Farmers will please look at the great advantage in Thrashing

GEISERS' PATENT

CLEANER AND BAGGER.

SELF-REGULATING GRAIN SEPARATOR

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron throsher frame and wrought iron and wood cylinder, sixeen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their tops, and deliver it in the straker, which will deliver about thirty-five feet beyond the feeder, on a stack titleen to eighteen feet high, and can be easily managed to carry the chaif with the straw, or deliver it in a separate place. The rank and fan sides being closed, to confine the straw and chaif, remedies an difficulties in cleaning grain against winay weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to forty businels per hour, using eight horses and the same number of hands; but to force the work under lavorable is thirty five inches wide, and delivers the straw on the second rake, these carry the straw out on their circumstance, it will thresh from forty to fifty bushels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in

intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshers frame, and cylinder, 121 inches in diameter and 48 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together, will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 busnels of oats per day, using four or sex horses, and the same number of nands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. Phe Muchine will threah an I clean all kinds of grain generally threshed with the common muchine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and thrasherman wants, a Separator to go from farm to farm, to thrash

grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-regulating Blast, which prevents grain from blowing into the chaff, and also has a self-regulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevents it from cheaking. Why does this machine run so light, and give so little trouble? Because there is less Inction in the Journals, and the rakes and fan are geared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why, does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built perminently on two wheels and the front carriage separate, ready to attach when necessary? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not get Elevators like some other machines? Because the Elevators carry the lith back alternately into the cleaner which must eventually go into the good wheat or in the coaff, and all know, that first should be kept separate for feed, &c , we might as well keep shoveling the Tailings from under our hand fan into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are closed up to prevent the wheat chalf and dist from coming out and scattering over the floor, causing waist and giving much trouble with directed eyes, &c. Why do Phrashermen get more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrasherinen that have grain to thrash, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit t'self to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about, and the only separator that will clean and bug the grain sufficiently clean for market under all circumstances.

farmers can rest assured that this machine is no nu and, and judging from the high recommendaion of farmers that are using them, we must come to the conclusion that it is the very Muchine that farmers want and will have as soon as they have an opportunity to appreciate and attest its ments, to which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform Aduction of 2 per cent on all orders han led in on or before the first of April, 1868.

Shop Prices of Machines range from \$215, to \$540. horo', and purpose continuing the business in all its branches. CARRIAGES, BUGGLES, &c., &c. We warrant the machines to be as above represented; also against any reasonable defects of materia

"Dr. P. Fahrney's celebrated Blood Searcher or Fanacea," is a medicine that we can recommend to to those who are afflicted; having used it in our own family and furnished our friends with the articly we can, therefore, from experience say that it is a medicine possessing rare medicinal properties. Being a mild purgative, it is well to keep it always in the family where there are children or those subject to colds or other sickness. It is compounded from medicinal Rooka, Leaves, Barks, Seeds and Berrien, which are said to be entirely free from poison. We are personally acquainted with the proprictor who was our family Physician for several years, and we were at one time raised from a bed of affliction under his judicious treatment."—Christian Family Companion.

panton.

"FARENEY'S BLOOD SEARCHER:—From our personal cequinitance with Dr. P. Fahrney, and from the reputation of the above named medicine in the community where he lives, we can cheerfully recommend it to a fair trial to all who may need a PANACEA for the physical maindies of mortality, until the great PANACEA for all diseases shall be found in the leaves of the tree of life.—Prophetic Watchman.
