female it, gives life and energy by
restoring the lost powers of nature,
when health again succeeds the
feeble form and pallid cheek of the
sufferer.

restoring the lost powers of nature, when health again succeeds the feeble form and pallid cheek of the sufferer.

Nothing can be more surprising than its invigorating effects on the human system. Persons all weakness and lassitude, by using the PANACEA, at once become robust and full of energy under its influence. Ladies who have pale complexions and are dark about the eyes, blotches and pimpies on the face, rough skin or freckles, and are "out of spirits," should use a bottle or two of LONDON BLOOD PANACEA. It will cleanse your blood, remove the freckles and blotches, and give you animation, sparkling eyes, fine spirits and a beautiful complexion. Try it.

The genuine-have-LONDON-BLOOD-PANACEA, S. A. FOUTZ, BALTIMORE, Mp., blown in the bettle, and my signature on the wrapper.

## Improved Thrashing Machine! HATS,

Daniel Geiser

Josiah Fahrney.

Farmers will please look at the great advantage in Thrashing

## GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR

CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixeen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes teen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily munaged to carry the chaff with the straw, or deliver it in a separate place. The crunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against winay weather. It bags the grain by reasonable management, sufficiently the straw and chaff, remedies all the straw and ch ficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to torty bushels per hour, using eight-horses and the same number of hands; but to force the work under favorable ircumstance, it will thresh from forly to fifty bushels per hour, and with more case and agreeableness o hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshers frame, and cylinder, 123 inches in diameter and 48 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day, using four or six horses, and the same number of nands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will threah and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will

apply very well to a two-horse railway power.

Now here is what the Farmer and thraspermin wants, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because, this separator has a self regulating that, which prevents grain from blowing into the chaff, and also has a self regulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevents it from unating seeder to seed the cleaner and it has rollers and combs in the cleaner which prevents it from choaking. Why does this in chine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes and that are geared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the gram and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carrate, ready to attach when necessar,? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the firth back alternately into the cleuner which must eventually go into the good wheat or in the chaff, and all know, that fifth should be kept separate for feed, &c. we might as well keep shoveling the Pailings from under our hand fan into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are closed up to prevent the wheat chaff and dust from coming out and scattering over the floor, causing waist an i giving much trouble with dirt and sore eyes, &c. Why do Thrashermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thrash, whilst in most cases farmers—must suit themselves to the machine, because the machine will not—suit-likeli to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances. Farmers can rest assured that this machine is no humbur, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform

as represented in this Circular.

A reduction of 2 per cent. on all orders handed in on or before the first of April, 1868. Shop Prices of Machines range from \$215. to \$540. horo', and purpose continuing the business in all its branches. CARRIAGES, BUGGIES, &c., &c. We warrant the machines to be as above represented; also against any reasonable defects of materia workmanship, &c.

DANIEL GEISER, Proprietor.

A SPLENDID STOCK

Just received and for sale cheap for cash. apr 16-1859 E. & J. ELDEN.

"Dr. P. Fahrney's celebrated Blood Searcher or Fanacea," is a medicine that we can recommend to to those who are afflicted, having used it in our own family and furnished our friends with the article; we can, therefore, from experience say that it is a medicine possessing rare medicinal properties. Being a mild purgative, it is well to keep it always in the family where there are children or those subject to colds or other sickness. It is compounded from medicinal Roota, Leaves, Barks, Seeds and Berries, which are said to be entirely free from poison. We are personally sequalated with the proprietor who was our-family-Physician-for several years, and we were at one time raised from a bed of affliction under his indicious treatment."—Christian Family Companion.

"FAHENCE'S BLOOD SEARCHER:—From our personal acquaintance with Dr. P. Fahrney, and from the reputation of the above named medicine in the community where he lives, we can cheerfully recommend it to a fair trial to all who may need a PANACEA for the physical maladies of mortality, until the great PANACEA for all diseases shall be found in the leaves of the tree of life.—Prophetic Watchman.
