Housekeeping is thus lowed to the ferry by a large crowd, exemplified by the magic of certain many of whom crossed the ri snobs in New York. All that becomes necessary is, for ambition to waste thousands of human lives, to frustrate the hopes of a nation, to assist in carrying sorrow and mourning to loyal firesides, to squander the public treasure in schemes of impractible strategy, and when all this is done, to cast fortune and reputation into the hands of the secret enemies of the country, accept a cellar full of groceries-receive as a present a sumptuously furnished house. from those who would refuse a blanket to the shivering children of a common soldier. This is the style in which an American Major General sets up housekeeping. This is the modus operandi of manufacturing butternut candidates for the Presidency. The next move will doubtless be made on the part of the butternuts of the border states; and since Mrs. McClellan has her mansiou in New York, Mr. McClellan should have his plantation in some of the southern states, well stocked with niggers. The plantation is necessary to the support of the mansion, and a resupply of the groceries in the cellar; and the mansion is essential to maintaining the dignity of the plantation .---The grandeur of the one would fade without the vivifying influence and support of the other. Huzza, then for Mr. and Mrs. McClellan, with their cellar full of groceries !
