Improved Thrashing Machine!

Daniel Geiser. B. E. Price.

J. F. Oller. Iosiah Fahrney

Farmers will please look at the great advantage in Thrashing

GEISERS PATES SHER-RECTEATING GRAINSEP & AND &

CLEANER AND BAGGER.

With the latest Imprired I'm e Crewell Horse Power, hand, or made to order at the shortest notice. At so flooring worsed to order, Sawing by mill and so flooring worsed to order. Sawing by mill and so flooring worsed forcer, I am also driven either by Gear or Belt.

No. 1 is a eight-horse power, with cast from thresher frome and wrought from and wood cylinder, sixteen inches in diameter and thirty three inches long. Trunk has ten inch rake crank and seven rakes is thirty five incress well and belivers the straw on the second rake, these carry the straw out on their tops, and deriver to a restrictor, which will beliver about thirty-five feet beyond the deeder, on a stack fifteen to expire e over ugh, and can be easily many of to carry the chaff with the straw, or deliver it in a separate place. The runk and fan sides being closed, to confine the straw and chail, remedies all difficulties in cream against wings weather. It has the grain be reasonable management, subficiently clean for management, and its capacity, under ordinary circumstances, is from twenty-to-orty businels per hour, using eight horses and the same number of hands; but to force the work under tavorable circumstance, it will thresh from forty to fife bushels per hour, and with more ease and agreembleness to hands than any other machine now in common use.

The No 2 Machine, tuily represented in the above cut, is particularly 9 apted to the farmer's use; in intended to apply to any common lever or railway power; weights 1,300 pounds; has an iron thresters trame, and cylinder, 124 inches in diameter and 48 inches long; delivers the clean giain in bags, or it desired in half bushed. It believes the straw titteen feet from the moder, or it desired, can achieve the straw and chaff to 40 for; will three a ind close, in good giain, ready to unirket, from 100 to 175 bushes. of wheat, or from 300 to 5cd bus less of buts per day, using four or sex horses, and the same number of hands; but to force the work, an ler most favorable circumstances, good grain, &c., will thresh and coan considerably more. The Michige will threah and clean all kinds of grain generally threshed with the common my hine, and requires ny more horse power, but in many cases does not run so hard. It will apply very well to a two-horse railway power

Now here is what the Farmer and three erm in wants, a Separator to go from farm to farm, to thresh grain, with more satisfaction than any other separator now in use, and why is it? Because this separator has a self-reculiting Blast, which prevents grain from blowing into the chall, and also has a self-regulating feeder to feed the cleaner and it has rollers and combs in the cleaner which prevents a from ulating feeder to feed the cleaner and it has rollers and counts in the cleaner which prevents d from chooking. Why does this machine run so light, and give so little trouble? Because there is less friction in the Journals, and the rakes and fin the genered so that you have no trouble with Belts breaking and slipping causing dust to fill into the wheat. Why does it clean against the wind? Because the blist has there acron in the grain in I the cleaner is so well arranged that the wind has no chance to drive the dirt into the hopper. Why is it built perminently on two wheels and the front carriage separate, ready to attach when necessary! Because it is more convenient in the barn without the final carriage. You can turn the machine or run it from place to place more easily. Why has it not got Elevators like some other machines? Because the Elevators carry the fifth back alternately into the cleaner which must eventually go into the good wheat or in the chaff, and all know that finth should be kept separate for feed, &c. we might as well keep shoveling the Pailings from under our hold fan into the hopper and expect to get the grain clean. Why is this separator more cleanly and satisf ctory to work about than others? Because the Fangaid Trunk Sides are closed up to provent the wheat chaff and dust from coming out and cattering over the floor, causing waist and giving much trouble with air and sor from coming out and scattering over the floor, crusing waist and giving much trouble with cirtain soreyes, &c. Why do Phrashermen get more work with these separate is than they do with others? Be cause this separator has all these advantages and many more, which makes it a separator suitable and a paying one for all farmers and Thrashermen that have grain to thrush, willst in most cases bermers must suit themselves to the machine, because the machine will not suit reself to the farmer. In short this is the cheapest, most durable, reliable, simple and most agreeable to work about and the only separator that will clean and bag the grain sufficiently clean for market under all circumstances. Farmers can rest assured that this machine is no humbug, and judging from the high recommenda-tion of farmers that are using them, we must come to the conclusion that it is the very Machine that far-

as represented in this Circular. A reduction of 2 per cent on all orders handed in on or, before the first of 'pril, 1868. Shop Prices of Machines range from \$215, to \$540. We warrant the machines to be as above represented; also against any reasonable defects of mater:

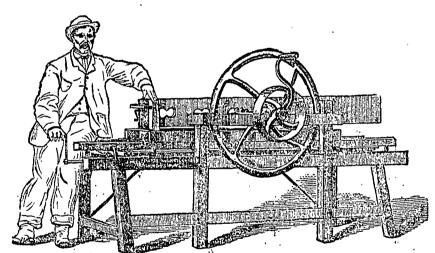

mers want and will have as soon as they have an opportunity to appreciate and attest its merits, for

This preparation, long and favorably known, will thoroughly re-invigorate broken down and low-spirited horses, by strengthening and cleansing the stomach and intestines.

It is a sure preventive of all diseases incident to this animal, such as LUNG FEVER, GLANDERS, YELLOW WATER, HEAVES, COUGHS, DISTEMPER, FEVERS, FOUNDER, LOSS OF APPENTICE AND VITAL ENERGY. So. Its use improves the wind, increases the appetite of the prevention of the property of the prevention of the province of the prevention of the preventio

To keepers of Cows this preparation is invaluable. It is a sure preventive against Rinderpest, Hollow Hon, etc. It has been proven by actual experiment to increase the quantity of milk and creat twesty per cent. and make the butter firm and sweet. In fattening cattle, its gives them an specific, loosens their hide, and makes them thrive much faster.

In all diseases of Swine, such as Coughs, Ulcers in the Lungs, Liver, Scc., this article acts as a specific. By putting from one half a paper to a paper in a barrel of swill the above diseases will be eradicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Cholera.

DAVID E. FOUTZ, Proprietor, BALTIMORE. Md. For sale by Druggists and Storekeepers thronghous is United States, Canadas and South America.

"Dr. P. Fahrney's celebrated Blood Searcher or Fanaces," is a medicine that we can 'recommend to to those who are afflicted, having used it in our own family and furnished our friends with the article; we can, therefore, from experience say that it is a medicine possessing rare medicinal properties. Being a mild purgative, it is well to keep it always in the family where there are children or those subject to colde or other sickness. It is compounded from medicinal Boots, Lovoes, Barks, Seeds and Berries, which are said to be entirely free from polson. We are personally acquainted with the proprietor who was our family Physician for severnly years, and we word at one time raised from a bed of affliction under his judicious treatment."—Christian Funity Companion.
"FAHENEY'S BLOOD SEARCHER:—From our personal.

FAHREN'S BLOOD SEARCHER:—From our personal acquaintance with Dr. P. Fahrney, and from the reputation of the above named medicine in the community where he lives, we can cheerfully recommend it to a full rital to all who may need a PANACEA for the physical maladles of mortality, until the great FANACEA for all diseases shall be found in the leaves of the tree of life.—Frophetic Watchman.
