J. F Oller. Josiah Fahrzey.

Farmers will please look at the great advantage in Thrashing

## GEISERS' PATENT SBLE-REGULATING GRAIN SEPARATOR,

CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and trutty three inches long. Trunk has ten inch rake crank and seven takes is thirty five metes wide, and telivers the straw on the second rake, these carry the straw out on their is thirty-five metes wide, and telivers the strive of the second rate, these carry the strive of their tops, and deliver it on the striver, which will have can but thirty-five feet beyond the leader, on a stack fitteen to eightee these high, and can be easily a toright to carry the chalf with the starty, or deliver it in a separate place. The course of the selection of the strive and chart, remedies all with these in cleaning grain against what weather. It bags the grain by reasonable management, sufenter urnes in cleaning grain ignise with distributive under ordinary circumstances, is from twenty to forty bush-ens per hour, using eight thoses and the star member of hands; but to force the work under favorable circumstance, it was larged from the votation of the star near per hour, and with more ease and agreeableness hanes than any oto remarking now in common use.

The No 2 Muchine, tuny represented in the above cut, is particularly a apted to the farmer's use; in intended to apply to cover not sever or callway, power, weight 1,300 pounds; has an iron threshers traine, and cylin ou, 121 inches to discover a 148 metes long; delivers the clean grain in bags, or if standard, and dynamics, e.g. accounts for intransical and account to the forter, or it desired, can deliver the standard of the first interest and clean, in 400d grain, ready for market from 100 to 175 bushels of wheat, or it on 300 to 500 against of our grainst four or six horses, and the same number of hands; but to force the work, on let most favorance or junistraces, 300 t gram, &c., will thresh and clean considerably more. The Machine was tyreah and clean all kinds of grain generally threshed with the common my hone, and requires ny more norse power, but in many cases does not run so hard. It will apply very well to a two-norse railway power

Now nere is what the ranger and thous er non wants, a Separator to go from isom to farm, to thrash grain, with more satisfact, on than any other separator no vin use, and way is it? Because this separator has a source unliting diast, which prevents givin from blowing motine could, and also has a self regmating feeder to feed the cle our and it has robers and comos in the channer which prevents it from cheaking. Why does this in tent is rule to 113ht, and give so little trouble? Become there is less friction in the lournals, and the rule in thin it found to that you have no trouble with Beits brooking and supplied, clusting just to the interface wheal. Who does it clean against the wind?—Because the blast has me taction on the group in I the counter is so were arranged that the wind his no chance to drive the dirt into the cooper. Way is a built permanently on two wacers and the hour carriage separate, reads to attach when necessar ? Because it is more convenient in the parm without the tro-t carriage. arate reads to attach which necessary is necessary to the convenient to the arms of the range. You can turn in michine or run it from others to place more easily. When is at not got Eccartors like some other machines? Because the Ency tors carry the first back atternately into the cleaner which must eventuring go into the good wheat or in the c all, and an arrow that fish should be kept septrate for feed, &c, we might as well keep shoveing the landings from under our hand fan into the hopper an expect to get the grain clean. Way is this separator in ore cleanly and satisfactory to work about than others? Because the f'an and Frunk sides are closed up to prevent the wheat chaff and dust from coming out and centering over the flare, causing waist and giving much trouble with oritand sore eyes, &c. Why do Phrishermen get more work with these separators that afthey do with others? Because this separator has all these advantages and many more which makes it a separator suitable and a paying one for collarmers in a Tomashermen that have grain to thresh, we list in most cases farmers must suit themselves to the machine, occasise the machine will not suit uself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work doon and the only separator that will clean and big the grain sufficiently clean for market under all circumstances.

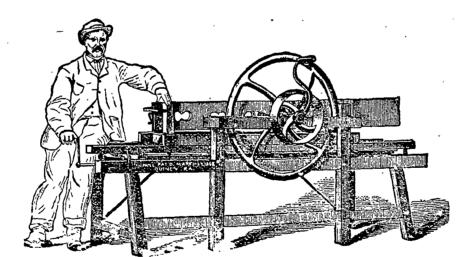

Hess & Crouse their Coach Factory in Waynes-Farmers on rest assured that this mannage is no in and, and judging from the high recommendation, and purpose continuing the business in all benot farmers that are using them, we must come to the conclusion that it is the very Machine that far its branches. CARRIAGES, BUGGIES, &c. &c mers want an 'will have as soon as they give in opportunity to appreciate and attest its merits, for always on hand or made to order, of the best matches which we have they discussed in the position of all kinds.

as represented in this Circular. A reduction of 2 per cent, on all orders banded in on or before the first of April, 1868. Shop Prices of Machines range from \$215, to \$540.

This preparation, long and favorably known, will thoroughly re-invigorate broken down and low-spirited horses, by strengthening and cleanaung the stomach and intestines.

It is a sure preventive of all diseases incident to this animal, such as LUNG FEVER, GLANDERS, YELLOW WATER, HEAVES, COUGHS, DISTEMPER, FEVERS, FOUNDER, LOSS OF APPFTITE AND VITAL ENERGY, &c. Rs use improves the wind, increases the appetite-gives as mooth and glossy skin-and transforms the miserable skeleton into a fine-looking and spirited horse.

In all diseases of Swine, such as Coughs, Ulcers in the Lungs, Liver, &c., this article acts as a specific. By putting from one half a paper to a paper in a barrel of swill the above diseases will be eradicated or entirely prevented. If given in time, a certain preventive and cure for the Riog Cholera.

DAVID E. FOUTZ, Proprietor, BALTIMORE. Md. For sale by Druggists and Storekeepers throughout the United States, Canadas and South America.

"Dr. P. Fahrney's celebrated Blood Searcher or Fanacea," is a medicine that we can recommend to to those who are afflicted, having used it in our own family and furnished our friends with the article; we can, therefore, from experience may that it is medicine possessing rare medicinal properties. Being a mild purgative, it is well to keep it always in the family-where-there-are-children or those subject to-colds or other sickness. It is compounded from medicinal Roots, Leaves, Barks, Seeds and Berries, which are said to be entirely free from poison. We are personally-acquainted with the proprietor who was our family Physician for several years, and we were at one time rulsed from a bed of affliction under his judicious treatment,"—Christian Family Companion.

nis judicious treatment, —Christian Bainting Companion.
