DR. RING'S
Vegetable Ambrosia
 FOR
GRAY HAIR.
 This is the AMBROSIA that Ring made.

This is the Cure that try in the AMBROSIA that Ring made.

This is the Man who was bald and gray.

Who now has raven locks, they say. He used the Cure that try in the AMBROSIA that Ring made.

This is the Maiden, handsome and gay.

Who married the man once bald and gray. Who now has raven locks, they say. He used the AMBROSIA that Ring made.

This is the Person, who, by the way, Married the maiden, handsome and gay.

To the man once bald and gray, But who now has raven locks, they say. Because he used the Cure that try in the AMBROSIA that Ring made.

This is the Bell that rings away to arouse the people and say, "Up to this fact, which here does lay, You see how well it is to be used for gray, Give the AMBROSIA that Ring made."

Prepared and Sold by J. F. KURTZ and F. FOURTHMAN, Waynesboro, Pa., and by Druggists generally.

 Oct 23-11

TROS. J. FILBERT,

MERCHANT TAILOR,

AND AGENT FOR

SINGERS SEWING MACHINE.

June 19, 1867.

Improved Thrashing Machine!

Daniel Geiser.
B. E. Price.
J. F. Oiler.
Joshiah Fahrney.

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT
SELF-REGULATING GRAIN SEPARATOR,
CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron threshing frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it in the stack, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily arranged to carry the straw with the straw, or deliver it in separate piles. The crank and pin sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against any weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses, and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshing frame, and cylinder, 12 1/2 inches in diameter and 48 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together, will thresh and clean in 30-1 grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, on far most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires 4 or 5 more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and thrasher wants, a Separator to go from farm to farm, to thresh grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating feeder, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevents it from blowing in the journals, and the rakes in it are geared so that you have no trouble with Bolts breaking and slipping, causing dust to fall into the waste. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach when necessary? Because it is more convenient in the barn with out the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the dirt back alternately into the cleaner which must eventually go into the good wheat or in the chaff, and you know, that dirt should be kept separate for feed, &c., we might as well keep showing the Feedings from under our hand in into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are closed up to prevent the wheat chaff and dust from coming out and scattering over the floor, causing waste and a giving much trouble with dirt and sore eyes, &c. Why do Thrashers get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashers that have grain to thresh, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit itself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about, and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances. Farmers can rest assured that this machine is no humbug, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868.

Shop Prices of Machines range from \$215, to \$540.

WE warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

DANIEL GEISER Proprietor.
 WAYNESBORO, FRANKLIN CO., PA.

Geiser, Price & Co., Manufacturers.

Null's Pat. Post Boring Machine.

PATENTED MARCH 24, 1868.

STATE AND COUNTY RIGHTS FOR SALE.

A series of trials of this machine has convinced the inventor and all persons who have witnessed its operations that it is superior to any other in use in the following particulars:

LABOR SAVING QUALITIES—
 EASE OF OPERATION—
 SIMPLICITY OF CONSTRUCTION.

This machine is constructed so as to be operated either by hand, horse, water or steam power! By hand 25 to 30 posts can be bored per day; by one-horse power from 100 to 150 per day; by two-horse power 200 per day; and by water or steam power from 200 to 300 per day. It is also a self-feeder.

The subscriber is now prepared to dispose of State and County Rights for the above valuable invention.
 Address

JONATHAN NULL,
 Quincy, Franklin County, Pa.
