SATURDAY, MARCH 28, 1863.

13 Messrs. Mather & Abbott, No. 335 Broadway, New-York, are duly authorized to act for us in soliciting advertisments, &c., and receipt for the same.

THE NEW CONSCRIPTION LAW. - The appointment of provost marshals throughont the United States to carry out the errollment bill will be made as rapidly as possible. There will be one for every Congressional district, and when the district is very large two or three will that city. It appears that the greater be appointed, as the case may require. In addition for each district, there will also be one civilian and one surgeon, to be paid as assistant surgeon of cavalry, except the rations, etc., leaving about \$113 per month. This will constitute the enrolling board, whose duty it is to divide each district into two sub-divisions, and to appoint for each an enrolling officer, whose special duty it will be to make the enrollment.

the enrolling officer of each sub-district in such manner that each class shall be enrolled seperately, and the age of the person enrolled is to be set down on the list as it will be on the first day of July succeeding the date of the enrollson liable to duty is not now forty-five the list at all.

persons of the second class shall not, in | these deserters. any district, be called into the service of the United States until those of the first class shall have been called .-Whenever the President shall make a requisition, he is authorized to assign to each district the number of men to be furnished, and then the enrolling board shall make a draft of the required number, and fifty per cent. additional; and shall make a complete roll in the order in which the names are drawn .--The drafted men are to stand on the unteers, in respect to advance pay and about fifteen minutes. The poor victim vestments. bounties as now provided by law; and has always borne the reputation of being the President, in assigning the required number to each district, is authorized to make allowance in respect to the numbers already furnished by such district during the war.

After the draft is made each person whose name is drawn is to be notified in writing within ten days, and he is to repair to a designated place of rendezyous; but before the day of assembling he may furnish a substitute, or he may pay to such a person as the Secretary of War shall select, a sum of money in lieu of a substitute; which sum is to be made uniform by a general order, and is not to exceed three hundred dollars .-Every person failing to report in person, or by procuring a substitute, or by paying the stipulated sum, is to be deemed a descriter.

Many persons are still of the opinion that the conscription act, as past by the last Cougress, is the same at that enforced by the rebels. This is not so, as there is a wide difference. The rebel act takes all persons between certain ages, leaving none behind, while our bill merely takes the required quota out there might be in one district 10,000 persons between the ages of twenty and thirty-five years enrolled liable to military duty, and the quota required might be only two or three thousand, which would still leave the majority at home. The rebels, on the contrary, take all they can lay hands upon, whether old or young.

The Philadelphia Press thinks, that "as Pennsylvania has already furnished for the war more troops than any other State, and as some attention is now being directed to colored enlistments, for which it is stated the Governor will give due credit; there is yet hope that, with proper exertions, our State may escape the draft, if a call for more men is issued," But the Copperheads who are denouncing the conscription act, show their inconsistency by encouraging desertions and opposing negro enlistments. If they don't want the conscription enforced, why screen deserters and oppose the enlistment of negroes? The people should remember that for every man, white or black, whom these tories keep out of the army a white man will be drafted to take his place.

Some of our cotemporaries, in Short Scraps of News from our Exchanges making up a statement of affairs in Utah, give the full original dimensions of the Territory, and lead their readers to believe that the Mormons still control it. This is a mistake. Nevada territory, as it now stands, takes off the whole of the old territory Utah west of the thirty-eighth meridian of longitude. Colorado territory takes off the old territory east of the thirty-second meridian of longitude, and south of the forty-first parallel of latitude, while the new territory of Idaho includes that portion of Utah which was east of the thirty-second meridian of longitude, and between the forty-first and forty-second parallels of latitude. Thus all the most valuable mineral lands known to exist in the territory have been cut off and put into from all control of Brigham Young and be secured. his satellites.

The Jersey City Standard has an account of a singular difficulty which has occured at the chemical works in portion of the workmen employed are foreigners, either naturalized or otherwise, and that the former made up their minds that the latter, who have enjoyed the blessings and protection of our Government for many years, should not screen themselves behind their non-citizenship to avoid the prospective draft. Therefore, it was insisted that they should take out papers of naturalization; and it being declined, it was determined Immediately after his appointment, by the others to drive them from the works. This was immediately put into is to proceed to make the enrollment summary execution, though no violence was used. A similar course, it is said, has been pursued at the Zinc Works.

The War Department has received the rolls of all the regiments ment. That is, if any person is not now comprising the Army of the United twenty, but will be on the first of July States, with the number of absentees or next, he is to be placed on the list; or deserters from the army, which show if any married man is not thirty-five that there are upwards of one hundred now, but will be son the first of July and twenty-five thousand of this class, next, he is not to go in the first class, most of whom, it is expected, will be but in the second class; or if any per- brought in by the recent proclamation of the President. Active measures are years of age, but will be on the first day being taken to bring them back. Mrs. Mary Nell, an Irish woman of New York, discovering that her house was frequented by fairles, presumed of course that her child was not her own, but had been changed in the cradle. To test the matter she seated the child, who was three years old, on a red hot shovel, expecting that if it was a fairy it would of the whole number enrolled. Thus, fly away. But the poor sufferer, being only a common mortal, was burned so badly that it died in a week.

> We understand that efforts have been made not only in the Department of General Banks, but at Newbern and other places, to induce the nine months troops to re-enlist for the war, and extra offers in some cases have been made. There are but few, however, who are willing to forego the prospect of a visit to their homes at the end of their term of service, after which, doubtless, a considerable number would be willing to rejoin the Union armies in the field.

The amount of money taken from letters at the "Dead Letter Office" will, it is estimated, amount to \$80,000 for the present year, being some \$30,000 more than the average for past years. This increase is owing chiefly to the large sums of money being constantly sent home by the soldiers.

The other morning in Washington, Brigadier General Buford, after drawing about \$1,900 from the Treasury, stepped over to an oyster saloon near by, and while eating a few raw oysters had his pocket picked of the money by some 'expert," who had followed him.
