No Implement more important to the farmer than a FIRST-CLASS GRAIN THRESHER AND CLBANER—for none pays him so well and speedi-

The above cut shows the ONLY GEISER MA-CHINE now huilt under the immediate eye of the old inventors themselves, with all the additional im-provements made during the past 18 years, and now with first class reoriemen and material this michine justly stands high up above all of its closs. As a Thresher it is equal to the best, as a Cleaner it is suby all honest competitors. Indeed it is the unly machine that really can, by one operation, thoroughly thresh and clean grain fit for market. But the fact that grain direct from this machine commands ome where you got good oysters and crackers, from 2 to 3 cents a bushel more than grain direct from any other machine, settles the question of its superiority, as a cleaner over all others. Impartial judges at all the State and County Fairs where it was thoroughly and practically tested, in competition withother leading machines, always agree that it is more simple—more easily understand and op-erated by those unskilled in machinery—more dura-ble .- threshing as much and yet ofenning beffer with less power and more confort to hands than-any other machine in use—and besides all that issold for less money according to capacity. These facts are further attested by the thousands of purchasers, some of whom have had them in use for the last 18 years. To supply the wants of all, we now make 4 sizes, viz: From a 2 Horse Railway or 3 Horse Lever Power, to a ten Horse Lever power, with prices ranging from \$190 to \$300, without power. We also make the latest mi-proved triple-genred Horse Powers suitable for each size machine ranging from \$90 to \$135, and all fully and fairly warranted.
