GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR

CLEANER AND BAGGER.

With the latest Improved Triple Geared Horse Power. driven either by Gear or Belt -- Want

No. 1 is a eight-horse power, with east from thresher frame and wrought from and wood cylinder, sixteen inches in daim-ter and thirty three inches long. Frunk has ten meh rake crank and seven rakes a thirty-live in thes will, and felivers the straw on the second rake, these carry the straw onton their tops, and deliver it on the stacker was in with distiver about thirty five few beyond the teeder; on a stack theen to eighteen feet high, and can be easily managed to carry the chalf with the straw, or deliver it in a separate place. The craits and fine ades being closed, to confine the straw and chalf, remediles all officulties in cleaning grain against we are weather. It bags the grain because management, sufficiently clean for market, and its capacity, under ordinary cucumstances, is from twenty to torty bush-is per hour, using eight horses and the same number of hands; but to force the work under davorable neumstance, it will thresh from boty to dity bushels per hour; and with more case and agreeableness han 's toan any oth r machine now it, common use.

The No. 2 Machine, tuity represented in the above out, is particularly adapted to the farmer's use; in intended to apply to any common lever or rangely power; weight 1,300 pounds; has an iron thresheld frame, and cylinder, 125 inches in diameter a 4.88 metes long; delivers the clean grain in bags, or it desired, in a half busines. It defiv is the straw fifteen feet from the feeder, or it desired, can defiver the draw, and chall together, will throughand croun, in good grain, roady for market, from 100 to 176 bushels of wheat, or no n 300 to 5 0 bus tels at outs per day, using four or sex horses, and the same number of names; but to force me work, un for in est favor one circumst mees, 300 f gram, &c., will thresh and c can considerably more. The dictions win tirean in telean all kinds of groingenerally threshed with the common mis hone, and requires as an ire norse power, but in many cases does not run so hard. It will

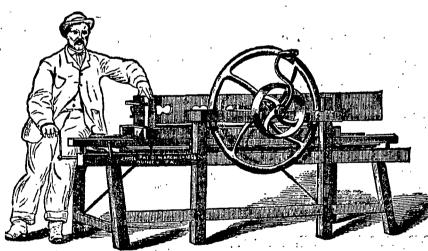

apply very well to a two-norse rallway power Now here is what the farmer and threas ern in wants, a Separator to go from farm to farm, to this sh grain, with more satisfaction than any other separator now in use, and why is it? Because this separafor has a seif regulating thast, which prevents graffi from blowing into the chaff, and also has a self regmating feeder to feed the cleaner and it has robers and comes in the cleaner which prevents it troin cheating. Why does this machine run so hight, and give so little trouble? Bocause there is less fric tion in the fournits, and the rakes unifin its geared so that you have no trouble with Belta breaking and supplies, causing dust to fir into the wheat. With does it clean against the wind? Because the clean treatment on the grain and the cleaner is so well arranged that the wind has no chance to drive the dut into the hopper. Why is it built perminently on two wheels and the front carriage separate, read, to attach when necessar, ? Her case it is more convenient in the barn without the frost car-riage. You can turn the machine or run it from place to place more easily. Why his it not got Elevators like some other machines? Because the Elevators carry the fifth back diarnately into the cleaner which must eventuarly go into the good wheat or in the chaff, and an know that figh should be kept separate for feed. &c., we might as well keep shovening the Tailings from under our nor fin into the hopper and expect to get the grain clean. Why is this separator more cleanity and satisfactory to work about than others? Because the ran and frunk Sides are closed up to prevent the wheat thatfi and dust from coming out and scattering over the floor, causing waist and giving much trouble with cirtain sore eyes, &c. Why do forashermon get more work with these separators than they do with others? Be cause this separator has all these advantages and many more, which makes it a separator suitable and s paying one for all farmers and Thrasheimen that have grain to thrash, we list in most cases farmers must suit themserves to the machine, because the machine will not suit i sell to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable 10, work about, and the only separator that will clean and bag the grain sufficiently clean for market under all circ unistances.

I armors can rest assured that this machine is no nu nous, and justing from the high recommendaion of larmers that are using them, we must come to the conclusion that it is the very Machine that far mers want an ; will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they win give us an opportunity, as we are willing to so responsible if it does not perform as a presented in this Circular . A reduction of 2 per cent on all or less handed in on or before the first of April, 1868.

Shop Prices of Machines range from \$215, to \$540. We warrant the machines to be as above represented; also against any reasonable defects of materia DANIEL GEISER Proprietor.

Null's Pat. Post Boring Machine.

PATENTED MARCH 24, 1868.

STATE AND COUNTY RIGHTS FOR SALE.

A series of trials of this machine has convince the inventor and all persons who have witnessed it operations that it is superior to any other in use in the following particulars:

> LABOR SAVING QUALITIES-EASE OF OPPERATION-SIMPLICITY OF CONSTRUCTION

This machine is constructed so as to be operated either by hand, horse, water or steam power. By hand 25 to 36 posts can be bored per day; by one-horse power from 100 to 150 per day; by two-horse power 200 per day, and by water or steam power from 200 to 300 per day. It is also a self feeder. The subscriber is now prepared to dispose of State and County Rights for the above valuable invention.

"Dr. P. Fahrney's celebrated Blood Scarcher of Panacea," is a medicine that we can recommend to those who are afflicted, baying used it. in our own family and furnished our friends with the article, we can, therefore, from experience say that it is a medicine possessing rare medicinal properties; Being a mild purgative, it is well to keep it always in the family where there are children or those subject to colds or other sickness. It is compounded from medicinal Roots, Leaves, Barks, Seeds and Berries, which are said to be entirely free from poison. We are personally acqualated with the proprietor who was our family Physician for several years, and we were at one time raised from a bed of affiliction under his judicians treatment."—Christian—Family Companion.

panion.

"FAIRNET'S BLOOD SEARCHER:—From our personal acquaintance with Dr. P. Fahrney, and from the reputation of the above named medicine in the community where he lives, we can cheerfully recommend it to a fair-trial to all who may need a PANACEA for the physical maladies of mortality, until the great PANACEA for all diseases shall be found in the leaves of the tree of life.—Prophetic Watchman. & G. h.
