### SATURDAY, OCTOBER 24, 1863.

The President has issued his Proclamation calling for three hundred thousand volunteers, in addition to the draft, with a view to a vigorous prosecution of the war, until its object of reestablishing the Union shall be accomplished. Looking forward to the expiration of the time of some of our troops the coming year, he proceeds, like a statesman, to make the needful preparation for supplying their places in time. The Governors of the States are called on for their quotas of three hundred thousand men. The volunteers thus called for are to receive munificent premiums, bounties, and advanced pay. They are to bescredited upon any future draft, and if any State shall fail to raise its quota by the volunteer system, then a draft for the deficiency will be made on the fifth day of January next.

No one has forgotten the howl and whine raised by Beauregard when General Gilmore threw Greek fire into Charleston. It now appears that our Navy Department has official information that when the rebel iron-clad Atlants attempted get to Savannah but was captured, it was her intention to have thrown Greek fire into the cities of New York and Philadelphia. Among the ammunition found on board the Atlanta was a large number of "Robbin's fluid shells" for seven-inch rifle guns, and these shells are the same as are employed by Gilmore against Charleston, and called Greek fire. This shows the hypocrisy of Beauregard when he complained of the inhumanity of its use against him.

The Washington correspondent of the New York Evening Post says that there is talk in military circles of an early repeal of one of the sections of the Conscription Act by the new Congress-that which provides for temporary exemption by the payment of three hundred dollars. This will be urged in December, and it is not improbable that when the next draft is made, should the quotas not be made up by volunteering, impossible:

NO HUMBUG, but an ENTIRELY NEW thing. Only three months in this country ! No clap-trap operation to gull the public, but a genuine money-making thing ! Read the Circular of instruction once only, and you will understand it perfectly. A Lady has just TWENTY DOLLARS SOME DATS! giving instructions in this art. Thousands of Soldiers are making money rapidly at it. No person has to be urged to patronize it. It is a thing that takes better than anything over before offered. You can make money with it home or abroad-on steamboats or railroad cars, and in the country or city. You will be pleased in pursuing it, not only because it will yield handsome income, but also in consequence of the general admiration which it elicits. It is pretty much all profit. A mere trifle is

necessary to start with. There is scarcely one person out of thouands who ever pays any attention to adverisements of this kind, thinking they are humugs. Consequently those who do send for instructions will have a broad field to make money in. There is a class of persons in this world who think because they have been

humbugged out of a dollar or so, that everything that is advertised is a humbug. Consequently they try no more. The person who ucceeds is the one that keeps on trying until he hits something that pays him.

This art cost me one thousand dollars, and expect to make money out of it-and all who purchase the art from me will do the same .---One Dollar sent to me will insure the prompt return of a card of instructions in the art.-The money will be returned to those who are not satisfied.
