Farmers will please look at the great advantage in Thrashing

GEISERS' PATENT 9 SELF-REGULATING GRAIN SEPARATOR,

CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. I is a eight-horse power, with east iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven, rakes is thirty-five-inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the teeder, on a stack fitteen to eighteen feet high, and can be easily mangad to carry the chaff with the straw, or deliver it in a separate place. The aunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against wings weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to lorty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstance, it will thresh from forty to fity bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use. No. I is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, six-

to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in The No. 2 Machine, fully represented in the above our, is particularly acapted to the larmer-suse; in intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshers frame, and cylinder, 12½ inches in diameter and 38 inches long; delivers the clean-grain-in-bags, or if desired, in a half bushel. It delivers the straw lifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for thirket, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of eats per day, using four or six horses, and the same number of nands; but to force the work, under most favorable circumstances, good gram, &c., will thresh and clean considerably more. The Machine will threah and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will

apply very well to a two-horse railway power and the first section of the so hard. It will apply very well to a two-horse railway power in the first section of the section thating fixeder to food the cleaner and it has rollers and combs in the cleaner which prevents it from chooking. Why does this machine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes an i fan are grared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built perminently on two wheels and the front carriage separate, ready-to-attach when necessary? Because it is more convenient in the barn without the front earriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry-the filth-back-atternately—into-the—cleaner which must eventually go into the good wheat or in the chaft, and all know, that filth should be kept separate for feed, &c., we might as well keep shoveling the Tailings from under our hand fan into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are closed up to prevent the wheat chaft and dust from coming out and settering over the flags, causing waist and giving much results with distant and drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage sepfrom coming out and scattering over the floor, causing waist and giving much trouble with dirt and sore eyes, &c. Why do Thrashermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thrash, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit itself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Farmers can rest assured that this machine is no humbur, and judging from the high recommenda

Farmers can rest assured that this machine is no humbut, and judging from the high recommendation of feriners that are using them, we must come to the conclusion that it is the very Machine that faritis branches. CARRIAGES, BUGGIES, &c., &c. mers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform the date of the control of the best material, and warranted. REPAIRING of all kinds as represented in this Circular. A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868.

Shop Prices of Machines range from \$215. to \$540. We warrant the machines to be as above represented; also against any reasonable defects of materia

FOUTZ'8

This preparation, long and favorably known, will thoroughly re-invigorate broken down and low-spirited horses, by strengthening and cleansing the stomach and intestines.

It is a sure preventive of all diseases incident to this animal, such as LUNG PEVER, GLANDERS, YELLOW WATER, HEAVES, COUGHS, DISTEMPER, FEVERS, FOUN DER, LOSS OF APPETITE AND VITAL ENERGY, &c. Its use improves the wind, increases the appetite-gives as amouth and glossy skin—and transforms the miscrable skeleton into a fine-looking and spirited horse.

To keepers of Cows this preparation is invaluable. It is a sure preventive against Rinderpest, Hollow
Horn, etc. It has been proven by
actual experiment to increase the
quantity of milk and cream twenty
per cent, and make the butter firm
and sweet. In fattening cattle, it
gives them an appletite, lossens their hide, and makes
them thrive much faster.

In all diseases of Swine, such as Coughs, Ulcers in the Lungs, Liver, &c., this articleacts as a specific. By putting from one-half a paper to a paper in a barrel of swill the above diseases will be eradicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Cholera.

"Dr. P. Fahrney's celebrated Blood Searcher or Panacca," is a medicine that we can recommend to tho those who are afflicted, having used it in our own family and furnished our friends with the article; we-can, therefore, from experience, say that it is a medicine possessing rare medicinal properties. Being a mild purgative, it is well to keep it always in the family, where there are children or those subject to polds or other sickness. It is compounded from medicinal Roots, Leaves, Barks, Seeds and Berries, which are said to be entirely free from poison. We are personally acquainted with the proprieter who was our family Physician for several years, and we were at one time raised from a bed of affiliction under his indicious treatment,"—Christian Family Companion.

his indicious treatment. —Christian Faminy Companion.

"Faminer's Blood Beardier:—From our personal
equaintance with Dr. P. Fahrney, and from the reputation of the above named medicine in the community where he lives, we can cheerfully recommend it to a fair trial to all who may need a PANACEA
for the physical maladies of mortality, until the great
PANACEA for all diseases shall be found in the leaves
of the tree of life.—Prophetic Watchman.
