GRAIN SEPARATOR

No Implement more important to the farmer then FIRST-OLASS GRAIN THRESHER AND CLEANER-for none pryshim so well and speedi-

The above cut shows the ONLY GEINER M ?. CHINE now built under the imreediate eye of the old inventors themselves, with all the additional im provements made during the past 18 years, and now with first class workmen and material this in chine justly stands high up hove all of its class. As a Phresher it is equal to the best, as a Cleaner it is superior to any existing machine " this is admitted by all havest competitors. Indeed it is the mly" machine that really can, by one operation, then ughly thresh and clean grain fit for market. But the fact that grain direct from this machine commende from 2 to 3 cents a bushel more than grain direct from any other machine, settles the question of its superiority, as a cleaner over all others. Impartial judges at all the State and County Fairs where it was thoroughly and practically tested, in competition withfother leading machines, always at ree that it is more simple-more easily understood and eperated by those unskilled in machinery-more durable .- threshing as much and yet cleaning better -with less power and more contort to hands toan any other machine in use-and besides all that is old-for-tess-money-according to copacity. Thesefacts are further attested by the theusands of purchasers, some of whom have had them in use for the last 'S years. To surply the write of all, we now make 4 81205, viz: From a 2 Horse Railway or 3 Horse Lever Power, to a ten Horse Lever power, with paces ranging from \$190 to \$300, without power. We also taske the latest im-proved triple-geared Horse-Powers suitable for ach size machine ranging from \$90 to \$135, and all fully and fairly warranted.
