Improved Thrashing Machine!

Daniel Geiser. B. E. Price.

J. F. Oller. Josiah Fahrney.

Farmers will please look at the great advantage in Thrashing

GEISERS' PATENT All of which has been obtained from the justly celebrated house of A. JARRETT, Bal-

CLEANER AND BAGGER.

Every article sold is WARRANTED to be of the best custom make, and the material just what it is represented to be.

A tull assortment of GENTS FURNISHING COODS always on hand, such as Under Clothing. Gloves, Handkerchiefs, Hore, Collars & Collars

No. I is a eight-horse power, with cast fron thresher frame and wrought fron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-live inches wide, and delivers the straw on the second rake, these carry the straw out on their teen inches in diameter and carry thresh allowers the straw on the second rake, those carry the straw out on their is thirty-live inches wide, and delivers the straw on the second rake, those carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-live feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily in rings of to carry the chall with the straw, or deliver it in a separate place. The right and fan sides being closed, to confine the straw and chall, remedies all difficulties in cleaning grain against whole weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to torty bushficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to torty bushficiently clean for market, and its capacity to diffy bushfels per hour, and with more ease and agreeableness to hands than any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the farmer's use; in intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshers trame, and cylinder, 12½ inches in diameter and 48 inches long; delivers the clean grain in bags, or if desired, in a half bushel. It delivers the straw fitteen leet from the feeder, or if desired, can deliver the straw and chalf together; will thresh and clean, in good grain, ready tor market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of outs per day, using four or six horses, and the same number of nands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will threah and clean all kinds of grain generally threshed with

hands; but to force the work, under index read and clean all kinds of grain generally threshed with the common machine, and requires no more norse power, but in many cases does not run so hard. It will

appty very well to a two-horse railway power apply very well to a two-hörse railway power

Now here is what the farmer and thrainerm in wants, a Separator to go from farm, to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self regulating that, which prevents grain from blowing into the chalf, and also has a self regulating losder to feed the cleaner and it has rollers and comps in the cleaner which prevents it from chossing. Why does this machine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes and that are geared so that you have no trouble with Belts breaking.

Why does no around the real section of the province of the word? Regards the and suppling, causing dust to the facts and the event. Why does it clean against the wind? Because the blast has onect action on the grain and the cleaner is so well arranged that the wind has no chance to drive the distinct the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach when necessar,? Because it is more convenient in the barn without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not get Etevators like some other machines? Because the Elevators carry the fifth back alternately into the cleaner which must eventually go into the good wheat or in the cast, and all know, that firth should be kept which must eventually go into the good wheat of in the dealthings from under our hand-fain-into-the separate for feed, &c., -we might as well keep shoveling the d'anings from under our hand-fain-into-the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about that others? Because the fan and Trunk Sides are closed up to prevent the wheat that and dust from coming out and scattering over the floor, causing waist an I giving much trouble with dirt and sore eyes, &c. Why do Phrashemen got more work with these separators than they do with others? Because this separator has all these advantages and many more, which makes it a separator suitable and a possible of the separator suitable and a separa paying one for all farmers and Thrashermen that have grain to thrash, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit riself to the farmer. In short this is the chespest, most durable, reliable, simple and most agreeable to work about, and the only sep-

arator that will clean and bag the grain sufficiently clean for market under all circumstances. Furmers can rest assured that this machine is no hu nous, and judging from the high recommendation of farmers that are using them, we must come to the conclusion that it is the very Machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which very hope they will give us an opportunity, as we are writing to be responsible if it does not perform as represented in this Circular.

A religious of 2 pure and on all or less headed in one or hefers the first of A and 1000.

mers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which yie hope they will give us an opportunity, as we are willing to be responsible if it does not perform a represented in this Circular.

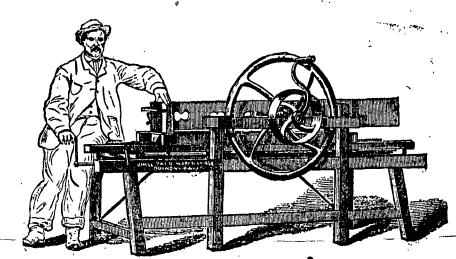

A reduction of 2 per cent on all orders had led in on or before the first of April, 1868.

Shop Prices of Machines range from \$215, to \$540.

We warrant the machine to be as above represented; also against any reasonable defects of material, and warranted. REPAIRING of all kinds workmanship, &c.

DANIEL GEISER Proprietor. Geiser, Price & Co., Manufactures. WAYNESBORO', FRANKLIN CO., PA.

Null's Pat. Post Boring Machine,

PATENTED MARCH 24, 1868.

STATE AND COUNTY RIGHTS FOR SALE.

A series of trials of this machine has convinced the inventor and all persons who have witnessed operations that it is superior to any other in use in the following particulars;

LABOR SAVING QUALITIES— EASE OF OPPERATION— SIMPLICITY OF CONSTRUCTION

This machine is constructed so as to be operated either by hand, horse, water or steam power. By hand 25 to 30 pasts can be bored per day; by one-horse power from 100 to 150 per day; by two-horse power 200 per day, and by water or steam power from 200 to 300 per day. It is also a self-feeder. The subscriber is now prepared to dispose of State and County Rights for the above valuable invention.

A SPLENDID STOCK

Just received and for sale cheap for cash,

"Dr. P. Fahrney's calebrated Blood Bearcher or Panacca," is a medicine that we can recommend to to those-who are affilicted, having used-it in-our own family and furnished our friends with the article; we can, therefore, from experience say that it is a medicine possessing rare medicinal properties. Being a mild purgative, it is well to keep it always in the family where there are children or those subject to colds or other sickness. It is compounded from medicinal Roots_Leaves_Burky_Sosds_and_Berries, which are said to be entirely free from poison. We are personally acquainted with the proprietor who was our family Physician for several years, and we were at one time raised from a bed affiliction under panion.

parion.
