Improved Thrashing Machine! HATS,

Daniel Geiser. B. E. Price.

J. F. Oller. Josiali Fahrney

Farmers will please look at the great advantage in Thrashing JEWELRY,

Grain with GEISERS' PATENT

CLEANER AND BAGGER.

SELE-REGULATING GRAIN SEPARATOR

With the latest Improved Triple Geared Horse Power, driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-five inches wide, and delivers the straw on the second rake, these carry the straw out on their is thirty-five inches wide, and delivers the straw on the second rake, these carry—the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The crunk and fan sides being closed, to confine the straw and chaff, remedies all difficulties in cleaning grain against winay weather. It bags the grain by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to torty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable alternatives it will thresh from factor to fifty bushels nor hour, and with store age and according sircumstance, it will thresh from forty to fifty bushels per hour, and with more case and agreeablences

circumstance, it will thresh from tory to any observables per hour, and wreth hope due and agreed to hands then any other machine now in common use.

The No. 2 Machine, fully represented in the above cut, is particularly adapted to the tarmer's use; in intended to apply to any common lever or railway power; weighs 1,300 pounds; has an iron threshers frame, and cylinder, 12½ inches in diameter and 28 inches long; delivers the clean grain in bags, or if desired in half bushel. It delivers the straw fifteen feet from the feeder, or if desired, can deliver the staw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels staw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, of from 300 to 500 bushels of oats per day, using four or six horses, and the same number of nands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Machine will threah and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power

Apply very well to a two-norse railway power

Now here is what the Farmer and thrashermen wants, a Separator to go from farm to farm, to thrash grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self regulating Blast, which prevents grain from blowing into the chaff, and also has a self regulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevents it from chooking. Why does this machine run so light, and give so little trouble? Because there is less file ulating feeder to teed the cleaner and it has roners and contest in the cleaner which prevents it from chooking. Why does this machine run so light, and give so little trouble? Because there is less frib tion in the Journals, and the rakes and fan are geared so that you have no trouble with Belts broaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has direct action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built permanently on two wheels and the front carriage separate, ready to attach which necessary? Because it is more convenient in the barr without the front carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the filth back alternately into the cleaner which must eventually go into the good wheat or in the chaff, and all know, that filth should be kept separate for feed, &c. we might as well keep shoveling the Tailings from under our hand fan into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk Sides are blosed up to prevent the wheat chaff and dust be the fan of the separator has all these advantages and maky more, which makes it d separator suitable and a cause this separator has all these advantages and maky more, which makes it d separator suitable and a cause this separator has all farmers and Thrashermen that have grain to thrash, whilst in most cases farmers paying one for all farmers and Thrashermen that have grain to thrash, whilst in most cases farmers must suit themselves to the machine, because the machine will not suit itself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances.

Far

Farmers can rest assured that this machine is no humbur, and judging from the high recommenda-tion of farmers that are using them, we must come to the conclusion that it is the very Machine that far-mers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform as represented in this Circular.

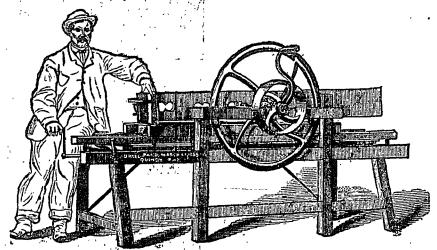

A reduction of 2 per cent or all carless handed in once. hefers the fact of April 1869 A reduction of 2 per cent on all orders handed in on or before the first of April, 1868.

Shop Prices of Machines range from \$215. to \$540. We warrant the machines to be as above represented; also against any reasonable defects of materia, they hope to receive a liberal share of public paworkmanship, &c.

"Dr. P. Fahrney's celebrated Blood Searcher or anscea." is a medicine that we can recommend to "Dr. P. Fahrney's celebrated Blood Searcher or Fansca," is a medicine that we can recommend to to those who are afflicted, having used it in one own family and furnished our friends with the article; we can, therefore, from experience say thirt it is a medicine possessing may medicine properties. Being a mild purgative, it is well to keep it always in the family where there are children, or those subject to colds or other fickness. It is compounded from medicinal Roots, Lavoes, Barks, Kseeff and Berries, which are said to be entirely free from poison. We are personally acquainted with the proprietor who was our family Physician for several years, and we were at one time raised from a bed of afficient under his judicious treatment." "Christian Ennity Companion." "Fahrsey's Blood Searches:—From our personal acquaintance with Dr. P. Fahrney, and from the reputation of the above admed medicine in the community where he lives, we can cheerfully recommend it to a fair trial to all who may need a Panaoza for the physical maladies of mortality, until the great Panacza for all diseases shall be found in the leaves of the tree of life.—Frophette Watchman.
