

GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR
CLEANER, BAGGER AND POWERS

No implement more important to the farmer than a **FIRST CLASS GRAIN THRESHER AND CLEANER**—for none pays him so well and speedily.
The above cut shows the **ONLY GEISER MACHINE** now built under the immediate eye of the old inventors themselves, with all the additional improvements made during the past 18 years, and now with first class workmen, and the machine commands justly stands high, up above all of its class. As a Thresher it is equal to the best, as a Cleaner it is superior to any existing machine. This is admitted by all honest competitors. Indeed it is the only machine that really can, by one operation, thoroughly thresh and clean grain fit for market. But the fact that grain direct from the machine commands from 2 to 3 cents a bushel more than grain direct from any other machine, settles the question of its superiority, as a cleaner over all others. Impartial judges at all the State and County Fairs where it was thoroughly and practically tested, in competition with other leading machines, always agree that it is more simple—more easily understood and operated by those unskilled in the machine commands—more thrashing—as much and yet cleaning better—with less power and more comfort to hands than any other machine in use—and besides all that is sold for less money according to capacity. These facts are further attested by the thousands of purchasers, some of whom have had them in use for the last 18 years. To supply the wants of all, we now make 4 sizes, viz: From a 2 Horse Railway or 3 Horse Lever Power, to a ten Horse Lever power, with prices ranging from \$190 to \$360, without power. We also make the latest improved triple-gear Horse Powers suitable for each size machine ranging from \$90 to \$135, and all fully and fairly warranted. For further information send for Circular and Price List.

THE MORNING GLORY FOR '69.

For sale at **W. A. TRITTLE'S** new Store and Tin Store. He has on hand a large stock of the above stoves, all of the late improved kind. There is added to the Morning Glory this year an oven, which is neat in appearance. It is a good Baker. It can heat Irons, Bake, Boil, Roast, Stew, and it does not interfere with the operations as a Parlor Stove.
In regard to the blast of some Stove Dealers, who say that their particular stove takes less coal and gives more heat than the Morning Glory, you can put that kind of talk down as a *Blow-out*, as the Morning Glory has been sold (in this part of the country) for four years, and in that time I have put out over three hundred of them, and never had to take one back because it would not do its work or it was not what I sold it for. Now that cannot be said of any other stove offered in this market. This is the proof which is the stove. I have other styles of heating stoves for coal or wood—Heating Furnaces put up and warranted. My Cook Stoves are of the best in market for coal or wood, all warranted good Bakers. Also a new Parlor Cook Stove, something that can't be excelled.
Call and see me. You will find my stock of Tin Sheet-Iron and other wares of the best kind, and at low rates.
On hand, the best Clothes Wringer in market—Also a good and cheap Washing Machine.
Roofing and Spouting done of the best stock and at short notice. Job work of all kinds in my line done at low rates. The only place in town where you can get your copper work done, being the only Copper Smith in the place.

THE KIDNEY

The Kidneys are two in number, situated at the upper part of the loins, surrounded by fat, and consisting of three parts, viz: the Anterior, the Posterior, and the Exterior.

The anterior part is the most important, and is the seat of the Urinary system. It consists of the Urinary bladder, the Ureters, and the Urethra. The Urinary bladder is situated in the pelvic cavity, and is the reservoir for the Urine. The Ureters are the tubes by which the Urine is conveyed from the Kidneys to the Urinary bladder. The Urethra is the tube by which the Urine is conveyed from the Urinary bladder to the exterior.

The bladder is composed of various coats or tissues, divided into parts, viz: the Upper, the Lower, the Nervous, and the Muscular. The Upper part is the most important, and is the seat of the Urinary system. It consists of the Urinary bladder, the Ureters, and the Urethra. The Urinary bladder is situated in the pelvic cavity, and is the reservoir for the Urine. The Ureters are the tubes by which the Urine is conveyed from the Kidneys to the Urinary bladder. The Urethra is the tube by which the Urine is conveyed from the Urinary bladder to the exterior.

To cure these affections, we must bring into action the muscular, by a course of Dr. P. Fahrney's Panacea. If they are neglected, they will lead to the most serious consequences. The Urinary system is the most important, and is the seat of the Urinary system. It consists of the Urinary bladder, the Ureters, and the Urethra. The Urinary bladder is situated in the pelvic cavity, and is the reservoir for the Urine. The Ureters are the tubes by which the Urine is conveyed from the Kidneys to the Urinary bladder. The Urethra is the tube by which the Urine is conveyed from the Urinary bladder to the exterior.

GOUT, OR RHEUMATISM.

Pain obscuring in the loins is indicative of the above disease. They occur in persons disposed to acid stomach and chalybeate constitution.

THE GRAVEL.

The gravel ensues from neglect or impotency of the kidneys. The urine being weak, the water is not expelled from the bladder, but allowed to remain; it is converted into uric acid, and is then voided in the urine, and is called Gravel. It is a very dangerous disease, and is attended with the most serious consequences. The Urinary system is the most important, and is the seat of the Urinary system. DROPSY

is a collection of water in some parts of the body, and bears different names, according to the parts affected, viz: when generally diffused over the body, it is called Anasarca; when of the abdomen, Ascites; when of the chest, Hydrothorax.

TREATMENT.

Hill's highly concentrated compound Extract Buchu is decidedly ONE OF THE BEST REMEDIES FOR DISEASES OF THE BLADDER, KIDNEYS, GRAVEL, DROPSICAL, RHEUMATISM, and gouty affections. Under this head we have arranged Dysuria, or difficulty in passing water, Scanty Secretion, small and frequent discharges of water; Strangury, or stopping of water; Hematuria, or bloody urine, Gout and Rheumatism of the kidneys, without any change in quantity, but increase in color, or dark water. It was always highly recommended by the late Dr. Physik, in these affections. This medicine

INCREASES THE POWER OF DIGESTION,

and excites the absorbents into healthy exercise by which the watery or calcareous deposits, and all unnatural enlargements, as well as pain and inflammation, are reduced, and it is taken by men, women, and children. Directions for use and diet accompany. PHILADELPHIA, Pa., Feb. 25, 1867.
H. T. HELMOLD, Druggist.

DEAR SIR—I have been a sufferer, for upwards of twenty years, with gravel, bladder, and kidney affection, during which time I have used various medicinal preparations, and been under the treatment of the most eminent Physicians; experiencing but little relief.
Having seen your preparation extensively advertised, I consulted with my physician in regard to using your Extract Buchu.
I did this because I had used all kinds of advertised remedies, and had found them worthless, and some quite injurious; in fact I despaired of ever getting well, and determined to use no remedies hereafter unless I knew of the ingredients. It was this that prompted me to use your remedy. As you advertised that it was composed of Buchu, cubeb, and juniper berries, it occurred to me and my physician as an excellent combination, and, with his advice after an examination of the article, and consulting again with the druggist, I concluded to try it. I commenced its use about eight months ago, at which time I was confined to my room. From the first bottle I was enabled to get up, and from the second effect, and after using it three weeks, was able to walk. I felt much like writing you a full statement of my case at that time, but thought my improvement might only be temporary, and therefore concluded to defer it and see if it would effect a permanent cure; knowing then it would be of greater value to you, and more satisfactory to me.
I am now able to report that a cure is effected after using the remedy for five months.
I have not used any now for three months and feel as well in all respects as I ever did.
Your Buchu being devoid of any unpleasant taste and odor,

A NICE TONIC AND INVIGORATOR OF THE SYSTEM,

I do not mean to be without it whenever occasion may require its use in such affections.
