Improved Thrashing Machine!

Daniel Gelser. B. E. Price.

J. F. Oller. Josiah Fahrney.

Farmers will please look at the great advantage in Thrashing

GEISERS' PATENT

driven either by Gear or Belt

No. 1 is a eight-horse power, with cast iron thresher frame and wrought iron and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty-five inches wide, and telivers the straw on the second rake, these carry the straw out on their tops, and deliver it on the stacker, which will deliver about thirty-five feet beyond the feeder, on a stack fifteen to eighteen feet high, and can be easily managed to carry the chaff with the straw, or deliver it in a separate place. The runk and fan sides being closed, to confine the straw and chalf, runkles all difficulties in cleaning grain against wings weather. It bags the grain be redsonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from twenty to lorty bushels per hour, using eight horses and the same number of hands; but to force the work under favorable circumstance, it will thresh from forty to lifty bushels per hour, and with more case and agreeablence o hands than any other machine now it common use.

The No 2 Machine tully represented up the above cut, is particularly adapted to the farmer's use; in intended to apply to any common lever of railway power; weighs 1,300 pounds; has an iron thresters frame, and cylinder, 12½ inches in diameter at d 28 inches long; delivers the clean grain in bags, or if desired in half bushed. It delivers the arraw fifteen feet from the feeder, or if desired, can deliver the straw and chaff together; will thresh and clean, in good grain, ready for market, from 100 to 175 bushels of wheat, or from 300 to 500 bushels of oats per day using four or sex horses, and the same number of nands; but to force the work, under most favorable circumstances, good grain, &c., will thresh and clean considerably more. The Yachine will threah and clean all kinds of grain generally threshed with the common machine, and requires no more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power.

Now here is what the Farmer and thresherman wants, a Separator to go from farm to farm, to thresh

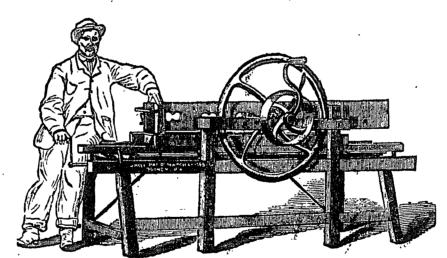

grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a selfregulating Blast, which prevents grain from blowing into the chaff, and also has a selfregulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevents it from choaking. Why does this machine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes and fan are yeared so that you have no trouble with Belts breaking and slipping, causing dust to fall into the wheat. Why does it clean against the wind? Because the blast has theet action on the grain and the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built perm mently on two wheels and the front carriage separate, ready to attach when necessar? Because it is more convenient in the harn without the front carriage You can turn the machine of run it from place to place more easily Why has it not got Elevators like some other machines? Because the Elevators carry the fifth back alternately into the cleaner which must eventually go into the good wheat or in the chaff, and all know that fifth should be kept separate for feed, &c . we might as well keep shoveling the Tailings from under our hand fan into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisfactory to work about than others? Because the Fan and Trunk sides are closed up to prevent the wheat chaff and dust from coming out and scattering over the floor, causing waist and giving much trouble with dirt and sore eyes, &c. Why do Throshe timen get more work with these separators than they do with others? Be cause this separator has all the se advantages and many more, which makes it a separator suitable and a paying one for all farmers and Threshermen that have grain to thrush, we list, in most cases farmers must suit themselves to the machine, because the machine will not suit reself to the farmer. In short this is the cheapest, most durible, reliable, simple and most agreeable to work about and the only apparator that will clean and but the grain sufficiently clean for market under all circumstances.

Formers can rest assured that this machine is no humbur, and judging from the high recommenda-tion of farmers that are using them, we must come to the conclusion that it is the very blackine that far-mers want and will have as soon as they have an opportunity to appreciate and attest its merits, for which we hope they will give us an opportunity, as we are willing to be responsible if it does not perform

A reduction of 2 per cent on all orders hand d in on or before the first of april . 1868 Shop Prices of Machines range from \$215, to \$540. We warrant the machines to be as above represented; also against my reasonable defects of materia workmanship, &c. DANDEL GEISER Proprietor.

Null's Pat. Post Boring Machine.

PATENTED MARCH 24, 1868.

STATE AND COUNTY RIGHTS FOR SALE.

A series of trials of this machine has convinced the inventor and all persons who have witnessed operations that it is superior to any other in use in the following particulars:"

LABOR SAVING QUALITIES— EASE OF OPPERATION— SIMPLICITY OF CONSTRUCTION

This machine is constructed so as to be operated either by hand, horse, water or steam power. By hand 25 to 30 posts can be bored per day; by one-horse power from 100 to 160 per day; by two-horse power 200 per day, and by water or steam power from 200 to 300 per day. It is also a self-feeder. The subscriber is now prepared to dispose of state and County Rights for the above valuable invention.

FOUTZ'S

In all diseases of Swine, such as Coughs, Uters in the Lungs, Liver, &c., this article acts as a specific. By putting from one-half a paper to a paper in a barrel of swill the above diseases will be eradicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Cholers.

DAVID E. FOUTZ, Proprietor,

"Dr. P. Fahrney's celebrated Blood Searcher or Panacea," is a medicine that we can recommend to to those who are afficied, having used it in our own family and furnished our friends with the article; we can, therefore, from experience say that it is a medicine possessing rare medicinal properties. Being a mild purgative, it is well to keep it always in the family where there are children or those subject to colds or other sickness. It is compounded from medicinal Roots Leaves Earks, Seeds and Berries, which are said to be entirely free from poison. We are personally acquainted with the proprietor who was our family Physician for several years, and we were at one time raised from a bed of affliction under his judicious treatment."—Christian Family Comparison.

gamon.
