out from their tops, and deliver it in the stack, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and be easily managed to carry the chaff with the straw, or deliver it in a separate place. The crank and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against winny weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; it is intended to apply to any common lever or railway power, weighs 1,300 pounds; has an iron thrasher frame, and cylinder, 13 1/2 inches in diameter and 28 inches long, delivers the clean grain in bags, or if desired, in a separate place. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and thrasher in wants, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating Blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed his machine run so light, and give as little trouble. Because there is less friction in the Journals, and the rakes and fan are geared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach when necessary? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the fifth back alternately into the cleaner which must eventually go into the good wheat or in the chaff, and all know, that fifth should be kept separate for feed, &c.; we might as well keep shoveling the Tailings from under our hand and fan into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are closed up to prevent the wheat chaff and dust from coming out and scattering over the floor, causing waist and a giving much trouble with dirt and sore eyes, &c. Why do Thrashermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thresh, whilst in most cases farmers must suit themselves to the machine; because the machine will not suit itself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about; and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868.

Shop Prices of Machines range from \$215, to \$540.

We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

DANIEL GEISER Proprietor.
Geiser, Price & Co., Manufacturers.
WAYNESBORO', FRANKLIN CO., PA.

Null's Pat. Post Boring Machine.

PATENTED MARCH 24, 1868.

STATE AND COUNTY RIGHTS FOR SALE.

A series of trials of this machine has convinced the inventor and all persons who have witnessed its operations that it is superior to any other in use in the following particulars:

LABOR SAVING QUALITIES—
EASE OF OPERATION—
SIMPLICITY OF CONSTRUCTION.

This machine is constructed so as to be operated either by hand, horse, water or steam power. By hand 25 to 30 posts can be bored per day; by one-horse power from 100 to 150 per day; by two-horse power 200 per day, and by water or steam power from 200 to 300 per day. It is also a self-feeder. The subscriber is now prepared to dispose of State and County Rights for the above valuable invention.
