THE MORNING GLORY FOR '71.

For sale at W. A, TRITLE's new Stove and Tin Store. He has on hand a large stock of the above stores, all of the late improved kinds.

There is added to the Morning of this year an even, which is neat in appearance. It is a good Baker. You can heat Irons Buke, Boil, Roast, Stew, and it does not interfere with the operations 'as a Parior Stove.

In regard to the blast of some Stove Dealers, who say that their particular stove takes less coal and gives more heat than the Morning Glory, you e su put that kind of talk down as a Blow-well, as the Morning Glery has been sold (in this part of the country) for four years, and in that time I have put out over three hundred of them, and never had to take one back because it would not do its work ket. That is the proof which is the stove.

'I have other styles or heating stoves for coal of wood. Heating Furnaces put up and warranted er and other Plated Rings in great variety, wolch My Cook Stoves are of the best in market for coal chains, Guards, Ribins, Bracelets, Churms, Sleeve er wood, all warranted good Bakers. Dr. P. FAHRNEY'S

Blood Cleanser or Panacea.

As a medicine for children, the Pangoon is, in every way, calculated to take the place of the endless variety of drigs which are annually sold for that purpose, and which are ofter very injurious. A medicine which possesses the qualities of a catharile as well as a mild alternive, and which is capable of arresting disease without the least injury to the child, is of incalcentable value to every mother. As a catharite, it is very effective, yet it, does not, if given in proper quantities, cause nauses or distress to the stomach or bowels. It is very pleasant to the taste, which is a very important feature as a medicine for children. As a precentite of disease it is unprecedented, as it arts directly upon the digestive organs and the blood. In all scrofulous diseases, it is than to, telective medicine or of olered to the public; and, if given regulatrly and perseveringly, those crupitive diseases to common to children may be entirely eradicated.
