### CO-PARTNERSHIP.

The undersigned has taken into co-partnership with him Mr. Jacob Beaver, of Waynesboro, Pa. J. W. MILLER.

# Improved Thrashing Machine!

Daniel Geiser. J. F. Oiler. Josiah Fahrney. B. E. Price.

Farmers will please look at the great advantage in Thrashing Grain with

## GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron threshing frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty-three inches long. Trunk has ten inch rake crank and seven rakes in thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The crank and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against windy weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstances, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in intended to apply to a two-horse or railway power; weighs 1,300 pounds; has an iron threshing frame, and cylinder, 13 inches in diameter and 28 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of hands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will thresh and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and Thrasher in wants, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating Blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed the cleaner and it has rollers and comb in the cleaner which prevents it from clogging. Why does this machine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes and fan are geared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to come out and scattering over the floor, causing wait at a giving much trouble with dirt and sore eyes, &c. Why do Thrashermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thresh, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit itself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about, and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Farmers can rest assured that if they are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868.

Shop Prices of Machines range from \$215. to \$540.

We warrant the machines to be as above represented; also against any reasonable defects of material workmanship, &c.

Dr. P. Fahrney's celebrated Blood Searcher or Panacea, is a medicine that we can recommend to those who are afflicted, having used it in our own family and furnished our friends with the article; we can, therefore, from experience say that it is a medicine possessing rare medicinal properties. Being a mild purgative, it is well to keep it always in the family where there are children or those subject to colic or other sickness. It is especially recommended to medicinal Droops, Leases, Darks, Sores and Berries, which are said to be entirely free from poison. We are personally acquainted with the proprietor who was our family Physician for several years, and we were at one time relieved from a bad affliction under his judicious treatment. —Circulator Family Cooperation.

Fahrney's Blood Searcher.—From our personal acquaintance with Dr. P. Fahrney, and from the reputation of the above named medicine in the community where he lives, we can cheerfully recommend it to a fair trial to all who may need a PANACEA for the physical maladies of mortality, until the great PANACEA for all diseases shall be found in the groves of the tree of life. —Prospect Watchman.

Sold by F. A. COURTNEY, Waynesboro', Hittsberg & Geis. Ringgold; Wm. B. Raby, Quincy; E. J. Small, Mon Alto; L. J. Bell, Smithburg, Md., and Druggists generally.
