At the Indian Department, on Tuesday, Shobeera, the head chief of the prairie band of Pottawotamies, made a most eloquent speech in defence of the right of their tribe. He was dressed in the highest style oi Indian art-in furs, feathers and skins-and a more noble specimen of human nature has been seldom seen. His arguments were forcible, his metaphors brilliant, and the whole characterized by dignity of manner. He was accompanied by thirteen half breeds, and Mr. Ross, the agent at

At a recent meeting of naval offi cers in Paris, at the house of a distinguished French Admiral, it was concluded that a ship-of-war of equal force with the Monitor might be constructed in each of the French naval arsenals in a month, and that within a year France might supply herself with an iron fleet equal to that of any power in Europe. Young America, even under the pressure of war, is ahead still; indeed, war brings out genius unknown before.

Thurlow Weed, in a recent letter from Europe, says that the persistence of our volunteers in facing batteries and storming redoubts, under fire, has won the commendation of yeteran military officers in Europe, who look for no such results in raw volunteers. They didn't calculate on Young America's go-aheadativeness teaching him warfare almost by intuition.

"The New Orleans Board of Provost Marshals have ordered the masters of steamboats not to engage white men as deck hands, and to discharge those they have employed. They must go into the army." So our victorious troops have probably secured nothing but contrabands and ferocious she-sesh.

Fugatives from Norfolk confirm the reported resignation of the reble Commodore Tatuall, and furnished the reason for it. THE REBEL OUTRAGES .- The committee on the conduct of the war, made a report on the subject of the barbarities committed by the rebels at Manassas on the bodies of the federal soldiers, who fell at that battle. The report shows that the most inhuman acts were perpetrated by the rebels. This committee

"The outrage on the bodies of our dead will revive recolections of the cruelties to which savages subject their prisoners. Our soldiers were buried in many cases naked, face downwards."

In other cases, the testimony shows that the bodies were left to decay in the open air. Their bones were dug up and carried off as trophies. Drinking cups were made of their skulls. &c.

Dr. Honiston, Surgeon of the New York Fourteenth Regiment, testifies that the rebels brutally refused him premission to aid the wounded who were under his charge on the field. He avers that he saw rebel Surgeons unnecessarily and inhumanly operate on our soldiers. Some of our wounded were left lying on the field at Bull Run, through one rainy and one sultry day, and when they were at last brought iu, their wounds were completely alive with larvæ deposited by flies.

Gen. Rickert's testifies that the rebels threatened to knock his brains out as he lay on the ground, wounded: that they stripped his first lieutenant and left him naked on the field. Also, that our soldiers who died at Richmond were buried naked along with negro corpses.

The Strength of the Army has been heretofore put down as at seven bundred thousand men, but the most carefully compared returns show that it never exceeded more than five hundred and fifty thousand men in the service. When this fact was announced in Congress the other day a member facetionsly remarked that the statement omitted the Brigadiers, as the number of such officers would make the grand total of seven hundred thousand men in the armies of the Republic.

General Halleck has ordered Gen. Thomas, the victor of Mill Spring, to Pittsburg Landing, to take command of the army formly under command of General Grant, of which the divisions of McClenard and Lew. ABOUT DINNERS .- What is a bad dinner? It is a plain one? That, in a country like ours, where the viands are, interesting and peculiar case of matrior ought to be, in their primitive condition first rate, is the best you can sit | port made in the Senate yesterday afterdown to. The French and Germans are no doubt much more scientific in their cookery than we are; but that arises from the fact that they have worse raw material to deal with. Their art has its origin in poverty. Their meat it stringy and lean—their fish poor and tasteless but these they can dress up with sauce of poignancy and merit; and from their ovens miserable veal and flaccid carp emerge as positive dainties. All honor Col. Fry, who commanded a portion to them for their ingenuity? They are of the Federal forces at the battle of attempting, through culinary and almost chemical science, to make palatable and digestible food out of substances which rank low in the natural scale: and that they do succeed, what traveled gastronome can deny? > Union Men Hanged and Crucified. The Fort Pillow correspondent of the Cincinnati Times says: Several of us went up the river, the other day, in a skiff, a short distance, to the half-submerged house of a Union family, named Armstrong, residing on the Tennessee shore, and the family assures me a number of loyal citizens were hanged for no other reason than their attachment to the Union. Mrs. Armstrong says she knew six men who were executed, and that, in one instance, a poor fellow that had been coerced into the Secession army, and had twice deserted, was captured, carried off in the night, and actually crucified: spikes being driven through his hands and feet, thus fastening him to a tree, and leaving him to a lingering and horrible death. The un\_ fortunate victim was gaged that his cries might not call any one to assist or relieve him; and nearly a week had clapsed before he was discovered. An important letter from General Grant, in reply to the strictures upon his management at Sliloh, is published by the Cincinnati Commercial. He says that the army was thoroughly prepared for battle, was not surprised, and had been skirmishing with the enemy for two days; that he had the confidence of his army, except of about a dozen officers, whom he arrested for cowardice, and that he had to have his headquarters at Savannah to look out for Buell, and to assign quarters to the reinforcements constantly arriving, but that he usually spent the day at Pittsburg.

MATRIMONIAL DIFFICULTIES .- The Bos- The Soldier's True Eriend Always Rood ton Journal says:-The facts of a very monial difficulties are developed in a renoon, by the Committee on Marriage and Divorce, on the petition of William H. Haven, of Leicester. The report states that in 1846 the petitioner-a very respectable citizen of Leicestermarried Elgara D. Fiske, and they lived ogether as husband and wife until 1851. during which time they had one childa daughter—now 13 years of age. When this child was three years old, the mother deserted her husband, and no tidings were received of her whereabouts until about three years after, when Mr. Haven saw the notice of the death of a woman of that name in one of the Boston papers, and on farther inquiry ascertained that she died at Deer Island, in Boston Harbor. Believing that person to be his wife, he afterwards married Hannah Hawes, and after they had lived togethborn to them, the first wife made her appearance, and in the Supreme Judicial Court obtained a decree of divorce from Mr. Haven, on the ground of adultery, which decree prohibited the husband from marrying again. At the instance of the wife, a criminal indictment was also found against the husband, to which he pleaded guilty, and was sentenced to one year's imprisonment. On a representation of the case to the Governor, he was, however, pardoned after being confined for several months .-And how, after his release, Mr. Haven petitions the Legislature that the restriction may be removed, and to be allowed to marry with Hannah Hawes. This petition was seconded by a petition from a number of citizens of Leicester, and the committee have reported a resolve authorizing him to re-marry, and ratifying and confirming the former marriage with Hannah Hawes.

THE TERRITORY OF LANNIWA .- Mr. Pomerov's bill for the organization of the Territory of Lanniwa (a Shawnee word, signifying Indian) is intended to provide for the region lying between Kansas and Texas, west of Arkansas and east of Colorado, Texas and New Mexico. This district has hitherto borne the appelation of the Indian territory, and Mr. Pomeroy has simply translated it into shawnee. One of the perculiarities in the bill is that it proposes to allow the Indians in the territory free participation in governmental affairs and equality before the law.

A NEW GUN.-A large number of the most eminent citizens of New York capitalists, bankers, merchants, steamengine builders and military men, have addressed a letter to the President asking him to sanction an appropriation of \$5.000 to make one of Perkin's steam guns of large size. The small guns formerly made, were completely success ful, and the recent improvements, in steam as well as in rifled guns, make it desirable that futher experiments should be tried, and on a larger scale. It is proposed to use these guns, should the prove successful, for harbor defence against iron-clad gun-boats.
